SECURITIES AND EXCHANGE COMMISSION**
Washington, D.C. 20549

FORM 10-K

**ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934**

FOR THE FISCAL YEAR ENDED DECEMBER 31, 2018

Commission file number: 001-35039

BankUnited, Inc.

(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation or organization)
14817 Oak Lane, Miami Lakes, FL
(Address of principal executive offices)

27-0162450
(I.R.S. Employer
Identification No.)

33016
(Zip Code)

Registrant's telephone number, including area code: **(305) 569-2000**

Securities registered pursuant to Section 12(b) of the Act:

<u>Title of each class</u>	<u>Name of each exchange on which registered</u>
Common Stock, \$0.01 par value	New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act: **None**

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of the registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company or emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company" and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer
Non-accelerated filer

Accelerated filer
Smaller reporting company
Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

The aggregate market value of the voting and non-voting common stock held by non-affiliates of the registrant on June 30, 2018 was 4,287,268,982.

The number of outstanding shares of the registrant's common stock, \$0.01 par value, as of February 25, 2019, was 98,591,661.

DOCUMENTS INCORPORATED BY REFERENCE:

Portions of the registrant's definitive proxy statement for the 2019 annual meeting of stockholders are incorporated by reference in this Annual Report on Form 10-K in response to Part II, Item 5 and Part III, Items 10, 11, 12, 13 and 14.

GLOSSARY OF DEFINED TERMS

The following acronyms and terms may be used throughout this Form 10-K, including the consolidated financial statements and related notes.

ACI	Loans acquired with evidence of deterioration in credit quality since origination (Acquired Credit Impaired)
AFS	Available for sale
ALCO	Asset/Liability Committee
ALLL	Allowance for loan and lease losses
AOCI	Accumulated other comprehensive income
ARM	Adjustable rate mortgage
ASC	Accounting Standards Codification
ASU	Accounting Standards Update
ATM	Automated teller machine
Basel Committee	International Basel Committee on Banking Supervision
BHC Act	Bank Holding Company Act of 1956
BHC	Bank holding company
BKU	BankUnited, Inc.
BankUnited	BankUnited, National Association
The Bank	BankUnited, National Association
Bridge	Bridge Funding Group, Inc.
Buyout loans	FHA and VA insured mortgages from third party servicers who have exercised their right to purchase these loans out of GNMA securitizations
CCA	Cloud Computing Arrangements
CET1	Common Equity Tier 1 capital
CECL	Current expected credit loss
CFPB	Consumer Financial Protection Bureau
CME	Chicago Mercantile Exchange
CMOs	Collateralized mortgage obligations
Commercial Shared-Loss Agreement	A commercial and other loans shared-loss agreement entered into with the FDIC in connection with the FSB Acquisition
Covered assets	Assets covered under the Loss Sharing Agreements
Covered loans	Loans covered under the Loss Sharing Agreements
CRA	Community Reinvestment Act
DIF	Deposit insurance fund
Dodd-Frank Act	Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010
EPS	Earnings per common share
Failed Bank	BankUnited, FSB
FASB	Financial Accounting Standards Board
FDIA	Federal Deposit Insurance Act
FDIC	Federal Deposit Insurance Corporation
FHLB	Federal Home Loan Bank
FHA loan	Loan guaranteed by the Federal Housing Administration
FICO	Fair Isaac Corporation (credit score)
FNMA	Federal National Mortgage Association
FRB	Federal Reserve Bank

FSB Acquisition	Acquisition of substantially all of the assets and assumption of all of the non-brokered deposits and substantially all of the other liabilities of BankUnited, FSB from the FDIC on May 21, 2009
GAAP	U.S. generally accepted accounting principles
GDP	Gross Domestic Product
GLB Act	The Gramm-Leach-Bliley Financial Modernization Act of 1999
GNMA	Government National Mortgage Association
HTM	Held to maturity
IPO	Initial public offering
IRS	Internal Revenue Service
ISDA	International Swaps and Derivatives Association
LIBOR	London InterBank Offered Rate
LIHTC	Low Income Housing Tax Credits
Loss Sharing Agreements	Two loss sharing agreements entered into with the FDIC in connection with the FSB Acquisition
LTV	Loan-to-value
MBS	Mortgage-backed securities
MSRs	Mortgage servicing rights
Non-ACI	Loans acquired without evidence of deterioration in credit quality since origination
Non-Covered Loans	Loans other than those covered under the Loss Sharing Agreements
OCI	Other comprehensive income
OCC	Office of the Comptroller of the Currency
OFAC	U.S. Department of the Treasury's Office of Foreign Assets Control

OTTI	Other-than-temporary impairment
Proxy Statement	Definitive proxy statement for the Company's 2019 annual meeting of stockholders
PSU	Performance Share Unit
Pinnacle	Pinnacle Public Finance, Inc.
RSU	Restricted Share Unit
SAR	Share Appreciation Right
SBA	U.S. Small Business Administration
SBF	Small Business Finance Unit
SEC	Securities and Exchange Commission
Single Family Shared-Loss Agreement	A single-family loan shared-loss agreement entered into with the FDIC in connection with the FSB Acquisition
TCJA	The Tax Cuts and Jobs Act of 2017
TDR	Troubled-debt restructuring
Tri-State	New York, New Jersey and Connecticut
UPB	Unpaid principal balance
USDA	U.S. Department of Agriculture
VIEs	Variable interest entities
2010 Plan	2010 Omnibus Equity Incentive Plan
2014 Plan	2014 Omnibus Equity Incentive Plan
401(k) Plan	BankUnited 401(k) Plan

Forward-Looking Statements

This Annual Report on Form 10-K contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Words such as "anticipate," "expect," "intend," "plan," "believe," "seek," "estimate," "project," "predict," "will" and similar expressions identify forward-looking statements.

These forward-looking statements are based on management's current views with respect to future results, and are subject to risks and uncertainties. Forward-looking statements are based on beliefs and assumptions made by management using currently available information, such as market and industry materials, historical performance and current financial trends. These statements are only predictions and are not guarantees of future performance. The inclusion of forward-looking statements should not be regarded as a representation by the Company that the future plans, estimates or expectations contemplated by a forward-looking statement will be achieved. Forward-looking statements are subject to various risks and uncertainties and assumptions, including those relating to the Company's operations, financial results, financial condition, business prospects, growth strategy and liquidity. If one or more of these or other risks or uncertainties materialize, or if the Company's underlying assumptions prove to be incorrect, the Company's actual results could differ materially from those contemplated by a forward-looking statement. These risks and uncertainties include, without limitation:

- the impact of conditions in the financial markets and economic conditions generally;
- credit risk, relating to our portfolios of loans, leases and investments overall, as well as loans and leases exposed to specific industry conditions;
- real estate market conditions and other risks related to holding loans secured by real estate or real estate received in satisfaction of loans;
- an inability to successfully execute our fundamental growth strategy;
- geographic concentration of the Company's markets in Florida and the New York metropolitan area;
- natural or man-made disasters;
- risks related to the regulation of our industry;
- inadequate allowance for credit losses;
- interest rate risk;
- liquidity risk;
- loss of executive officers or key personnel;
- competition;
- dependence on information technology and third party service providers and the risk of systems failures, interruptions or breaches of security;
- failure to comply with the terms of the Company's Loss Sharing Agreements (as defined below) with the FDIC (as defined below);
- inadequate or inaccurate forecasting tools and models;
- ineffective risk management or internal controls;
- a variety of operational, compliance and legal risks; and
- the selection and application of accounting methods and related assumptions and estimates.

Additional factors are set forth in the Company's filings with the Securities and Exchange Commission, or the SEC, including this Annual Report on Form 10-K.

Forward-looking statements speak only as of the date on which they are made. The Company expressly disclaims any obligation to update or revise any forward-looking statement, whether as a result of new information, future events or otherwise, except as required by law.

As used herein, the terms the "Company," "we," "us," and "our" refer to BankUnited, Inc. and its subsidiaries unless the context otherwise requires.

PART I

Item 1. Business

Overview

BankUnited, Inc., with total consolidated assets of \$32.2 billion at December 31, 2018, is a bank holding company with one wholly-owned subsidiary, BankUnited, collectively, the Company. BankUnited, a national banking association headquartered in Miami Lakes, Florida, provides a full range of banking services to individual and corporate customers through 80 banking centers located in 14 Florida counties and 5 banking centers in the New York metropolitan area. The Bank also provides certain commercial lending and deposit products through national platforms. The Company has built, primarily through organic growth, a premier commercially focused regional bank with a long-term value oriented business model serving primarily small and medium sized businesses. We endeavor to provide, through our experienced lending and relationship banking teams, personalized customer service and offer a full range of traditional banking products and services to both our commercial and consumer customers.

The FSB Acquisition and the Loss Sharing Agreements

On May 21, 2009, BankUnited entered into the "Purchase and Assumption Agreement" with the FDIC, Receiver of BankUnited, FSB, and acquired substantially all of the assets and assumed all of the non-brokered deposits and substantially all other liabilities of the Failed Bank from the FDIC in the FSB Acquisition.

Concurrently with the FSB Acquisition, the Bank entered into two Loss Sharing Agreements with the FDIC, covering certain legacy assets, including the entire legacy loan portfolio and OREO and certain purchased investment securities. We refer to assets covered by the Loss Sharing Agreements as covered assets or, in certain cases, covered loans. The Loss Sharing Agreements do not apply to assets acquired, purchased or originated subsequent to the FSB Acquisition. At December 31, 2018, the covered assets, consisting of residential loans had an aggregate carrying value of \$201 million. The total UPB of the covered assets at December 31, 2018 was \$401 million.

Pursuant to the terms of the Loss Sharing Agreements, the covered assets were subject to a stated loss threshold whereby the FDIC was obligated to reimburse the Bank for 80% of losses up to a \$4.0 billion stated threshold and 95% of losses in excess of the \$4.0 billion stated threshold. The Bank was obligated to reimburse the FDIC for its share of recoveries with respect to losses for which the FDIC paid the Bank a reimbursement under the Loss Sharing Agreements. The FDIC's obligation to reimburse the Company for losses with respect to the covered assets began with the first dollar of loss incurred. We have received reimbursements of \$2.7 billion for claims submitted to the FDIC under the Loss Sharing Agreements as of December 31, 2018.

The Loss Sharing agreements consisted of the Single Family Shared-Loss Agreement and the Commercial Shared-Loss Agreement. The Single Family Shared-Loss Agreement originally provided for FDIC loss sharing and the Bank's reimbursement for recoveries to the FDIC for ten years from May 21, 2009, or through May 21, 2019, for single family residential and home equity loans and related OREO. The Single Family Shared-Loss Agreement was terminated on February 13, 2019. The Commercial Shared-Loss Agreement provided for FDIC loss sharing for five years from May 21, 2009, or through May 21, 2014, and for the Bank's reimbursement for recoveries to the FDIC for eight years from May 21, 2009, or through the quarter ended June 30, 2017, for all other covered assets.

Our Market Areas

Our primary banking markets are Florida and the Tri-State market of New York, New Jersey and Connecticut. We believe both represent long-term attractive banking markets. In Florida, our largest concentration is in the Miami metropolitan statistical area; however, we are also focused on developing business in other markets in which we have a presence, such as the Broward, Palm Beach, Orlando, Tampa and Jacksonville markets. We operate several national commercial lending platforms, purchase residential loans on a national basis through established correspondent channels and have a national commercial deposit business.

According to estimates from the United States Census Bureau and SNL Financial, from 2015 to 2018, Florida added over 1.2 million new residents, the second most of any U.S. state, and had a total population of 21.5 million and a median household annual income of \$55,629 in 2018. The Florida unemployment rate decreased to 3.3% at December 31, 2018. The Moody's home price index for Florida reflected a year over year increase of 5.3% at September 30, 2018. According to CoStar Commercial Repeat-Sale Indices, commercial real estate values in the South region reflected a year over year increase of 9% at December 31, 2018. According to a report published in December, 2018 by the University of Central Florida, personal income

in Florida is expected to average 3.1% growth from 2018 to 2021 while Florida's Real Gross State Product is forecast to expand at an average annual rate of 3.3% from 2018 to 2021.

We had five banking centers in metropolitan New York at December 31, 2018 serving the Tri-State area. Three banking centers were in Manhattan, one in Long Island and one in Brooklyn. According to the FDIC, at June 30, 2018, the Tri-State area had approximately \$2.2 trillion in deposits, with the majority of the market concentrated in the New York metropolitan area. The Tri-State area had a total population of 32.5 million and a median household annual income of \$73,648 in 2018, while the unemployment rate decreased to 3.7% at December 31, 2018. According to CoStar Commercial Repeat-Sale Indices, commercial real estate values in the Northeast region reflected a year over year increase of 1% at December 31, 2018.

Through two commercial lending subsidiaries of BankUnited, we engage in equipment, franchise and municipal finance on a national basis. The Bank also originates small business loans through programs sponsored by the SBA and to a lesser extent the USDA and provides mortgage warehouse finance on a national basis. We refer to our commercial lending subsidiaries, our small business finance unit, our mortgage warehouse lending operations and our residential loan purchase program as national platforms. We also offer a suite of commercial deposit and cash management products through a national platform.

Products and Services

Lending and Leasing

General—Our primary lending focus is to serve small and middle-market businesses and their executives with a variety of financial products and services, while maintaining a disciplined credit culture.

We offer a full array of lending products that cater to our customers' needs including small business loans, commercial real estate loans, equipment loans and leases, term loans, formula-based loans, municipal and non-profit loans and leases, commercial lines of credit, residential mortgage warehouse lines of credit, letters of credit and consumer loans. We also purchase performing residential loans through established correspondent channels on a national basis.

We have attracted and invested in experienced lending teams in our Florida, Tri-State and national markets, resulting in significant growth in our non-covered loan portfolio. At December 31, 2018, our loan portfolio included \$21.8 billion in non-covered loans, including \$17.0 billion in commercial and commercial real estate loans and \$4.7 billion in residential and other consumer loans. Continued loan growth in both the Florida and Tri-State markets and across our national lending and leasing platforms is a core component of our current business strategy.

Commercial loans—Our commercial loans, which are generally made to growing small business, middle-market and larger corporate entities, include equipment loans, secured and unsecured lines of credit, formula-based loans, mortgage warehouse lines, letters of credit, SBA product offerings and business acquisition finance credit facilities.

Commercial real estate loans—We offer term financing for the acquisition or refinancing of properties, primarily rental apartments, mixed-use commercial properties, industrial properties, warehouses, retail shopping centers, free-standing single-tenant buildings, office buildings and hotels. Other products that we provide include real estate secured lines of credit, and, to a limited extent, acquisition, development and construction loan facilities and construction financing. We make commercial real estate loans secured by both owner-occupied and non-owner occupied properties. Construction lending is not a primary area of focus for us; construction and land loans comprised 1.0% of the loan portfolio at December 31, 2018.

National Commercial Lending Platforms—Through the Bank's two commercial lending subsidiaries, we provide municipal, equipment and franchise financing on a national basis. Pinnacle, headquartered in Scottsdale, Arizona, provides financing to state and local governmental entities directly and through vendor programs and alliances. Pinnacle offers a full array of financing structures on a national basis including equipment lease purchase agreements and direct (private placement) bond refundings and loan agreements. Bridge offers large corporate and middle market businesses equipment leases and loans including direct finance lease and operating lease structures through its equipment finance division. Bridge offers franchise equipment, acquisition and expansion financing through its franchise division. Bridge is headquartered in Baltimore, Maryland. SBF offers an array of SBA, and to a lesser extent, USDA loan products. We typically sell the government guaranteed portion of the loans SBF originates on a servicing retained basis, and retain the unguaranteed portion in portfolio. We also engage in residential mortgage warehouse lending on a national basis.

Residential mortgages—The non-covered residential loan portfolio is primarily comprised of loans purchased on a national basis through select correspondent channels. This national purchase program allows us to diversify our loan portfolio, both by product type and geographically. Residential loans purchased are primarily closed-end, first lien jumbo mortgages for the purchase or re-finance of owner occupied property. We do not originate or purchase negatively amortizing or sub-prime residential loans.

Home equity loans and lines of credit are not a significant component of the loan portfolio.

Consumer loans— Consumer loans are not a material component of our loan portfolio.

Credit Policy and Procedures

BankUnited, Inc. and the Bank have established asset oversight committees to administer the loan portfolio and monitor and manage credit risk. These committees include: (i) the Commercial Loan Committee, (ii) the Credit Risk Management Committee, (iii) the Asset Recovery Committee, (iv) the Criticized Asset Committee and (v) the Residential Credit Risk Management Committee. These committees meet at least quarterly.

The credit approval process provides for prompt and thorough underwriting and approval or decline of loan requests. The approval method used is a hierarchy of individual lending authorities for new credits and renewals. The Credit Risk Management Committee approves authorities for lending and credit personnel, which are ultimately submitted to our Board for ratification. Lending authorities are based on position, capability and experience of the individuals filling these positions. Authorities are periodically reviewed and updated.

BankUnited has established in-house borrower lending limits which are significantly lower than its legal lending limit of approximately \$471 million at December 31, 2018. In-house lending limits at December 31, 2018 ranged from \$75 million to \$150 million. These limits are reviewed periodically by the Credit Risk Management Committee and approved annually by the Board of Directors.

Deposits

We offer traditional deposit products including commercial and consumer checking accounts, money market deposit accounts, savings accounts and certificates of deposit with a variety of terms and rates as well as a robust suite of treasury and cash management services. We offer commercial and retail deposit products across our primary geographic footprint and certain commercial deposit and treasury management services on a national platform. We have a limited on-line deposit product offering. Our deposits are insured by the FDIC up to statutory limits. Demand deposit balances are concentrated in commercial and small business accounts. Our service fee schedule and rates are competitive with other financial institutions in our markets.

Investment Securities

The primary objectives of our investment policy are to provide liquidity, provide a suitable balance of high credit quality and diversified assets to the consolidated balance sheet, manage interest rate risk exposure, and generate acceptable returns given the Company's established risk parameters.

The investment policy is reviewed annually by our Board of Directors. Overall investment goals are established by our Board, Chief Executive Officer, Chief Financial Officer, and members of the ALCO. The Board has delegated the responsibility of monitoring our investment activities to ALCO. Day-to-day activities pertaining to the investment portfolio are conducted within the Company's Treasury division under the supervision of the Chief Investment Officer and Chief Financial Officer.

Risk Management and Oversight

Our Board of Directors oversees our risk management framework. Our Board approves the Company's business plan, risk appetite statement and the policies that set standards for the nature and level of risk the Company is willing to assume. The Board and its established committees receive regular reporting on the Company's management of critical risks and the effectiveness of risk management systems. While our full Board maintains the ultimate oversight responsibility for the risk management framework, its committees, including the audit committee, the risk committee, the compensation committee and the nominating and corporate governance committee, oversee risk in certain specified areas.

Our Board has assigned responsibility to our Chief Risk Officer for maintaining a risk management framework to identify, measure, monitor, control and mitigate risks to the achievement of our strategic goals and objectives and ensure we operate in a safe and sound manner in accordance with the Board's stated risk appetite and Board approved policies. We have invested significant resources to establish a robust enterprise-wide risk management framework to support the planned growth of our Company. Our framework is consistent with common industry practices and regulatory guidance and is appropriate to our size, structure and the complexity of our business activities. Significant elements include a Risk Appetite Statement and risk metrics approved by the Board, ongoing identification and assessments of risk, executive management level risk committees to oversee compliance with the Board approved risk policies and adherence to risk limits, and ongoing testing and reporting by independent internal audit, credit review, and regulatory compliance groups. Executive level oversight of the risk management framework is provided by the Enterprise Risk Management Committee which is chaired by the Chief Risk Officer and attended by the senior executives of the Company. Reporting to the Enterprise Risk Management Committee are sub-committees

dedicated to guiding and overseeing management of critical categories of risk, including the Credit Risk Management, Asset/Liability, Compliance Risk Management, Operational Risk Management, Corporate Disclosure, Enterprise Data, Ethics, and BSA/AML committees.

Marketing and Distribution

We conduct our banking business through 80 banking centers located in 14 Florida counties, 5 banking centers in the New York metropolitan area, and our national lending and commercial deposit gathering platforms. Our distribution network also includes ATMs, fully integrated on-line banking, mobile banking and a telephone banking service. We target small businesses, middle market and larger commercial enterprises, as well as individual consumers.

In order to market our products, we use local television, radio, digital, print and direct mail advertising as well as a variety of promotional activities.

Competition

Our markets are highly competitive. Our markets contain not only a large number of community and regional banks, but also a significant presence of the country's largest commercial banks. We compete with other state, national and international banks as well as savings associations, savings banks and credit unions with physical presence in our market areas or targeting our market areas digitally for deposits and loans. In addition, we compete with financial intermediaries such as FinTech companies, consumer finance companies, mortgage banking companies, insurance companies, securities firms, mutual funds and several government agencies as well as major retailers, all actively engaged in providing various types of loans and other financial services. Our largest banking competitors in the Florida market include BB&T, JPMorgan Chase, PNC, Regions Bank, SunTrust Bank, TD Bank, Wells Fargo, Bank of America and a number of community banks. In the Tri-State market, we also compete with, in addition to the national and international financial institutions listed, Capital One, Signature Bank, New York Community Bank, Valley National Bank, M&T Bank and numerous community banks.

Interest rates on both loans and deposits and prices of fee-based services are significant competitive factors among financial institutions generally. Other important competitive factors include convenience, quality of customer service, availability of on-line, mobile and remote banking products, community reputation, continuity of personnel and services, and, in the case of larger commercial customers, relative lending limits and ability to offer sophisticated cash management and other commercial banking services. While we continue to provide competitive interest rates on both depository and lending products, we believe that we can compete most successfully by focusing on the financial needs of growing companies and their executives and small and middle-market businesses, offering them a broad range of personalized services and sophisticated cash management tools tailored to their businesses.

Regulation and Supervision

The U.S. banking industry is highly regulated under federal and state law. These regulations affect the operations of BankUnited, Inc. and its subsidiaries.

Statutes, regulations and policies limit the activities in which we may engage and the conduct of our permitted activities and establish capital requirements with which we must comply. The regulatory framework is intended primarily for the protection of depositors, borrowers, customers and clients, the FDIC insurance funds and the banking system as a whole, and not for the protection of our stockholders or creditors. In many cases, the applicable regulatory authorities have broad enforcement power over bank holding companies, banks and their subsidiaries, including the power to impose substantial fines and other penalties for violations of laws and regulations. Further, the regulatory system imposes reporting and information collection obligations. We incur significant costs related to compliance with these laws and regulations. Banking statutes, regulations and policies are continually under review by federal and state legislatures and regulatory agencies, and a change in them, including changes in how they are interpreted or implemented, could have a material impact on our business.

The material statutory and regulatory requirements that are applicable to us are summarized below. The description below is not intended to summarize all laws and regulations applicable to us.

Bank and Bank Holding Company Regulation

BankUnited is a national bank. As a national bank organized under the National Bank Act, BankUnited is subject to ongoing and comprehensive supervision, regulation, examination and enforcement by the OCC.

Any entity that directly or indirectly controls a bank must be approved by the Federal Reserve Board under the BHC Act to become a BHC. BHCs are subject to regulation, inspection, examination, supervision and enforcement by the Federal Reserve

Board under the BHC Act. The Federal Reserve Board's jurisdiction also extends to any company that is directly or indirectly controlled by a BHC.

BankUnited, Inc., which controls BankUnited, is a BHC and, as such, is subject to ongoing and comprehensive supervision, regulation, examination and enforcement by the Federal Reserve Board.

Broad Supervision, Examination and Enforcement Powers

A principal objective of the U.S. bank regulatory system is to protect depositors by ensuring the financial safety and soundness of banking organizations. To that end, the banking regulators have broad regulatory, examination and enforcement authority. The regulators regularly examine the operations of banking organizations. In addition, banking organizations are subject to periodic reporting requirements.

The regulators have various remedies available if they determine that the financial condition, capital resources, asset quality, earnings prospects, management, liquidity or other aspects of a banking organization's operations are unsatisfactory. The regulators may also take action if they determine that the banking organization or its management is violating or has violated any law or regulation. The regulators have the power to, among other things:

- enjoin "unsafe or unsound" practices;
- require affirmative actions to correct any violation or practice;
- issue administrative orders that can be judicially enforced;
- direct increases in capital;
- direct the sale of subsidiaries or other assets;
- limit dividends and distributions;
- restrict growth;
- assess civil monetary penalties;
- remove officers and directors; and
- terminate deposit insurance.

The FDIC may terminate a depository institution's deposit insurance upon a finding that the institution's financial condition is unsafe or unsound or that the institution has engaged in unsafe or unsound practices or has violated any applicable rule, regulation, order or condition enacted or imposed by the institution's regulatory agency. Engaging in unsafe or unsound practices or failing to comply with applicable laws, regulations and supervisory agreements could subject BankUnited, Inc., the Bank and their subsidiaries or their officers, directors and institution-affiliated parties to the remedies described above and other sanctions.

Notice and Approval Requirements Related to Control

Banking laws impose notice, approval, and ongoing regulatory requirements on any stockholder or other party that seeks to acquire direct or indirect "control" of an FDIC-insured depository institution. These laws include the BHC Act, the Change in Bank Control Act, and the Home Owners' Loan Act. Among other things, these laws require regulatory filings by individuals or companies that seek to acquire direct or indirect "control" of an FDIC-insured depository institution. The determination of whether an investor "controls" a depository institution is based on all of the facts and circumstances surrounding the investment. As a general matter, a party is deemed to control a depository institution or other company if the party owns or controls 25% or more of any class of voting stock. Subject to rebuttal, a party may be presumed to control a depository institution or other company if the investor owns or controls 10% or more of any class of voting stock. Ownership by affiliated parties, or parties acting in concert, is typically aggregated for these purposes. If a party's ownership of BankUnited, Inc. were to exceed certain thresholds, the investor could be deemed to "control" the Company for regulatory purposes. This could subject the investor to regulatory filings or other regulatory consequences.

In addition, except under limited circumstances, BHCs are prohibited from acquiring, without prior approval:

- control of any other bank or BHC or all or substantially all the assets thereof; or
- more than 5% of the voting shares of a bank or BHC which is not already a subsidiary.

Permissible Activities and Investments

Banking laws generally restrict the ability of BankUnited, Inc. to engage in activities other than those determined by the Federal Reserve Board to be so closely related to banking as to be a proper incident thereto. The GLB Act expanded the scope of permissible activities for a BHC that qualifies as a financial holding company. Under the regulations implementing the GLB Act, a financial holding company may engage in additional activities that are financial in nature or incidental or complementary to a financial activity. Those activities include, among other activities, certain insurance and securities activities. BHCs and their subsidiaries must be well-capitalized and well-managed in order for the BHC and its nonbank affiliates to engage in the expanded financial activities permissible only for a financial holding company. BankUnited, Inc. is not a financial holding company.

In addition, as a general matter, the establishment or acquisition by BankUnited, Inc. of a non-bank entity, or the initiation of a non-banking activity, requires prior regulatory approval. In approving acquisitions or the addition of activities, the Federal Reserve Board considers, among other things, whether the acquisition or the additional activities can reasonably be expected to produce benefits to the public, such as greater convenience, increased competition or gains in efficiency, that outweigh such possible adverse effects as undue concentration of resources, decreased or unfair competition, conflicts of interest or unsound banking practices.

Regulatory Capital Requirements and Capital Adequacy

The federal bank regulators view capital levels as important indicators of an institution's financial soundness. As a general matter, FDIC-insured depository institutions and their holding companies are required to maintain minimum capital relative to the amount and types of assets they hold. The final supervisory determination on an institution's capital adequacy is based on the regulator's assessment of numerous factors. Both BankUnited, Inc. and BankUnited are subject to regulatory capital requirements.

The Federal Reserve Board has established risk-based and leverage capital guidelines for BHCs, including BankUnited, Inc. The OCC has established substantially similar risk-based and leverage capital guidelines applicable to national banks, including BankUnited. BankUnited, Inc. and BankUnited are subject to capital rules implemented under the framework promulgated by the International Basel Committee on Banking Supervision (the "Basel III Capital Rules"). While some provisions of the rules are tailored to larger institutions, the Basel III Capital Rules generally apply to all U.S. banking organizations, including BankUnited, Inc. and BankUnited.

The Basel III Capital Rules provide for the following minimum capital to risk-weighted assets ratios:

- (i) 4.5% based upon CET1;
- (ii) 6.0% based upon tier 1 capital; and
- (iii) 8.0% based upon total regulatory capital.

The Basel III Capital Rules require institutions to retain a capital conservation buffer of 2.5% above these required minimum capital ratio levels. A minimum leverage ratio (tier 1 capital as a percentage of average total assets) of 4.0% is also required under the Basel III Capital Rules. Banking organizations that fail to maintain the minimum required capital conservation buffer could face restrictions on capital distributions or discretionary bonus payments to executive officers, with distributions and discretionary bonus payments being completely prohibited if no capital conservation buffer exists, or in the event of the following: (i) the banking organization's capital conservation buffer was below 2.5% (or the minimum amount required) at the beginning of a quarter; and (ii) its cumulative net income for the most recent quarterly period plus the preceding four calendar quarters is less than its cumulative capital distributions (as well as associated tax effects not already reflected in net income) during the same measurement period.

Prompt Corrective Action

Under the FDIA, the federal bank regulatory agencies must take "prompt corrective action" against undercapitalized U.S. depository institutions. U.S. depository institutions are assigned one of five capital categories: "well capitalized," "adequately capitalized," "undercapitalized," "significantly undercapitalized," and "critically undercapitalized," and are subjected to differential regulation corresponding to the capital category within which the institution falls. As of December 31, 2018, a depository institution was deemed to be "well capitalized" if the banking institution had a total risk-based capital ratio of 10.0% or greater, a tier 1 risk-based capital ratio of 8.0% or greater, a CET1 risk-based capital ratio of 6.5% and a leverage ratio of 5.0% or greater, and the institution was not subject to an order, written agreement, capital directive, or prompt corrective action directive to meet and maintain a specific level for any capital measure. Under certain circumstances, a well-capitalized, adequately-capitalized or undercapitalized institution may be treated as if the institution were in the next lower capital category. A banking institution that is undercapitalized is required to submit a capital restoration plan. Failure to meet capital guidelines could subject the institution to a variety of enforcement remedies by federal bank regulatory agencies, including: termination of deposit insurance by the FDIC, restrictions on certain business activities, and appointment of the FDIC as conservator or receiver. As of December 31, 2018, BankUnited, Inc. and BankUnited were well capitalized.

Source of strength

All companies, including BHCs, that directly or indirectly control an insured depository institution are required to serve as a source of strength for the institution. Under this requirement, BankUnited, Inc. in the future could be required to provide financial assistance to BankUnited should it experience financial distress. Such support may be required at times when, absent this statutory and Federal Reserve Policy requirement, a BHC may not be inclined to provide it.

Regulatory Limits on Dividends and Distributions

Federal law currently imposes limitations upon certain capital distributions by national banks, such as certain cash dividends, payments to repurchase or otherwise acquire its shares, payments to stockholders of another institution in a cash-out merger and other distributions charged against capital. The Federal Reserve Board and OCC regulate all capital distributions by BankUnited directly or indirectly to BankUnited, Inc., including dividend payments.

BankUnited may not pay dividends to BankUnited, Inc. if, after paying those dividends, it would fail to meet the required minimum levels under risk-based capital guidelines and the minimum leverage capital ratio requirements, or in the event the OCC notified BankUnited that it was in need of more than normal supervision. Under the FDIA, an insured depository institution such as BankUnited is prohibited from making capital distributions, including the payment of dividends, if, after making such distribution, the institution would become "undercapitalized." Payment of dividends by BankUnited also may be restricted at any time at the discretion of the appropriate regulator if it deems the payment to constitute an unsafe and unsound banking practice.

BankUnited is subject to supervisory limits on its ability to declare or pay a dividend or reduce its capital unless certain conditions are satisfied.

In addition, it is the policy of the Federal Reserve Board that BHCs should pay cash dividends on common stock only out of income available over the past year and only if prospective earnings retention is consistent with the organization's expected future needs and financial condition. The policy provides that BHCs should not maintain a level of cash dividends that undermines the BHC's ability to serve as a source of strength to its banking subsidiaries.

Reserve Requirements

Pursuant to regulations of the Federal Reserve Board, all banking organizations are required to maintain average daily reserves at mandated ratios against their transaction accounts. In addition, reserves must be maintained on certain non-personal time deposits. These reserves must be maintained in the form of vault cash or in an account at a Federal Reserve Bank.

Limits on Transactions with Affiliates and Insiders

Insured depository institutions are subject to restrictions on their ability to conduct transactions with affiliates and other related parties. Section 23A of the Federal Reserve Act imposes quantitative limits, qualitative requirements, and collateral requirements on certain transactions by an insured depository institution with, or for the benefit of, its affiliates. Transactions covered by Section 23A include loans, extensions of credit, investment in securities issued by an affiliate, and acquisitions of assets from an affiliate. Section 23B of the Federal Reserve Act requires that most types of transactions by an insured depository institution with, or for the benefit of, an affiliate be on terms at least as favorable to the insured depository institution as if the transaction were conducted with an unaffiliated third party.

The Federal Reserve Board's Regulation O and OCC regulations impose restrictions and procedural requirements in connection with the extension of credit by an insured depository institution to directors, executive officers, principal stockholders and their related interests.

The Volcker Rule

The Volcker Rule generally prohibits "banking entities" from engaging in "proprietary trading" and making investments and conducting certain other activities with "covered funds."

Although the rule provides for some tiering of compliance and reporting obligations based on size, the fundamental prohibitions of the Volcker Rule apply to banking entities of any size, including BankUnited, Inc. and BankUnited. Banking entities with total assets of \$10 billion or more that engage in activities subject to the Volcker Rule are required to establish a compliance program to address the prohibitions of, and exemptions from, the Volcker Rule. The banking agencies have proposed rules that would tailor a banking organization's Volcker compliance program based on the extent of the banking entity's trading assets and liabilities.

Corporate governance

The Dodd-Frank Act addressed many investor protection, corporate governance and executive compensation matters that affect most U.S. publicly traded companies, including BankUnited, Inc. The Dodd-Frank Act (1) granted stockholders of U.S. publicly traded companies an advisory vote on executive compensation; (2) enhanced independence requirements for compensation committee members; (3) required companies listed on national securities exchanges to adopt incentive-based compensation claw-back policies for executive officers; and (4) provided the SEC with authority to adopt proxy access rules that would allow stockholders of publicly traded companies to nominate candidates for election as a director and have those nominees included in a company's proxy materials.

Examination Fees

The OCC currently charges fees to recover the costs of examining national banks, processing applications and other filings, and covering direct and indirect expenses in regulating national banks. Various regulatory agencies have the authority to assess additional supervision fees.

FDIC Deposit Insurance

The FDIC is an independent federal agency that insures the deposits of federally insured depository institutions up to applicable limits. The FDIC also has certain regulatory, examination and enforcement powers with respect to FDIC-insured institutions. The deposits of BankUnited are insured by the FDIC up to applicable limits. As a general matter, the maximum deposit insurance amount is \$250,000 per depositor.

Additionally, FDIC-insured depository institutions are required to pay deposit insurance assessments to the FDIC. The amount of a particular institution's deposit insurance assessment is based on that institution's risk classification under an FDIC risk-based assessment system. An institution's risk classification is assigned based on its capital levels and the level of supervisory concern the institution poses to the regulators.

Depositor Preference

The FDIA provides that, in the event of the "liquidation or other resolution" of an insured depository institution, the claims of depositors of the institution (including the claims of the FDIC as subrogee of insured depositors) and certain claims for administrative expenses of the FDIC as a receiver will have priority over other general unsecured claims against the institution. Insured and uninsured depositors, along with the FDIC, will have priority in payment ahead of unsecured, non-deposit creditors, including BankUnited, Inc., with respect to any extensions of credit they have made to such insured depository institution.

Federal Reserve System and Federal Home Loan Bank System

As a national bank, BankUnited is required to hold shares of capital stock in a Federal Reserve Bank. BankUnited holds capital stock in the Federal Reserve Bank of Atlanta. As a member of the Federal Reserve System, BankUnited has access to the Federal Reserve discount window lending and payment clearing systems.

BankUnited is a member of the Federal Home Loan Bank of Atlanta. Each FHLB provides a central credit facility primarily for its member institutions as well as other entities involved in home mortgage lending. Any advances from a FHLB

must be secured by specified types of collateral. As a member of the FHLB, BankUnited is required to acquire and hold shares of capital stock in the FHLB of Atlanta. BankUnited is in compliance with this requirement.

Anti-Money Laundering and OFAC

Under federal law, financial institutions must maintain anti-money laundering programs that include established internal policies, procedures, and controls; a designated compliance officer; an ongoing employee training program; and testing of the program by an independent audit function. Financial institutions are also prohibited from entering into specified financial transactions and account relationships and must meet enhanced standards for due diligence and customer identification in their dealings with non-U.S. financial institutions and non-U.S. customers. Financial institutions must take reasonable steps to conduct enhanced scrutiny of account relationships to guard against money laundering and to report any suspicious transactions, and law enforcement authorities have been granted increased access to financial information maintained by financial institutions. Bank regulators routinely examine institutions for compliance with these obligations and they must consider an institution's compliance in connection with the regulatory review of applications, including applications for banking mergers and acquisitions. The regulatory authorities have imposed "cease and desist" orders and civil money penalty sanctions against institutions found to be violating these obligations.

The U.S. Department of the Treasury's OFAC is responsible for helping to insure that U.S. entities do not engage in transactions with certain prohibited parties, as defined by various Executive Orders and Acts of Congress. OFAC publishes lists of persons, organizations, and countries suspected of aiding, harboring or engaging in terrorist acts, known as Specially Designated Nationals and Blocked Persons. If BankUnited, Inc. or BankUnited finds a name on any transaction, account or wire transfer that is on an OFAC list, BankUnited, Inc. or BankUnited must freeze or block such account or transaction, file a suspicious activity report and notify the appropriate authorities.

Consumer Laws and Regulations

Banking organizations are subject to numerous laws and regulations intended to protect consumers. These laws include, among others:

- Truth in Lending Act;
- Truth in Savings Act;
- Electronic Funds Transfer Act;
- Expedited Funds Availability Act;
- Equal Credit Opportunity Act;
- Fair and Accurate Credit Transactions Act;
- Fair Housing Act;
- Fair Credit Reporting Act;
- Fair Debt Collection Act;
- Gramm-Leach-Bliley Act;
- Home Mortgage Disclosure Act;
- Right to Financial Privacy Act;
- Real Estate Settlement Procedures Act;
- laws regarding unfair and deceptive acts and practices; and
- usury laws.

Many states and local jurisdictions have consumer protection laws analogous, and in addition to, those listed above. These federal, state and local laws regulate the manner in which financial institutions deal with customers when taking deposits, making loans, or conducting other types of transactions. Failure to comply with these laws and regulations could give rise to regulatory sanctions, customer rescission rights, action by state and local attorneys general, and civil or criminal liability.

CFPB

The CFPB is tasked with establishing and implementing rules and regulations under certain federal consumer protection laws with respect to the conduct of providers of certain consumer financial products and services. The CFPB has rulemaking authority over many of the statutes governing products and services offered to bank and thrift consumers. For banking organizations with assets of \$10 billion or more, such as BankUnited, Inc. and the Bank, the CFPB has exclusive rule making and examination, and primary enforcement authority under federal consumer financial law. In addition, states are permitted to adopt consumer protection laws and regulations that are stricter than those regulations promulgated by the CFPB.

The Community Reinvestment Act

The CRA is intended to encourage banks to help meet the credit needs of their service areas, including low and moderate-income neighborhoods, consistent with safe and sound operations. The bank regulators examine and assign each bank a public CRA rating.

The CRA requires bank regulators to take into account the bank's record in meeting the needs of its service area when considering an application by a bank to establish or relocate a branch or to conduct certain mergers or acquisitions. The Federal Reserve Board is required to consider the CRA records of a BHC's controlled banks when considering an application by the BHC to acquire a banking organization or to merge with another BHC. If BankUnited, Inc. or BankUnited applies for regulatory approval to make certain investments, the regulators will consider the CRA record of target institutions and BankUnited, Inc.'s depository institution subsidiaries. An unsatisfactory CRA record could substantially delay approval or result in denial of an application. The regulatory agency's assessment of the institution's record is made available to the public. Following its most recent CRA examination in September 2015, BankUnited received an overall rating of "Satisfactory."

Employees

At December 31, 2018, we employed 1,735 full-time employees and 55 part-time employees. None of our employees are parties to a collective bargaining agreement. We believe that our relations with our employees are good.

Available Information

Our website address is www.bankunited.com. Our electronic filings with the SEC (including all Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, and if applicable, amendments to those reports) are available free of charge on the website as soon as reasonably practicable after they are electronically filed with, or furnished to, the SEC. The information posted on our website is not incorporated into this Annual Report. In addition, the SEC maintains a website that contains reports and other information filed with the SEC. The website can be accessed at <http://www.sec.gov>.

Item 1A. Risk Factors

Risks Related to Our Business

Our business may be adversely affected by conditions in the financial markets and economic conditions generally.

Deterioration in business or economic conditions generally, or more specifically in the principal markets in which we do business, could have one or more of the following adverse effects on our business, financial condition and results of operations:

- A decrease in demand for our loan and deposit products;
- An increase in delinquencies and defaults by borrowers or counterparties;
- A decrease in the value of our assets;
- A decrease in our earnings;
- A decrease in liquidity; and
- A decrease in our ability to access the capital markets.

Our enterprise risk management framework may not be effective in mitigating the risks to which we are subject, or in reducing the potential for losses in connection with such risks.

Our enterprise risk management framework is designed to identify and minimize or mitigate the risks to which we are subject, as well as any losses stemming from such risks. Although we seek to identify, measure, monitor, report, and control our exposure to such risks, and employ a broad and diversified set of risk monitoring and mitigation techniques in the process, those techniques are inherently limited in their ability to anticipate the existence or development of risks that are currently unknown and unanticipated. The ineffectiveness of our enterprise risk management framework in mitigating the impact of known risks or the emergence of previously unknown or unanticipated risks may result in our incurring losses in the future that could adversely impact our financial condition and results of operations.

Our business is highly susceptible to credit risk.

As a lender, we are exposed to the risk that our customers will be unable to repay their loans according to their terms and that the collateral securing the payment of their loans, if any, may be insufficient to ensure repayment. Credit losses are inherent in the business of making loans. We are also subject to credit risk that is embedded in our securities portfolio. Our credit standards, procedures and policies may not prevent us from incurring substantial credit losses, particularly if economic or market conditions deteriorate. It is difficult to determine the many ways in which a decline in economic or market conditions may impact the credit quality of our assets.

Our allowance for loan and lease losses may not be adequate to cover actual credit losses.

We maintain an allowance for loan and lease losses ("ALLL") that represents management's estimate of probable incurred losses inherent in our credit portfolio. This estimate requires management to make significant assumptions and involves a high degree of judgment, which is inherently subjective, particularly as our loan portfolio has not exhibited performance through a full credit cycle. Management considers numerous factors in determining the amount of the ALLL, including, but not limited to, historical loss severities and net charge-off rates of BankUnited and other comparable financial institutions, internal risk ratings, loss forecasts, collateral values, delinquency rates, the level of non-performing, criticized, classified and restructured loans in the portfolio, product mix, underwriting and credit administration policies and practices, portfolio trends, concentrations, industry conditions, economic trends and other factors considered by management to have an impact on the ability of borrowers to repay their loans.

If management's assumptions and judgments prove to be incorrect, our current allowance may be insufficient and we may be required to increase our ALLL. In addition, regulatory authorities periodically review our ALLL and may require us to increase our provision for loan losses or recognize further loan charge-offs, based on judgments different than those of our management. Adverse economic conditions could make management's estimate even more complex and difficult to determine. Any increase in our ALLL will result in a decrease in net income and capital and could have a material adverse effect on our financial condition and results of operations. See Item 7 "Management's Discussion and Analysis of Financial Condition and Results of Operations—Analysis of the Allowance for Loan and Lease Losses" and "Management's Discussion and Analysis of Financial Condition and Results of Operations—Critical Accounting Policies and Estimates—Allowance for Loan and Lease Losses."

The FASB issued an ASU that will result in a significant change in how we and other financial institutions recognize credit losses in the financial statements and may have a material impact on our financial condition and results of operations or on the industry more broadly.

In June 2016, the FASB issued ASU No. 2016-13, "Financial Instruments- Credit Losses (Topic 326), Measurement of Credit Losses on Financial Instruments," which replaces the current "incurred loss" model for recognizing credit losses with an "expected loss" model referred to as the CECL model. Under the CECL model, we will be required to present certain financial assets carried at amortized cost, such as loans held for investment and held-to-maturity debt securities, at the net amount expected to be collected. The measurement of expected credit losses is to be based on information about past events, including historical experience, current conditions, and reasonable and supportable forecasts that affect the collectability of the reported amount. This measurement will take place at the time the financial asset is first added to the balance sheet and periodically thereafter. This differs significantly from the "incurred loss" model required under current GAAP, which delays recognition until it is probable a loss has been incurred. The adoption of the CECL model is likely to significantly impact the methodology used to determine our ALLL and could require us to significantly increase our ALLL, resulting in an adverse impact to our financial condition, regulatory capital levels and results of operations. Moreover, the CECL model may create more volatility in the level of our ALLL. We are not yet able to reasonably estimate the impact that adoption of ASU 2016-13 will have on our financial condition, regulatory capital levels or results of operations. The ASU will be effective for us on January 1, 2020.

Additionally, uncertainty exists around whether adoption of the CECL model by the financial services industry more broadly will have an impact on loan demand, how loan products are structured, the availability and pricing of credit in the markets or regulatory capital levels for the industry.

We depend on the accuracy and completeness of information about clients and counterparties in making credit decisions.

In deciding whether to extend credit or enter into other transactions with clients and counterparties, we may rely on information furnished by or on behalf of clients and counterparties, including financial statements and other financial information. We also may rely on representations of clients and counterparties as to the accuracy and completeness of that information and, with respect to financial statements, on reports of independent auditors.

The credit quality of our loan portfolio and results of operations are affected by residential and commercial real estate values and the level of residential and commercial real estate sales and rental activity.

A material portion of our loans are secured by residential or commercial real estate. The ability of our borrowers to repay their obligations and our financial results may therefore be adversely affected by changes in real estate values. Commercial real estate valuations in particular are highly subjective, as they are based on many assumptions. Such valuations can be significantly affected over relatively short periods of time by changes in business climate, economic conditions, occupancy rates, the level of rents, interest rates and, in many cases, the results of operations of businesses and other occupants of the real property. The properties securing income-producing investor real estate loans may not be fully leased at the origination of the loan. A borrower's ability to repay these loans is dependent upon stabilization of the properties and additional leasing through the life of the loan or the borrower's successful operation of a business. Weak economic conditions may impair a borrower's business operations, lead to elevated vacancy rates or lease turnover, slow the execution of new leases or result in falling rents. These factors could result in further deterioration in the fundamentals underlying the commercial real estate market and the deterioration in value of some of our loans. Similarly, residential real estate valuations can be impacted by housing trends, the availability of financing at reasonable interest rates, the level of supply of available housing, governmental policy regarding housing and housing finance and general economic conditions affecting consumers.

We make credit and reserve decisions based on current real estate values, the current conditions of borrowers, properties or projects and our expectations for the future. If real estate values or fundamentals underlying the commercial and residential real estate markets decline, we could experience higher delinquencies and charge-offs beyond that provided for in the ALLL.

Since we engage in lending secured by real estate and may be forced to foreclose on the collateral property and own the underlying real estate, we may be subject to the increased costs and risks associated with the ownership of commercial or residential real property, which could have an adverse effect on our business or results of operations.

A significant portion of our loan portfolio is secured by residential or commercial real property. During the ordinary course of business, we may foreclose on and take title to properties securing certain loans, in which case, we are exposed to the risks inherent in the ownership of real estate. The amount that we, as a mortgagee, may realize after a default is dependent upon factors outside of our control, including:

- general or local economic conditions;
- environmental cleanup liability;
- neighborhood values;
- interest rates;
- commercial real estate rental and vacancy rates;
- real estate tax rates;
- operating expenses of the mortgaged properties;
- supply of and demand for properties;
- ability to obtain and maintain adequate occupancy of the properties;
- zoning laws;
- governmental rules, regulations and fiscal policies; and
- hurricanes or other natural or man-made disasters.

These same factors may impact the ability of borrowers to repay their obligations that are secured by real property.

Our business is susceptible to interest rate risk.

Our business and financial performance are impacted by market interest rates and movements in those rates. Since a high percentage of our assets and liabilities are interest bearing or otherwise sensitive in value to changes in interest rates, changes in rates, in the shape of the yield curve or in spreads between different types of rates can have a material impact on our results of operations and the values of our assets and liabilities. Changes in the value of investment securities available for sale and certain derivatives directly impact equity through adjustments of accumulated other comprehensive income and changes in the values of certain other assets and liabilities may directly or indirectly impact earnings. Interest rates are highly sensitive to many factors over which we have no control and which we may not be able to anticipate adequately, including general economic conditions and the monetary and tax policies of various governmental bodies, particularly the Federal Reserve Board.

Our earnings and cash flows depend to a great extent upon the level of our net interest income. Net interest income is the difference between the interest income we earn on loans, investments and other interest earning assets, and the interest we pay on interest bearing liabilities, such as deposits and borrowings. The flattening of the yield curve and tight credit spreads has limited our ability to add higher yielding assets to the balance sheet than what may otherwise might have been realized in a more normalized rate environment with a positively shaped yield curve. If the flat rate environment persists beyond current forecasts, or the curve flattens further or inverts, downward pressure on our net interest margin may be exacerbated, negatively impacting our net interest income in the future. Changes in interest rates can increase or decrease our net interest income, because different types of assets and liabilities may react differently, and at different times, to market interest rate changes. When interest bearing liabilities mature or reprice more quickly than interest earning assets in a period of rising rates, an increase in interest rates could reduce net interest income. When interest earning assets mature or reprice more quickly than interest bearing liabilities, falling interest rates could reduce net interest income. Additionally, an increase in interest rates may, among other things, reduce the demand for loans and our deposit products, decrease loan repayment rates and negatively affect borrowers' ability to meet their obligations. A decrease in the general level of interest rates may affect us through, among other things, increased prepayments on our loan and mortgage-backed securities portfolios. Competitive conditions may also impact the interest rates we are able to earn on new loans or are required to pay on deposits, negatively impacting both our ability to grow deposits and interest earning assets and our net interest income.

We attempt to manage interest rate risk by adjusting the rates, maturity, repricing, mix and balances of the different types of interest-earning assets and interest bearing liabilities and through the use of hedging instruments; however, interest rate risk management techniques are not precise, and we may not be able to successfully manage our interest rate risk. Our ability to manage interest rate risk could be negatively impacted by longer fixed rate terms on loans being added to our portfolio or by unpredictable behavior of depositors in various interest rate environments. A rapid or unanticipated increase or decrease in interest rates, changes in the shape of the yield curve or in spreads between rates could have an adverse effect on our net interest margin and results of operations.

Possible replacement of the LIBOR benchmark interest rate may have an impact on our business, financial condition and results of operations.

In July 2017, the Financial Conduct Authority, a regulator of financial services firms in the United Kingdom, announced that it intends to stop persuading or compelling banks to submit LIBOR rates after 2021. The announcement indicates that the continuation of LIBOR on the current basis cannot and will not be guaranteed after 2021. At this time, no consensus exists as to what rate or rates may become acceptable alternatives to LIBOR and it is impossible to predict the effect of any such alternatives on the value of LIBOR-based securities and variable rate loans, subordinated debentures, or other securities or financial arrangements, given LIBOR's role in determining market interest rates globally. Uncertainty as to the nature of alternative reference rates and as to potential changes or other reforms to LIBOR may adversely affect LIBOR rates and the value of LIBOR-based loans and securities in our portfolio, and may impact the availability and cost of hedging instruments and borrowings. If LIBOR rates are no longer available, and we are required to implement substitute indices for the calculation of interest rates under our loan agreements with our borrowers, we may incur significant expenses in effecting the transition, and may be subject to disputes or litigation with customers over the appropriateness or comparability to LIBOR of the substitute indices, which could have an adverse effect on our results of operations.

A failure to maintain adequate liquidity could adversely affect our financial condition and results of operations.

Effective liquidity management is essential for the operation of our business. We require sufficient liquidity to meet customer loan requests, customer deposit maturities and withdrawals and other cash commitments under both normal operating conditions and under extraordinary or unpredictable circumstances causing industry or general financial market stress. Our access to funding sources in amounts adequate to finance our activities on terms that are acceptable to us could be impaired by factors that affect us specifically or the financial services industry or economy generally. Factors that could detrimentally impact our access to liquidity sources include a downturn in economic conditions in the geographic markets in which our operations are concentrated or in the financial or credit markets in general. Our access to liquidity in the form of deposits may also be affected by the liquidity needs of our depositors and by competition for deposits in our primary markets. A substantial portion of our liabilities consist of deposit accounts that are payable on demand or upon several days' notice, while by comparison, the majority of our assets are loans, which cannot be called or sold in the same time frame. Although we have historically been able to replace maturing deposits and borrowings as necessary, we might not be able to replace such funds in the future. A failure to maintain adequate liquidity could materially and adversely affect our business, results of operations or financial condition.

We may not be successful in executing our fundamental business strategy.

Organic growth and diversification of our business are essential components of our business strategy. Commercial and consumer banking, for both loan and deposit products, in our primary markets is highly competitive. Our ability to achieve profitable organic growth is also dependent on economic conditions, on the interest rate environment, which is in turn dependent to a large degree on fiscal and monetary policy, and on depositor behavior and preferences. There is no guarantee that we will be able to successfully or profitably execute our organic growth strategy.

While acquisitions have not historically been a primary contributor to our growth, we opportunistically consider potential acquisitions of financial institutions and complementary non-bank businesses. There are risks that may inhibit our ability to successfully execute such acquisitions. We compete with other financial institutions for acquisition opportunities and there are a limited number of candidates that meet our acquisition criteria. Consequently, we may not be able to identify suitable candidates for acquisitions. If we do identify suitable candidates, there is no assurance that we will be able to obtain the required regulatory approvals in order to acquire them. If we do succeed in consummating future acquisitions, acquisitions involve risks that the acquired businesses may not achieve anticipated results. In addition, the process of integrating acquired entities may divert significant management time and resources. We may not be able to integrate successfully or operate profitably any financial institutions or complementary businesses we may acquire.

Growth, whether organic or through acquisition is dependent on the availability of capital and funding. Our ability to raise capital through the sale of stock or debt securities may be affected by market conditions, economic conditions or regulatory changes. There is no assurance that sufficient capital or funding to enable growth will be available in the future, upon acceptable terms or at all.

The geographic concentration of our markets in Florida and the New York metropolitan area makes our business highly susceptible to local economic conditions.

Unlike some larger financial institutions that are more geographically diversified, our operations are concentrated in Florida and the New York metropolitan area. Additionally, a significant portion of our loans secured by real estate are secured by commercial and residential properties in these geographic regions. Accordingly, the ability of our borrowers to repay their

loans, and the value of the collateral securing such loans, may be significantly affected by economic conditions in these regions or by changes in the local real estate markets. Disruption or deterioration in economic conditions in the markets we serve could result in one or more of the following:

- an increase in loan delinquencies;
- an increase in problem assets and foreclosures;
- a decrease in the demand for our products and services; or
- a decrease in the value of collateral for loans, especially real estate, in turn reducing customers' borrowing power, the value of assets associated with problem loans and collateral coverage.

Hurricanes and other weather-related events, as well as man-made disasters, could cause a disruption in our operations or other consequences that could have an adverse impact on our results of operations.

Our geographic markets in Florida and other coastal areas are susceptible to severe weather, including hurricanes, flooding and damaging winds. The occurrence of a hurricane or other natural disaster to which our markets are susceptible or a man-made catastrophe such as terrorist activity could disrupt our operations, result in damage to our facilities and negatively affect the local economies in which we operate. These events may lead to a decline in loan originations, an increase in deposit outflows, reduce or destroy the value of collateral for our loans, particularly real estate, negatively impact the business operations of our customers, and cause an increase in delinquencies, foreclosures and loan losses. Our business and results of operations may be materially, adversely impacted by these and other negative effects of such events.

Our portfolio of assets under operating lease is exposed to fluctuations in the demand for and valuation of the underlying assets.

Our equipment leasing business is exposed to asset risk resulting from ownership of the equipment on operating lease. Asset risk arises from fluctuations in supply and demand for the underlying leased equipment. We are exposed to the risk that, at the end of the lease term or in the event of early termination, the value of the asset will be lower than expected, resulting in reduced future lease income over the remaining life of the asset or a lower sale value. Demand for and the valuation of the leased equipment is sensitive to shifts in general and industry specific economic and market trends, governmental regulations and changes in trade flows from specific events such as natural or man-made disasters. A significant portion of our equipment under operating lease consists of rail cars used directly or indirectly in oil and gas drilling activities. Although we regularly monitor the value of the underlying assets and the potential impact of declines in oil and natural gas prices on the value of railcars on operating lease, there is no assurance that the value of these assets will not be adversely impacted by conditions in the energy industry.

Our reported financial results depend on management's selection and application of accounting policies and methods and related assumptions and estimates.

Our accounting policies and estimates are fundamental to our reported financial condition and results of operations. Management is required to make difficult, complex or subjective judgments in selecting and applying many of these accounting policies. In some cases, management must select an accounting policy or method from two or more alternatives, any of which may be reasonable under the circumstances, yet may result in us reporting materially different results than would have been reported under a different alternative.

From time to time, the FASB and SEC may change the financial accounting and reporting standards that govern the preparation of our financial statements. These changes can be difficult to predict and can materially impact how we record and report our financial condition and results of operations. In some cases, we could be required to apply a new or revised standard retrospectively, resulting in a restatement of prior period financial statements. See Note 1 to the consolidated financial statements for more information about recent accounting pronouncements that may have a material impact on our reported financial results.

Our internal controls may be ineffective.

Management regularly monitors, evaluates and updates our internal controls over financial reporting, disclosure controls and procedures, and corporate governance policies and procedures. Any system of controls, however well designed and operated, can provide only reasonable, not absolute, assurances that the objectives of the controls are met. Any failure or circumvention of our controls and procedures or failure to comply with regulations related to controls and procedures could have a material adverse effect on our financial condition and results of operations.

We depend on our executive officers and key personnel to execute our long-term business strategy and could be harmed by the loss of their services.

We believe that our continued growth and future success will depend in large part on the skills of our senior management team. We believe our senior management team possesses valuable knowledge about and experience in the banking industry and that their knowledge and relationships could be difficult to replicate. The composition of our senior management team and our other key personnel may change over time. Although our Chairman, President and Chief Executive Officer has entered into an employment agreement with us, he may not complete the term of his employment agreement or renew it upon expiration. Other members of our senior management team are not subject to employment agreements. Our success also depends on the experience of other key personnel and on their relationships with the customers and communities they serve. The loss of service of one or more of our executive officers or key personnel, or the inability to recruit and retain qualified personnel in the future, could have an adverse effect on our business, financial condition or operating results.

We face significant competition from other financial institutions and financial services providers, which may adversely impact our growth or profitability.

The primary markets we currently serve are Florida and the New York metropolitan area. Commercial and consumer banking in these markets is highly competitive. Our markets contain not only a large number of community and regional banks, but also a significant presence of the country's largest commercial banks. We compete with other state and national banks as well as savings and loan associations, savings banks and credit unions located in Florida, New York and adjoining states as well as those targeting our markets digitally for deposits and loans. In addition, we compete with financial intermediaries, such as FinTech companies, consumer finance companies, marketplace lenders, mortgage banking companies, insurance companies, securities firms, mutual funds and several government agencies as well as major retailers, all actively engaged in providing various types of loans and other financial services. The variety of entities providing financial services to businesses and consumers, as well as the technologies and delivery channels through which those services are provided are rapidly evolving.

The financial services industry is likely to become even more competitive as a result of legislative, regulatory and technological changes and continued consolidation. Banks, securities firms and insurance companies can merge under the umbrella of a financial holding company, which can offer virtually any type of financial service, including banking, securities underwriting, insurance (both agency and underwriting) and merchant banking. Increased competition among financial services companies may adversely affect our ability to market our products and services. Technology has lowered barriers to entry and made it possible for banks to compete in our markets without a retail footprint by offering competitive rates, as well as non-banks, including online providers, to offer products and services traditionally provided by banks. Many of our competitors have fewer regulatory constraints and may have lower cost structures. Additionally, due to their size, many competitors may offer a broader range of products and services as well as better pricing for certain products and services than we can.

Our ability to compete successfully depends on a number of factors, including:

- the ability to develop, maintain and build upon long-term customer relationships based on quality service, high ethical standards and safe and sound banking practices;
- our ability to pro-actively and quickly respond to technological change;
- the ability to attract and retain qualified employees to operate our business effectively;
- the ability to expand our market position;
- the scope, relevance and pricing of products and services offered to meet customer needs and demands;
- the rate at which we introduce new products and services relative to our competitors;
- customer satisfaction with our level of service; and
- industry and general economic trends.

Failure to perform in any of these areas could significantly weaken our competitive position, which could adversely affect our growth and profitability, which, in turn, could harm our business, financial condition and results of operations.

Crypto-currencies and blockchain technology eventually may be the foundation for greatly enhancing transactional security throughout the banking industry, but also may eventually greatly reduce the need for banks as financial deposit-keepers and intermediaries.

The inability of BankUnited, Inc. to receive dividends from its subsidiary bank could have a material adverse effect on the ability of BankUnited, Inc. to make payments on its debt, pay cash dividends to its shareholders or execute share repurchases.

BankUnited, Inc. is a separate and distinct legal entity from the Bank, and the substantial majority of its revenue consists of dividends from the Bank. These dividends are the primary funding source for the dividends paid by BankUnited, Inc. on its common stock, the interest and principal payments on its debt and any repurchases of outstanding common stock. Various federal and state laws and regulations limit the amount of dividends that a bank may pay to its parent company. In addition, our right to participate in a distribution of assets upon the liquidation or reorganization of a subsidiary may be subject to the prior claims of the subsidiary's depositors and other creditors. If the Bank is unable to pay dividends, BankUnited, Inc. might not be able to service its debt, pay its obligations, pay dividends on its common stock or make share repurchases.

We rely on analytical and forecasting models that may prove to be inadequate or inaccurate, which could adversely impact the effectiveness of our strategic planning and our results of operations.

The processes we use to forecast future performance and estimate expected credit losses, the effects of changing interest rates, sources and uses of liquidity, cash flows from ACI loans, real estate values, and economic indicators such as unemployment on our financial condition and results of operations depend upon the use of analytical and forecasting tools and models. These tools and models reflect assumptions that may not be accurate, particularly in times of market stress or other unforeseen circumstances. Furthermore, even if our assumptions are accurate predictors of future performance, the tools and models they are based on may prove to be inadequate or inaccurate because of other flaws in their design or implementation. If these tools prove to be inadequate or inaccurate, our strategic planning processes, earnings and capital may be adversely impacted.

Changes in taxes and other assessments may adversely affect us.

The legislatures and taxing authorities in the tax jurisdictions in which we operate regularly enact reforms to the tax and other assessment regimes to which we and our customers are subject. The effects of these changes and any other changes that result from interpreting and implementing regulations or enactment of additional tax reforms cannot be quantified and there can be no assurance that any such reforms would not have an adverse effect upon our business.

Tax laws are complex and subject to different interpretations by the taxpayer and relevant governmental taxing authorities, which are sometimes subject to prolonged evaluation periods until a final resolution is reached. In establishing a provision for income tax expense, filing returns and establishing the value of deferred tax assets and liabilities for purposes of its financial statements, the Company must make judgments and interpretations about the application of these inherently complex tax laws. If the judgments, estimates and assumptions the Company uses in establishing provisions, preparing its tax returns or establishing the value of deferred tax assets and liabilities for purposes of its financial statements are subsequently found to be incorrect, there could be a material effect on our results of operations.

Operational Risks

We are subject to a variety of operational, legal and compliance risks, including the risk of fraud or theft by employees or outsiders, which may adversely affect our business and results of operations.

We are exposed to many types of operational risks, including legal and compliance risk, the risk of fraud or theft by employees or outsiders and operational errors, including clerical or record-keeping errors or those resulting from faulty or disabled technology. The occurrence of any of these events could cause us to suffer financial loss, face regulatory action and suffer damage to our reputation.

Because the nature of the financial services business involves a high volume of transactions, certain errors may be repeated or compounded before they are discovered and successfully rectified. Our necessary dependence upon automated systems to record and process transactions and our large transaction volume may further increase the risk that technical flaws or employee tampering or manipulation of those systems will result in losses that are difficult to detect. We also may be subject to disruptions of our operating systems arising from events that are wholly or partially beyond our control which may give rise to disruption of service to customers and to financial loss or liability. The occurrence of any of these events could result in a diminished ability to operate our business as well as potential liability to customers and counterparties, reputational damage and regulatory intervention, which could adversely affect our business, financial condition or results of operations.

We are dependent on our information technology and telecommunications systems. System failures or interruptions could have an adverse effect on our financial condition and results of operations.

Our business is highly dependent on the successful and uninterrupted functioning of our information technology and telecommunications systems. We rely on these systems to process new and renewed loans, gather deposits, provide customer service, facilitate collections, and share data across our organization. The failure of these systems could interrupt our operations. Because our information technology and telecommunications systems interface with and depend on third-party systems, we could experience service denials if demand for such services exceeds capacity or such third-party systems fail or experience interruptions. If sustained or repeated, a system failure or service denial could result in a deterioration of our ability to process new and renewed loans, gather deposits, provide customer service, compromise our ability to operate effectively, damage our reputation, result in a loss of customer business, and/or subject us to additional regulatory scrutiny and possible financial liability, any of which could have a material adverse effect on our financial condition and results of operations.

We are dependent on third-party service providers for significant aspects of our business infrastructure, information technology, and telecommunications systems.

We rely on third parties to provide key components of our business infrastructure and major systems including, but not limited to, core banking systems such as loan servicing and deposit transaction processing systems, our electronic funds transfer transaction processing, cash management and online banking services. While we select and monitor the performance of third-party vendors carefully, we do not control their actions. Any problems caused by these third parties, including those resulting from disruptions in communication services provided by a vendor, failure of a vendor to handle current or higher volumes, failure of a vendor to provide services for any reason or poor performance of services, or the termination of a third-party software license or service agreement on which any of these systems is based, could adversely affect our ability to deliver products and services to our customers and otherwise conduct our business. In many cases, our operations rely heavily on the secure processing, storage and transmission of information and the monitoring of a large number of transactions on a minute-by-minute basis, and even a short interruption in service could have significant consequences. Financial or operational difficulties of a third-party vendor could also adversely affect our operations if those difficulties interfere with the vendor's ability to serve us effectively or at all. Replacing these third-party vendors could also create significant delays and expense. Accordingly, use of such third parties creates an unavoidable inherent risk to our business operations.

Failure by us or third parties to detect or prevent a breach in information security or to protect customer information and privacy could have an adverse effect on our business.

In the normal course of our business, we collect, process, and retain sensitive and confidential client and customer information. Despite the security measures we have in place, our facilities and systems may be vulnerable to cyber attacks, security breaches, acts of vandalism, computer viruses, misplaced or lost data, programming and/or human errors, or other similar events, especially because, in the case of any intentional breaches, the techniques used change frequently or are not recognized until launched, and cyber attacks can originate from a wide variety of sources, including third parties.

We provide our customers the ability to bank remotely, including online, via mobile devices and over the telephone. The secure transmission of confidential information over the internet and other remote channels is a critical element of remote banking. Our network could be vulnerable to unauthorized access, computer viruses, phishing schemes and other security breaches. In addition to cyber attacks or other security breaches involving the theft of sensitive and confidential information, hackers recently have engaged in attacks against large financial institutions, particularly denial of service attacks, designed to disrupt key business services such as customer-facing websites. We may be required to spend significant capital and other resources to protect against the threat of security breaches and computer viruses, or to alleviate problems caused by security breaches or viruses. Any cyber attack or other security breach involving the misappropriation, loss or other unauthorized disclosure of confidential customer information could severely damage our reputation, erode confidence in the security of our systems, products and services, expose us to the risk of litigation and liability, disrupt our operations and have a material adverse effect on our business.

In addition, we interact with and rely on financial counterparties for whom we process transactions and who process transactions for us and rely on other third parties, as discussed above. Each of these third parties may be targets of the same types of fraudulent activity, computer break-ins, and other cyber security breaches described above. The cyber security measures that they maintain to mitigate the risk of such activity may be different from our own and, in many cases, we do not have any control over the types of security measures they may choose to implement. We may also incur costs as a result of data or security breaches of third parties with whom we do not have a significant direct relationship. As a result of financial entities and technology systems becoming more interdependent and complex, a cyber incident, information breach or loss, or technology failure that compromises the systems or data of one or more financial entities could have a material impact on counterparties or other market participants, including us.

Concerns regarding the effectiveness of our measures to safeguard personal information, or even the perception that such measures are inadequate, could cause us to lose customers or potential customers for our products and services and thereby reduce our revenues.

We have taken measures to implement safeguards to support our operations, but our ability to conduct business may be adversely affected by any significant disruptions to us or to third parties with whom we interact. We have a comprehensive set of information security policies and protocols and a dedicated information security division that reports to the Chief Information Officer, with oversight by the Chief Risk Officer and the Risk Committee of the Board of Directors. The Risk Committee receives regular reporting related to information security risks and the monitoring and management of those risks.

Failure to keep pace with technological changes could have a material adverse impact on our ability to compete for loans and deposits, and therefore on our financial condition and results of operations.

Financial products and services have become increasingly technology driven. Our ability to meet the needs of our customers competitively, and in a cost-efficient manner, is dependent on our ability to keep pace with and pro-actively and quickly respond to technological advances and to invest in new technology as it becomes available. Many of our larger competitors have greater resources to invest in technology than we do and may be better equipped to market new technology-driven products and services. The widespread adoption of new technologies, including, but not limited to, digitally-enabled products and delivery channels and payment systems, could require us to incur substantial expenditures to modify or adapt our existing products and services. Our failure to respond to the impact of technological change could have a material adverse impact on our business and results of operations.

The soundness of other financial institutions, particularly our financial institution counterparties, could adversely affect us.

Our ability to engage in routine funding and other transactions could be adversely affected by the stability and actions of other financial services institutions. Financial services institutions are interrelated as a result of trading, clearing, servicing, counterparty, and other relationships. We have exposure to an increasing number of financial institutions and counterparties. These counterparties include institutions that may be exposed to various risks over which we have little or no control.

Adverse developments affecting the overall strength and soundness of the financial services industry as a whole and third parties with whom we have important relationships could have a negative impact on our business even if we are not subject to the same adverse developments.

Reputational risks could affect our results.

Our ability to originate new business and maintain existing customer relationships is highly dependent upon customer and other external perceptions of our business practices. Adverse perceptions regarding our business practices could damage our reputation in the customer, funding and capital markets, leading to difficulties in generating and maintaining accounts as well as in financing them. Negative public opinion can result from our actual or alleged conduct in any number of activities, including lending practices, employee relations, corporate governance and acquisitions and from actions taken by government regulators and community organizations in response to those activities. Adverse developments with respect to external perceptions regarding the practices of our competitors, or our industry as a whole, or the general economic climate may also adversely impact our reputation. These perceptions about us could cause our business to be negatively affected and exacerbate the other risks that we face. In addition, adverse reputational impacts on third parties with whom we have important relationships may adversely impact our reputation. Adverse reputational impacts or events may also increase our litigation risk. We carefully monitor internal and external developments for areas of potential reputational risk and have established governance structures to assist in evaluating such risks in our business practices and decisions.

Risks Relating to the Regulation of Our Industry

We operate in a highly regulated environment and the laws and regulations that govern our operations, corporate governance, executive compensation and accounting principles, or changes in them, or our failure to comply with them, may adversely affect us.

We are subject to extensive regulation, supervision, and legal requirements that govern almost all aspects of our operations, see Item 1 "Business—Regulation and Supervision." Intended to protect customers, depositors, the DIF, and the overall financial stability of the United States, these laws and regulations, among other matters, prescribe minimum capital requirements, impose limitations on the business activities in which we can engage, limit the dividend or distributions that BankUnited can pay to BankUnited, Inc., restrict the ability of institutions to guarantee our debt, and impose specific accounting requirements on us. Banking regulators may also from time to time focus on issues that may impact the pace of growth of our business and operations, such as commercial real estate lending concentrations. Compliance with laws and regulations can be difficult and costly, and changes to laws and regulations often impose additional compliance costs. In addition, federal banking agencies, including the OCC and Federal Reserve Board, periodically conduct examinations of our business, including compliance with laws and regulations. Our failure to comply with these laws and regulations, even if the failure follows good faith effort or reflects a difference in interpretation, could subject us to restrictions on our business activities, fines, remedial actions, administrative orders and other penalties, any of which could adversely affect our results of operations and capital base.

Further, federal, state and local legislators and regulators regularly introduce measures or take actions that would modify the regulatory requirements applicable to banks, their holding companies and other financial institutions. Changes in laws, regulations or regulatory policies could adversely affect the operating environment for the Company in substantial and unpredictable ways, increase our cost of doing business, impose new restrictions on the way in which we conduct our operations or add significant operational constraints that might impair our profitability. We cannot predict whether new legislation will be enacted and, if enacted, the effect that it, or any implementing regulations, would have on our business, financial condition or results of operations.

Our ability to expand through acquisition or de novo branching requires regulatory approvals, and failure to obtain them may restrict our growth.

We may identify opportunities to complement and expand our business by pursuing strategic acquisitions of financial institutions and other complementary businesses. We must generally receive federal regulatory approval before we can acquire an institution or business. In determining whether to approve a proposed acquisition, federal banking regulators will consider, among other factors, the effect of the acquisition on competition, our financial condition, our future prospects, and the impact of the proposal on U.S. financial stability. The regulators also review current and projected capital ratios and levels, the competence, experience, and integrity of management and its record of compliance with laws and regulations, the convenience and needs of the communities to be served (including the acquiring institution's record of compliance under the CRA) and the effectiveness of the acquiring institution in combating money laundering activities. Such regulatory approvals may not be granted on terms that are acceptable to us, or at all. We may also be required to sell or close branches as a condition to receiving regulatory approval, which condition may not be acceptable to us or, if acceptable to us, may reduce the benefit of any acquisition.

In addition to the acquisition of existing financial institutions, as opportunities arise, we may continue *de novo* branching as a part of our internal growth strategy and possibly enter into new markets through *de novo* branching. *De novo* branching and any acquisition carries with it numerous risks, including the inability to obtain all required regulatory approvals. The failure to obtain these regulatory approvals for potential future strategic acquisitions and *de novo* branches may impact our business plans and restrict our growth.

Financial institutions, such as BankUnited, face a risk of noncompliance and enforcement action with the Bank Secrecy Act and other anti-money laundering statutes and regulations.

The Bank Secrecy Act, the USA PATRIOT Act, and other laws and regulations require financial institutions, among other duties, to institute and maintain an effective anti-money laundering program and file suspicious activity and currency transaction reports as appropriate. The Financial Crimes Enforcement Network, established by the U.S. Treasury Department to administer the Bank Secrecy Act, is authorized to impose significant civil money penalties for violations of those requirements, and has engaged in coordinated enforcement efforts with the individual federal banking regulators, as well as the U.S. Department of Justice, Drug Enforcement Administration, and Internal Revenue Service. There is also increased scrutiny of compliance with the sanctions programs and rules administered and enforced by the U.S. Treasury Department's Office of Foreign Assets Control.

In order to comply with regulations, guidelines and examination procedures in this area, we dedicate significant resources to the ongoing execution of our anti-money laundering program, continuously monitor and enhance as necessary our policies and procedures and maintain a robust automated anti-money laundering software solution. If our policies, procedures and systems are deemed deficient or the policies, procedures and systems of financial institutions that we may acquire in the future are deemed deficient, we could be subject to liability, including fines and regulatory actions such as restrictions on our ability to pay dividends and the necessity to obtain regulatory approvals to proceed with certain aspects of our business plan, including our expansion plans.

We are subject to the CRA and fair lending laws, and failure to comply with these laws could lead to material penalties.

The CRA, the Equal Credit Opportunity Act, the Fair Housing Act and other fair lending laws and regulations impose nondiscriminatory lending requirements on financial institutions. The Department of Justice and other federal agencies are responsible for enforcing these laws and regulations. A successful challenge to an institution's performance under the CRA or fair lending laws and regulations could result in a wide variety of sanctions, including the required payment of damages and civil money penalties, injunctive relief, imposition of restrictions on mergers and acquisitions activity, and restrictions on expansion activity. Private parties may also have the ability to challenge an institution's performance under fair lending laws in private class action litigation.

The FDIC's restoration plan and any future related increased assessments could adversely affect our earnings.

Insured depository institutions such as BankUnited are required to pay deposit insurance premiums to the FDIC. If the current level of deposit premiums is insufficient for the DIF to meet its funding requirements in the future, special assessments or increases in deposit insurance premiums may be required. A change in BankUnited's risk classification within the FDICs' risk-based assessment framework could also result in increased deposit insurance premiums. We are generally unable to control the amount of premiums that we are required to pay for FDIC insurance. If there are additional bank or financial institution failures in the future, we may be required to pay FDIC premiums higher than current levels. Any future additional assessments or increases in FDIC insurance premiums may adversely affect our results of operations.

We are subject to laws regarding the privacy, information security and protection of personal information and any violation of these laws or another incident involving personal, confidential or proprietary information of individuals could damage our reputation and otherwise adversely affect our operations and financial condition.

Our business requires the collection and retention of large volumes of customer data, including personally identifiable information in various information systems that we maintain and in those maintained by third parties with whom we contract to provide data services. We are subject to complex and evolving laws and regulations governing the privacy and protection of personal information of individuals (including customers, employees, suppliers and other third parties). For example, our business is subject to the Gramm-Leach-Bliley Act which, among other things: (i) imposes certain limitations on our ability to share nonpublic personal information about our customers with nonaffiliated third parties; (ii) requires that we provide certain disclosures to customers about our information collection, sharing and security practices and afford customers the right to "opt out" of any information sharing by us with nonaffiliated third parties (with certain exceptions); and (iii) requires that we develop, implement and maintain a written comprehensive information security program containing appropriate safeguards based on our size and complexity, the nature and scope of our activities, and the sensitivity of customer information we process, as well as plans for responding to data security breaches. Various state and federal banking regulators and states have also enacted data security breach notification requirements with varying levels of individual, consumer, regulatory or law enforcement notification in certain circumstances in the event of a security breach. Ensuring that our collection, use, transfer and storage of personal information complies with all applicable laws and regulations can increase our costs. Furthermore, we may not be able to ensure that all of our customers, suppliers, counterparties and other third parties have appropriate controls in place to protect the confidentiality of the information that they exchange with us, particularly where such information is transmitted by electronic means. If personal, confidential or proprietary information of customers or others were to be mishandled or misused, we could be exposed to litigation or regulatory sanctions under personal information laws and regulations. Any failure or perceived failure to comply with applicable privacy or data protection laws and regulations may subject us to inquiries, examinations and investigations that could result in requirements to modify or cease certain operations or practices or in significant liabilities, fines or penalties, and could damage our reputation and otherwise adversely affect our operations and financial condition.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

BankUnited's corporate headquarters is located in Miami Lakes, Florida. The headquarters space is used for office and operations. At December 31, 2018, we provided banking services at 85 branches located in Florida and New York. In Florida, we had 80 branch locations in 14 Florida counties. Of the 80 Florida branch properties, we leased 77 locations and owned 3 branch locations. In New York, we leased 5 branch locations, including 3 branch locations in New York City, 1 branch location in Brooklyn and 1 branch location in Melville. We also leased office space in Florida at 7 locations excluding the corporate headquarters and in New York at 5 locations.

For our two commercial lending subsidiaries, we had leased office and operations space in Hunt Valley, Maryland to house Bridge Funding Group and operations space in Scottsdale, Arizona to house Pinnacle.

We believe that our facilities are in good condition and are adequate to meet our operating needs for the foreseeable future.

Item 3. Legal Proceedings

The Company is involved as plaintiff or defendant in various legal actions arising in the normal course of business. In the opinion of management, based upon advice of legal counsel, the likelihood is remote that the impact of these proceedings, either individually or in the aggregate, would be material to the Company's consolidated financial position, results of operations or cash flows.

Item 4. Mine Safety Disclosures

None.

PART II - FINANCIAL INFORMATION

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Market Information and Holders of Record

Shares of our common stock trade on the NYSE under the symbol "BKU". The last sale price of our common stock on the NYSE on February 25, 2019 was \$36.73 per share. As of February 25, 2019, there were 565 stockholders of record of our common stock.

Equity Compensation Plan Information

The information set forth under the caption "Equity Compensation Plan Information" in our definitive proxy statement for the Company's 2019 annual meeting of stockholders (the "Proxy Statement") is incorporated herein by reference.

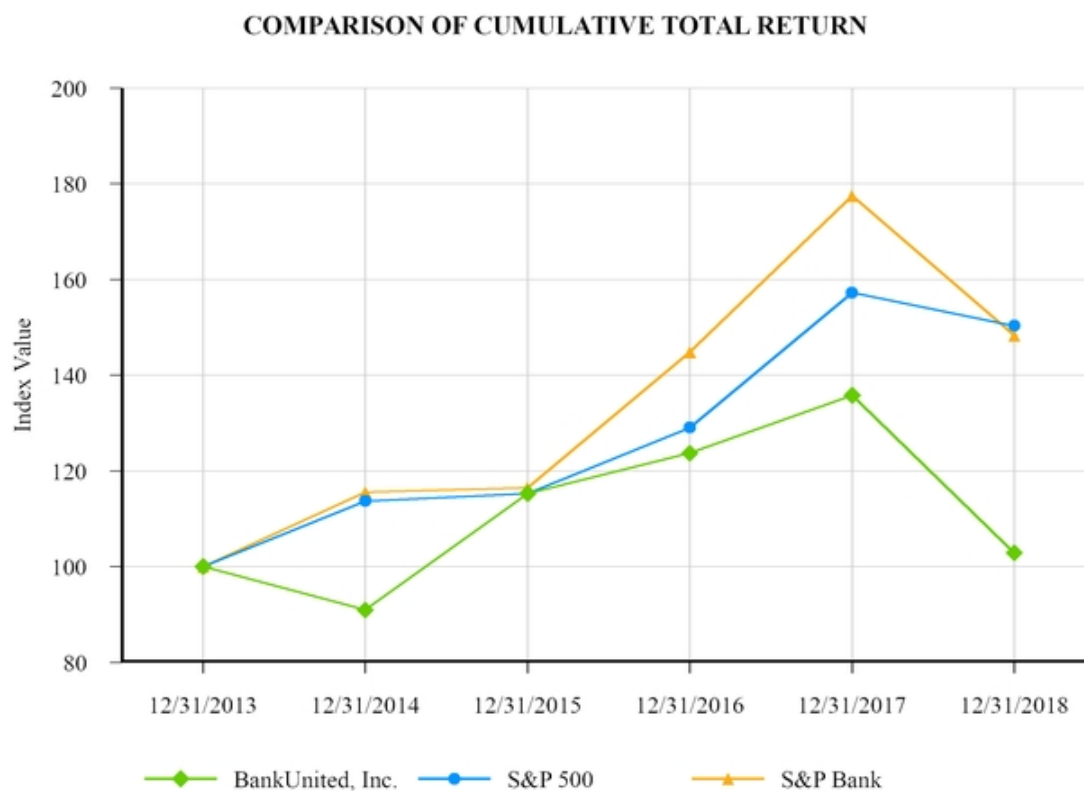

Dividend Policy

The Company declared a quarterly dividend of \$0.21 per share on its common stock for each of the four quarters of 2018 and 2017, resulting in total dividends for 2018 and 2017 of \$89.9 million and \$92.2 million, respectively, or \$0.84 per common share for each of the years ended December 31, 2018 and 2017. Dividends from the Bank are the principal source of funds for the payment of dividends on our common stock. The Bank is subject to certain restrictions that may limit its ability to pay dividends to us. See "Business—Regulation and Supervision—Regulatory Limits on Dividends and Distributions". The quarterly dividends on our common stock are subject to the discretion of our board of directors and dependent on, among other things, our financial condition, results of operations, capital requirements, restrictions contained in financing instruments and other factors that our board of directors may deem relevant.

Stock Performance Graph

The graph set forth below compares the cumulative total stockholder return on an initial investment of \$100 in our common stock between December 31, 2013 and December 31, 2018, with the comparative cumulative total return of such amount on the S&P 500 Index and the S&P 500 Bank Index over the same period. Reinvestment of all dividends is assumed to have been made in our common stock.

The comparisons shown in the graph below are based upon historical data. We caution that the stock price performance shown in the graph below is not necessarily indicative of, nor is it intended to forecast, the potential future performance of our common stock.

<i>Index</i>	12/31/2013	12/31/2014	12/31/2015	12/31/2016	12/31/2017	12/31/2018
BankUnited, Inc.	100.00	90.94	115.28	123.70	135.79	102.88
S&P 500	100.00	113.69	115.26	129.05	157.22	150.33
S&P Bank	100.00	115.51	116.49	144.81	177.47	148.30

Recent Sales of Unregistered Securities

Purchases of Equity Securities by the Issuer and Affiliated Purchasers

Period	Issuer Purchases of Equity Securities			
	Total number of shares purchased ⁽¹⁾	Average price paid per share	Total number of shares purchased as part of publicly announced plans or programs	Maximum number (or approximate dollar value) of shares that may yet be purchased under the plans or programs ⁽²⁾
October 1 – October 31, 2018	724,190	\$ 32.61	724,190	\$ 126,382,321
November 1 – November 30, 2018	2,259,462	33.81	2,259,462	\$ 50,000,002
December 1 – December 31, 2018	1,682,379	29.7	1,682,379	\$ 27,395
Total	4,666,031	\$ 32.14	4,666,031	

(1) The total number of shares purchased during the periods indicated includes shares purchased as part of a publicly announced program.

(2) On October 23, 2018, the Company's Board of Directors authorized a now completed share repurchase program under which the Company repurchased \$150 million of its outstanding common stock

Item 6. Selected Consolidated Financial Data

You should read the selected consolidated financial data set forth below in conjunction with "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations," and the audited consolidated financial statements and the related notes thereto included elsewhere in this Form 10-K. The selected consolidated financial data set forth below is derived from our audited consolidated financial statements.

(1) Includes discrete income tax benefits of \$327.9 million and \$49.3 million recognized during the years ended December 31, 2017 and 2015, respectively.

(2) On a tax-equivalent basis, at a federal income tax rate of 21% for 2018 and 35% for years 2017, 2016, 2015 and 2014.

(3) Total loans include premiums, discounts, deferred fees and costs and loans held for sale.

(4) We define non-performing loans to include non-accrual loans, and loans, other than ACI loans and government insured residential loans, that are past due 90 days or more and still accruing. Contractually delinquent ACI loans on which interest continues to be accreted are excluded from non-performing loans.

(5) Non-performing assets include non-performing loans, OREO and other repossessed assets.

(6) Ratio for non-covered assets is calculated as non-performing non-covered assets to total assets.

(7) The ratio of charge-offs of taxi medallion loans to average total loans was 0.18%, 0.28% and 0.06% for the years ended December 31, 2018, 2017 and 2016, respectively.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis is intended to assist readers in understanding the consolidated financial condition and results of operations of BankUnited, Inc. and its subsidiary (the "Company", "we", "us" and "our") and should be read in conjunction with the consolidated financial statements, accompanying footnotes and supplemental financial data included herein. In addition to historical information, this discussion contains forward-looking statements that involve risks, uncertainties and assumptions that could cause actual results to differ materially from management's expectations. Factors that could cause such differences are discussed in the sections entitled "Forward-looking Statements" and "Risk Factors." We assume no obligation to update any of these forward-looking statements.

Overview

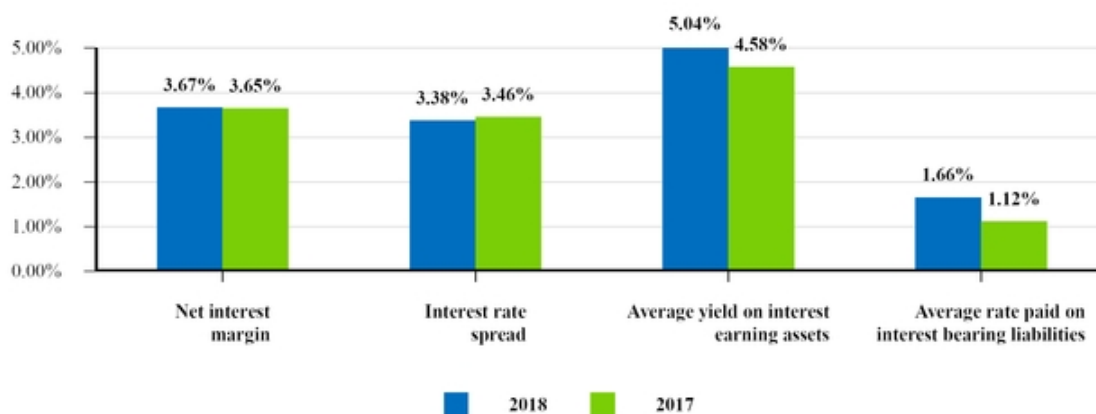

Performance Highlights

In evaluating our financial performance, we consider the level of and trends in net interest income, the net interest margin, levels and composition of non-interest income and non-interest expense, performance ratios such as the return on average equity and return on average assets and asset quality ratios, including the ratio of non-performing loans to total loans, non-performing assets to total assets, and portfolio delinquency and charge-off trends. We consider growth in earning assets and deposits, trends in funding mix and cost of funds. We analyze these ratios and trends against our own historical performance, our budgeted performance and the financial condition and performance of comparable financial institutions.

Performance highlights include:

- Net income for the year ended December 31, 2018 was \$324.9 million, or \$2.99 per diluted share, compared to \$614.3 million, or \$5.58 per diluted share, for the year ended December 31, 2017. Excluding the impact of a discrete income tax benefit and professional fees, net income was \$291.3 million or \$2.65 per diluted share for the year ended December 31, 2017. Earnings for the year ended December 31, 2018 generated a return on average stockholders' equity of 10.57% and a return on average assets of 1.05%.
- Net interest income for the year ended December 31, 2018 was \$1.1 billion, an increase of \$99.8 million over the prior year. The net interest margin, calculated on a tax-equivalent basis, was 3.67% for the year ended December 31, 2018 compared to 3.65% for the year ended December 31, 2017. Significant factors contributing to the increase in the net interest margin included increases in accretion on covered loans and in yields on other categories of interest earning assets, offset by an increase in the cost of interest bearing liabilities and the impact on tax equivalent yields of the reduction in the statutory federal income tax rate. See "Results of Operations" below for further discussion.

The following chart provides a comparison of net interest margin, the interest rate spread, the average yield on interest earning assets and the average rate paid on interest bearing liabilities for the years ended December 31, 2018 and 2017 (on a tax equivalent basis):

- Total deposits increased by \$1.6 billion for the year ended December 31, 2018, of which \$550 million was non-interest bearing demand deposits, representing an 18% increase over the prior year-end. The average cost of total deposits increased to 1.28% for the year ended December 31, 2018 from 0.83% for 2017. The following charts illustrate the composition of deposits at December 31, 2018 and 2017:

- Non-covered loans and leases, including equipment under operating lease, grew by \$965 million to \$22.5 billion for the year ended December 31, 2018 compared to \$21.5 billion at December 31, 2017. During the year ended December 31, 2018, commercial loans grew by \$311 million; equipment under operating lease grew by \$103 million; and non-covered residential and other consumer loans grew by \$552 million. The following charts compare the composition of our loan and lease portfolio at December 31, 2018 and 2017:

- Asset quality remained strong. At December 31, 2018, 98.2% of the commercial loan portfolio was rated "pass" and 99.5% of the 1-4 single family residential portfolio, excluding government insured residential loans, was current. The ratio of non-performing loans to total loans was 0.59% and the ratio of non-performing assets to total assets was 0.43% at December 31, 2018. Our nonperforming assets ratio at December 31, 2018, 2017 and 2016 is presented in the chart below:

- During the year ended December 31, 2018, the Company repurchased approximately 8.4 million shares of its common stock for an aggregate purchase price of \$300 million.
- The Bank executed a final sale of covered loans and OREO pursuant to the terms of the Single Family Shared-Loss Agreement in the fourth quarter of 2018. See the section entitled "Results of Operations" below for further information. The Single Family Shared-Loss Agreement was terminated on February 13, 2019.
- During the quarter ended December 31, 2018, the Bank sold substantially all of its taxi medallion finance loans.
- Book value per common share grew to \$29.49 at December 31, 2018 from \$28.32 at December 31, 2017. Tangible book value per common share increased to \$28.71 from \$27.59 over the same period.
- The Company's and the Bank's capital ratios exceeded all regulatory "well capitalized" guidelines. The charts below present the Company's and the Bank's regulatory capital ratios compared to regulatory guidelines as of December 31, 2018 and 2017:

BankUnited, Inc:

- The operating agreement between the Bank and the OCC was terminated in November 2018.

Strategic Priorities

Management has identified the following strategic priorities for our Company:

- Our strategy emphasizes safety and soundness, long-term profitability and sustainable growth.
- Optimization of the deposit mix, emphasizing growth in non-interest bearing demand deposits.
- Continued organic growth in Florida and the Tri-State markets, both of which we believe to be attractive banking markets, as well as across our national lending and deposit platforms.
- Maintaining a culture of disciplined credit underwriting.
- Focus on expense management and a scalable and efficient operating model.
- Identifying opportunities to augment revenue consistent with our commercial and small business focus.
- Strategic technology investments that enhance delivery of products and services to our customers as well as our supporting infrastructure.
- Opportunistic evaluation of potential strategic acquisitions.

Challenges confronting our Company include:

- While most economic indicators remain favorable, uncertainty about future economic conditions as we move through the credit cycle may present challenges to our business strategy.
- Competitive market conditions for both loans and deposits may impact our ability to execute our balance sheet growth and profitability strategy.
- Managing the cost of funds while growing deposits in a volatile or uncertain interest rate environment presents a strategic challenge.
- The current flat yield curve may pressure our net interest margin.

Critical Accounting Policies and Estimates

Our consolidated financial statements are prepared in accordance with GAAP and follow general practices within the banking industry. Application of these principles requires management to make complex and subjective estimates and judgments that affect the amounts reported in the consolidated financial statements and accompanying notes. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable and appropriate under current circumstances. These assumptions form the basis for our judgments about the carrying values of assets and liabilities

that are not readily available from independent, objective sources. We evaluate our estimates on an ongoing basis. Use of alternative assumptions may have resulted in significantly different estimates. Actual results may differ from these estimates.

Accounting policies are an integral part of our financial statements. A thorough understanding of these accounting policies is essential when reviewing our reported results of operations and our financial position. We believe that the critical accounting policies and estimates discussed below involve a heightened level of management judgment due to the complexity, subjectivity and sensitivity involved in their application.

Note 1 to the consolidated financial statements contains a further discussion of our significant accounting policies.

Allowance for Loan and Lease Losses

The ALLL represents management's estimate of probable loan losses inherent in the Company's loan portfolio. Determining the amount of the ALLL is considered a critical accounting estimate because of its complexity and because it requires significant judgment and estimation. Estimates that are particularly susceptible to change that may have a material impact on the amount of the ALLL include:

- the selection of proxy data used to calculate quantitative loss factors for portfolio segments that have not yet exhibited an observable loss trend;
- our evaluation of loss emergence and historical loss experience periods;
- our evaluation of the risk profile of various loan portfolio segments, including internal risk ratings;
- the value of underlying collateral, which may impact loss severity and certain cash flow assumptions for impaired, criticized and classified loans;
- our selection and evaluation of qualitative factors; and
- the amount and timing of expected future cash flows from ACI loans and impaired loans.

Note 1 to the consolidated financial statements describes the methodology used to determine the ALLL.

Accounting for ACI Loans and the FDIC Indemnification Asset

The accounting for ACI loans requires the Company to estimate the timing and amount of cash flows to be collected from these loans and to continually update estimates of the cash flows expected to be collected over the lives of the loans. Similarly, the accounting for the FDIC indemnification asset requires the Company to estimate the timing and amount of cash flows to be received from the FDIC in reimbursement for losses and expenses related to the covered loans; these estimates are directly related to estimates of cash flows to be received from the covered loans. Estimated cash flows impact the rate of accretion on ACI loans and the rate of amortization on the FDIC indemnification asset as well as the amount of any ALLL to be established related to ACI loans. These cash flow estimates are considered to be critical accounting estimates because they involve significant judgment and assumptions as to their amount and timing. In conjunction with the final sale of covered loans pursuant to the terms of the Single Family Shared-Loss Agreement, the FDIC indemnification asset was amortized to zero as of December 31, 2018 as expectations of losses eligible for indemnification with respect to any retained loans prior to final termination of the Single Family Shared-Loss Agreement were insignificant. The Single Family Shared-Loss Agreement was terminated in February 2019.

Acquired 1-4 single family residential and home equity loans were placed into homogenous pools for purposes of accounting and estimation of expected cash flows at the time of the FSB Acquisition. At acquisition, the fair value of the pools was measured based on the expected cash flows to be derived from each pool. For ACI pools, the difference between total contractual payments due and the cash flows expected to be received at acquisition was recognized as non-accretable difference. The excess of expected cash flows over the recorded fair value of each ACI pool at acquisition was recognized as accretable yield to be accreted into interest income over the expected life of each pool.

We monitor the pools quarterly by updating our expected cash flows to determine whether any changes have occurred in expected cash flows that would be indicative of impairment or necessitate reclassification between non-accretable difference and accretable yield. Initial and ongoing cash flow expectations incorporate significant assumptions regarding prepayment rates, the timing of resolution of loans, the timing and amount of loan sales and related pricing, frequency of default, delinquency and loss severity, which is dependent on estimates of underlying collateral values. These assumptions have a material impact on the amount of the ALLL related to the ACI loans as well as on the rate of accretion on these loans and the corresponding rate of amortization of the FDIC indemnification asset.

Fair Value Measurements

The Company measures certain of its assets and liabilities at fair value on a recurring or non-recurring basis. Assets and liabilities measured at fair value on a recurring basis include investment securities available for sale, marketable equity securities, servicing rights, and derivative instruments. Assets that may be measured at fair value on a non-recurring basis include impaired loans, OREO and other repossessed assets, loans held for sale, goodwill, and impaired long-lived assets. The consolidated financial statements also include disclosures about the fair value of financial instruments that are not recorded at fair value.

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants at the measurement date. Inputs used to determine fair value measurements are prioritized into a three level hierarchy based on observability and transparency of the inputs, summarized as follows:

Level 1—observable inputs that reflect quoted prices in active markets for identical assets,

Level 2—inputs other than quoted prices in active markets that are based on observable market data, and

Level 3—unobservable inputs requiring significant management judgment or estimation.

When observable market quotes are not available, fair value is estimated using modeling techniques such as discounted cash flow analyses and option pricing models. These modeling techniques utilize assumptions that we believe market participants would use in pricing the asset or the liability.

Particularly for estimated fair values of assets and liabilities categorized within level 3 of the fair value hierarchy, the selection of different valuation techniques or underlying assumptions could result in fair value estimates that are higher or lower than the amounts recorded or disclosed in our consolidated financial statements. Considerable judgment may be involved in determining the amount that is most representative of fair value.

Because of the degree of judgment involved in selecting valuation techniques and underlying assumptions, fair value measurements are considered critical accounting estimates.

Notes 1, 3, 11 and 15 to our consolidated financial statements contain further information about fair value estimates.

Recent Accounting Pronouncements

See Note 1 to our consolidated financial statements for a discussion of recent accounting pronouncements.

Results of Operations

Net Interest Income

Net interest income is the difference between interest earned on interest earning assets and interest incurred on interest bearing liabilities and is the primary driver of core earnings. Net interest income is impacted by the relative mix of interest earning assets and interest bearing liabilities, the ratio of interest earning assets to total assets and of interest bearing liabilities to total funding sources, movements in market interest rates, the shape of the yield curve, levels of non-performing assets and pricing pressure from competitors.

The mix of interest earning assets is influenced by loan demand, market and competitive conditions in our primary lending markets and by management's continual assessment of the rate of return and relative risk associated with various classes of earning assets. The mix of interest bearing liabilities is influenced by the Company's liquidity profile, management's assessment of the desire for lower cost funding sources weighed against relationships with customers and growth expectations and is impacted by competition for deposits in the Company's markets and the availability and pricing of other sources of funds.

Net interest income is also impacted by the accounting for ACI loans acquired in conjunction with the FSB Acquisition. ACI loans were initially recorded at fair value, measured based on the present value of expected cash flows. The excess of expected cash flows over carrying value, known as accretable yield, is recognized as interest income over the lives of the underlying loans.

The impact of ACI loan accounting on net interest income makes it difficult to compare our net interest margin and interest rate spread to those reported by other financial institutions.

The following table presents, for the years ended December 31, 2018, 2017 and 2016, information about (i) average balances, the total dollar amount of taxable equivalent interest income from earning assets and the resultant average yields; (ii) average balances, the total dollar amount of interest expense on interest bearing liabilities and the resultant average rates; (iii) net interest income; (iv) the interest rate spread; and (v) the net interest margin. Non-accrual and restructured loans are included in the average balances presented in this table; however, interest income foregone on non-accrual loans is not included. Interest income, yields, spread and margin have been calculated on a tax-equivalent basis for loans and investment securities that are exempt from federal income taxes, at a federal tax rate of 21% during the year ended December 31, 2018 and 35% during the years ended December 31, 2017 and 2016 (dollars in thousands):

Net interest margin			<u>3.67%</u>			<u>3.65%</u>			<u>3.73%</u>

(1) On a tax-equivalent basis where applicable. The tax-equivalent adjustment for tax-exempt loans was \$17.5 million, \$29.4 million and \$23 million, and the tax-equivalent adjustment for tax-exempt investment securities was \$5.5 million, \$13.1 million and \$10.5 million for the years ended December 31, 2018, 2017 and 2016, respectively.

(2) At fair value except for securities held to maturity.

The TCJA was signed into law in 2017, reducing the statutory corporate federal income tax rate from 35% to 21%, effective January 1, 2018. For the year ended December 31, 2018 as compared to the year ended December 31, 2017, the tax rate change negatively impacted net interest margin by approximately 0.08%.

Increases and decreases in interest income, calculated on a tax-equivalent basis, and interest expense result from changes in average balances (volume) of interest earning assets and liabilities, as well as changes in average interest rates. The following table shows the effect that these factors had on the interest earned on our interest earning assets and the interest incurred on our interest bearing liabilities for the years indicated. The effect of changes in volume is determined by multiplying the change in volume by the previous year's average rate. Similarly, the effect of rate changes is calculated by multiplying the change in average rate by the previous year's volume. Changes applicable to both volume and rate have been allocated to volume (in thousands):

	2018 Compared to 2017			2017 Compared to 2016		
	Change Due to Volume	Change Due to Rate	Increase (Decrease)	Change Due to Volume	Change Due to Rate	Increase (Decrease)
Interest Income Attributable to:						
Loans	\$ 88,401	\$ 96,107	\$ 184,508	\$ 104,562	\$ 7,202	\$ 111,764
Investment securities	15,267	21,972	37,239	29,733	10,245	39,978
Other interest earning assets	(1,316)	4,836	3,520	29	2,059	2,088
Total interest income	102,352	122,915	225,267	134,324	19,506	153,830
Interest Expense Attributable to:						
Interest bearing demand deposits	442	5,076	5,518	1,626	2,904	4,530
Savings and money market deposits	12,411	53,516	65,927	11,064	17,559	28,623
Time deposits	9,276	32,909	42,185	10,017	7,990	18,007
Total interest bearing deposits	22,129	91,501	113,630	22,707	28,453	51,160
Federal funds purchased	1,035	—	1,035	—	—	—
FHLB advances	(4,824)	35,062	30,238	779	13,444	14,223
Notes and other borrowings	—	(40)	(40)	(28)	—	(28)
Total interest expense	18,340	126,523	144,863	23,458	41,897	65,355
Increase (decrease) in net interest income	\$ 84,012	\$ (3,608)	\$ 80,404	\$ 110,866	\$ (22,391)	\$ 88,475

Year ended December 31, 2018 compared to year ended December 31, 2017

Net interest income, calculated on a tax-equivalent basis, was \$1.1 billion for the year ended December 31, 2018 compared to \$992.7 million for the year ended December 31, 2017, an increase of \$80.4 million. The increase in net interest income was comprised of an increase in tax-equivalent interest income of \$225.3 million, offset by an increase in interest expense of \$144.9 million.

The increase in tax-equivalent interest income was comprised primarily of a \$184.5 million increase in interest income from loans and an \$37.2 million increase in interest income from investment securities.

Increased interest income from loans was attributable to a \$1.6 billion increase in the average balance and a 0.48% increase in the tax-equivalent yield to 5.63% for the year ended December 31, 2018 from 5.15% for the year ended December 31, 2017. Offsetting factors contributing to the increase in the yield on loans included:

- The tax-equivalent yield on non-covered loans increased to 4.00% for the year ended December 31, 2018 from 3.75% for the year ended December 31, 2017. The most significant factor contributing to the increased yield on non-covered loans was an increase in benchmark interest rates, partially offset by the impact of the decline in the statutory federal income tax rate.
- Interest income on covered loans totaled \$368.2 million and \$300.5 million for the year ended December 31, 2018 and 2017, respectively. The yield on those loans increased to 86.13% for the year ended December 31, 2018 from 55.22% for the year ended December 31, 2017, reflecting additional accretion related to acceleration of the timing of the final covered loan sale that occurred in the fourth quarter of 2018. This acceleration resulted from changes in both the expected timing of cash flows from the final loan sale and in the estimated selling price of loans included in the sale compared to assumptions previously modeled.

- The impact on the overall yield on loans of increased yields on both covered and non-covered loans considered individually was partially offset by the continued increase in lower-yielding non-covered loans as a percentage of the portfolio. Non-covered loans represented 98.00% of the average balance of loans outstanding for the year ended December 31, 2018 compared to 97.30% for the year ended December 31, 2017.
- The reduction of the statutory corporate federal income tax rate from 35% to 21%, effective January 1, 2018, negatively impacted tax-equivalent yields on non-covered loans by approximately 0.09% for the year ended December 31, 2018.

The average balance of investment securities increased by \$466 million for the year ended December 31, 2018 from the year ended December 31, 2017, while the tax-equivalent yield increased to 3.35% from 3.02%. The increase in tax-equivalent yield primarily reflects changes in portfolio composition to securities with higher tax-equivalent yields and resetting of coupon rates on floating-rate securities, partially offset by the reduction of the statutory corporate federal income tax rate discussed above.

The primary components of the increase in interest expense for the year ended December 31, 2018 as compared to the year ended December 31, 2017 were a \$113.6 million increase in interest expense on deposits and a \$30.2 million increase in interest expense on FHLB advances.

The increase in interest expense on deposits was attributable to an increase of \$1.5 billion in average interest bearing deposits and an increase in the average cost of interest bearing deposits of 0.53% to 1.51% for the year ended December 31, 2018 from 0.98% for the year ended December 31, 2017. This cost increase was driven by the growth of deposits in competitive markets and a rising short-term interest rate environment.

The increase in interest expense on FHLB advances was primarily a result of an increase in the average cost of advances of 0.72% to 1.99% for the year ended December 31, 2018 from 1.27% for the year ended December 31, 2017. The increased cost was driven by increased market rates and an extension of maturities through interest rate swaps.

The net interest margin, calculated on a tax-equivalent basis, for the year ended December 31, 2018 was 3.67% as compared to 3.65% for the year ended December 31, 2017. The interest rate spread decreased to 3.38% for the year ended December 31, 2018 from 3.46% for the year ended December 31, 2017. The increase in net interest margin is primarily attributed to the accelerated accretion related to the final covered loan sale discussed above.

Year ended December 31, 2017 compared to year ended December 31, 2016

Net interest income, calculated on a tax-equivalent basis, was \$992.7 million for the year ended December 31, 2017 compared to \$904.2 million for the year ended December 31, 2016, an increase of \$88.5 million. The increase in net interest income was comprised of an increase in tax-equivalent interest income of \$153.8 million, offset by an increase in interest expense of \$65.4 million.

The increase in tax-equivalent interest income was comprised primarily of a \$111.8 million increase in interest income from loans and a \$40.0 million increase in interest income from investment securities.

Increased interest income from loans was attributable to a \$2.0 billion increase in the average balance and a 0.04% increase in the tax-equivalent yield to 5.15% for the year ended December 31, 2017 from 5.11% for the year ended December 31, 2016. Offsetting factors contributing to the increase in the yield on loans included:

- The tax-equivalent yield on non-covered loans increased to 3.75% for the year ended December 31, 2017 from 3.58% for the year ended December 31, 2016. The most significant factor contributing to the increased yield on non-covered loans was increases in market interest rates.
- Interest income on covered loans totaled \$300.5 million and \$301.6 million for the year ended December 31, 2017 and 2016, respectively. The tax-equivalent yield on those loans increased to 55.22% for the year ended December 31, 2017 from 41.82% for the year ended December 31, 2016, reflecting improvements in expected cash flows for ACI loans, as well as an increase in higher-yielding pools as a percent of total covered loans. The increase in yield largely offset the impact of the decline in the average balance of covered loans outstanding.
- The impact on the overall yield on loans of increased yields on both covered and non-covered loans considered individually was largely offset by the continued increase in lower-yielding non-covered loans as a percentage of the portfolio. Non-covered loans represented 97.3% of the average balance of loans outstanding for the year ended December 31, 2017 compared to 96.0% for the year ended December 31, 2016.

The average balance of investment securities increased by \$1.0 billion for the year ended December 31, 2017 from the year ended December 31, 2016 while the tax-equivalent yield increased to 3.02% from 2.84%. The increase in tax-equivalent yield

primarily reflected resetting of coupon rates on floating-rate securities. The tax-equivalent yield was reduced by 5 basis points in 2017 as a result of a retrospective adjustment to the amortization of premiums on SBA securities.

The components of the increase in interest expense for the year ended December 31, 2017 as compared to the year ended December 31, 2016 were a \$51.2 million increase in interest expense on deposits and a \$14.2 million increase in interest expense on FHLB advances.

The increase in interest expense on deposits was attributable to an increase of \$2.3 billion in average interest bearing deposits and an increase in the average cost of interest bearing deposits of 0.19% to 0.98% for the year ended December 31, 2017 from 0.79% for the year ended December 31, 2016. These cost increases were generally driven by the growth of deposits in competitive markets and a rising short-term interest rate environment.

The increase in interest expense on FHLB advances was primarily a result of an increase in the average cost of advances of 0.28% to 1.27% for the year ended December 31, 2017 from 0.99% for the year ended December 31, 2016. The increased cost was driven by increased market rates and, to a lesser extent, an extension of maturities through interest rate swaps.

The net interest margin, calculated on a tax-equivalent basis, for the year ended December 31, 2017 was 3.65% as compared to 3.73% for the year ended December 31, 2016. The interest rate spread decreased to 3.46% for the year ended December 31, 2017 from 3.58% for the year ended December 31, 2016. The declines in net interest margin and interest rate spread resulted primarily from the cost of interest-bearing liabilities increasing by more than the yield on interest earning assets. This difference was driven primarily by the decline in covered loans as a percentage of total loans.

Provision for Loan Losses

The provision for loan losses is the amount of expense that, based on our judgment, is required to maintain the ALLL at an adequate level to absorb probable losses inherent in the loan portfolio at the balance sheet date and that, in management's judgment, is appropriate under GAAP. The determination of the amount of the ALLL is complex and involves a high degree of judgment and subjectivity. Our determination of the amount of the allowance and corresponding provision for loan losses considers ongoing evaluations of the credit quality of and level of credit risk inherent in various segments of the loan portfolio and of individually significant credits, levels of non-performing loans and charge-offs, historical and statistical trends and economic and other relevant factors. See "Analysis of the Allowance for Loan and Lease Losses" below for more information about how we determine the appropriate level of the allowance.

For the years ended December 31, 2018, 2017 and 2016, the Company recorded provisions for loan losses of \$25.9 million, \$68.7 million and \$50.9 million, respectively, substantially all of which related to non-covered loans. The provision for loan losses related to taxi medallion loans totaled \$26.2 million, \$58.2 million and \$11.9 million for the years ended December 31, 2018, 2017 and 2016, respectively. The amount of the provision is impacted by loan growth, portfolio mix, historical loss rates, the level of charge-offs and specific reserves for impaired loans, and management's evaluation of qualitative factors in the determination of general reserves.

Significant factors impacting the decrease in the provision for loan losses related to non-covered loans for the year ended December 31, 2018 compared to 2017 were (i) a decrease in the provision related to taxi medallion loans; (ii) lower loan growth; and (iii) a net decrease in the provision related to certain quantitative and qualitative loss factors; partially offset by (iv) an increase in the provision related to specific reserves for loans other than taxi medallion loans.

The increase in the provision for loan losses related to non-covered loans for the year ended December 31, 2017 compared to 2016 included an increase of \$46.3 million in the provision related to taxi medallion loans. The provision related to taxi medallion loans totaled \$58.2 million for the year ended December 31, 2017 compared to \$11.9 million for the year ended December 31, 2016. The increased provision related to taxi medallion loans was partially offset by (i) decreases in quantitative and qualitative loss factors, (ii) the impact of lower loan growth and (iii) a decrease in provisions for classified and specifically reserved loans.

The provision for loan losses related to covered loans was not material for any period presented.

Non-Interest Income

The following table presents a comparison of the categories of non-interest income for the periods indicated (in thousands):

	Years Ended December 31,		
	2018	2017	2016
Income from resolution of covered assets, net	\$ 11,551	\$ 27,450	\$ 36,155
Gain (loss) on sale of covered loans, net	5,732	17,406	(14,470)
Net loss on FDIC indemnification	(4,199)	(22,220)	(17,759)
Other	1,214	1,626	1,100
Non-interest income related to the covered assets	14,298	24,262	5,026
Deposit service charges and fees	14,040	12,997	12,780
Gain on sale of non-covered loans, net	10,132	10,183	10,064
Gain on investment securities, net	3,159	33,466	14,461
Lease financing	61,685	53,837	44,738
Other service charges and fees	8,946	7,867	6,683
Other non-interest income	19,762	15,292	12,665
	<u>\$ 132,022</u>	<u>\$ 157,904</u>	<u>\$ 106,417</u>

Refer to the section titled "Impact of the Covered Loans, the FDIC Indemnification Asset and the Loss Sharing Agreements" below for further information about non-interest income related to the covered assets.

Increases in deposit service charges and fees for the year ended December 31, 2018 compared to the year ended December 31, 2017 corresponded to the growth in core deposits.

The most significant component of gain on sale of non-covered loans, net for the years ended December 31, 2018, 2017 and 2016 was gains on sales of the guaranteed portions of SBA loans by SBF.

Gain on investment securities, net for the year ended December 31, 2018 reflected net realized gains of \$6.1 million from the sale of investment securities available for sale, offset by the net unrealized loss on marketable equity securities of \$2.9 million. Gain on investment securities, net for the year ended December 31, 2017 included gains from the sale of certain securities formerly covered under the Commercial Shared-Loss Agreement and originally acquired at significant discounts in the FSB Acquisition.

Year over year increases in income from lease financing generally corresponded to the growth in the portfolio of equipment under operating lease. Lease financing includes gains on the sale of equipment under operating lease of \$4.5 million for the year ended December 31, 2018.

Other non-interest income for the year ended December 31, 2018 reflected increases in fair value adjustments of \$7.7 million related to residential MSRs. All of the Company's residential MSRs were sold in the fourth quarter 2018.

Non-Interest Expense

The following table presents the components of non-interest expense for the years ended December 31, 2018, 2017 and 2016 (in thousands):

	<u>2018</u>	<u>2017</u>	<u>2016</u>
Employee compensation and benefits	\$ 254,997	\$ 237,824	\$ 223,011
Occupancy and equipment	55,899	58,100	59,022
Amortization of FDIC indemnification asset	261,763	176,466	160,091
Deposit insurance expense	18,984	22,011	17,806
Professional fees	16,539	23,676	14,249
Technology and telecommunications	35,136	31,252	31,324
Depreciation of equipment under operating lease	40,025	35,015	31,580
Other non-interest expense	57,197	50,624	53,364
	<u>\$ 740,540</u>	<u>\$ 634,968</u>	<u>\$ 590,447</u>

Consolidated statement of income line item "technology and telecommunications" includes reclassifications from "occupancy and equipment" of \$17.3 million and \$17.0 million, respectively, for the years ended December 31, 2017 and 2016. The reclassification adjustments relate to hardware and software support and maintenance fees and depreciation of software. Excluding amortization of the FDIC indemnification asset, non-interest expense as a percentage of average assets was 1.5%, 1.6% and 1.7%, respectively, for years ended December 31, 2018, 2017 and 2016, respectively. The more significant changes in the components of non-interest expense are discussed below.

Employee compensation and benefits

As is typical for financial institutions, employee compensation and benefits represents the single largest component of recurring non-interest expense. Employee compensation and benefits for the year ended December 31, 2018 increased by \$17.2 million compared to the year ended December 31, 2017. The increase for the year ended December 31, 2018 primarily reflected an increase in the number of employees and compensation increases. Employee compensation and benefits for the year ended December 31, 2017 increased \$14.8 million compared to the year ended December 31, 2016. This increase reflected general increases in salaries and the cost of benefits as well as changes in the composition of the employee base.

Amortization of FDIC indemnification asset

See the section titled "Impact of Covered Loans, the FDIC Indemnification Asset and the Loss Sharing Agreements" below for more information about amortization of the FDIC indemnification asset.

Deposit insurance expense

Deposit insurance expense totaled \$19.0 million, \$22.0 million and \$17.8 million respectively, for the years ended December 31, 2018, 2017 and 2016. The decrease in 2018 was attributed to discontinuance of the large bank surcharge assessment in the fourth quarter. The increase for 2017 reflected the growth of the balance sheet, the large bank surcharge imposed by the FDIC, which began in the third quarter of 2016, and increases in certain components of the Bank's assessment rate.

Professional Fees

Professional fees decreased by \$7.1 million for the year ended December 31, 2018 as compared to the year ended December 31, 2017, primarily due to a reduction in the advisory fees related to the discrete income tax benefit recognized in 2017.

Technology and telecommunications

Technology and telecommunications expense increased by \$3.9 million for the year ended December 31, 2018 compared to the year ended December 31, 2017. This increase is primarily attributed to hardware and software licenses, support and maintenance as well as data processes and services.

Depreciation of equipment under operating lease

Depreciation of equipment under operating lease increased by \$5.0 million for the year ended December 31, 2018 compared to the year ended December 31, 2017 and by \$3.4 million for the year ended December 31, 2017 compared with the year ended December 31, 2016. These increases generally corresponded to the growth in the portfolio of equipment under operating lease. Depreciation of equipment under operating lease for the year ended December 31, 2016 also included impairment of \$4.1 million related to a group of tank cars impacted by new safety regulations.

Other non-interest expense

The most significant components of other non-interest expense are advertising, promotion and business development, costs related to lending activities and deposit generation, expenses and losses related to OREO, foreclosure and repossessed assets, regulatory examination assessments, travel and general office expense.

Impact of the Covered Loans, FDIC Indemnification Asset and the Loss Sharing Agreements

The accounting for covered loans, the indemnification asset and the provisions of the Loss Sharing Agreements have materially impacted our financial condition and results of operations. The more significant ways in which our financial statements have been impacted are:

- Interest income and the net interest margin reflect the impact of accretion related to the covered loans;
- Non-interest expense includes the effect of amortization of the FDIC indemnification asset;
- The Single Family Shared-Loss Agreements has afforded the Company significant protection against credit losses related to residential covered assets. The impact of any provision for loan losses related to the residential covered loans, losses related to covered OREO and expenses related to resolution of covered assets has been significantly mitigated by loss sharing with the FDIC. The Single Family Shared-Loss Agreement was terminated on February 13, 2019; there will be no mitigating impact of loss sharing with the FDIC on losses and expenses related to formerly covered loans retained in portfolio subsequent to the termination date;
- Under the acquisition method of accounting, the assets acquired and liabilities assumed in the FSB Acquisition were initially recorded on the consolidated balance sheet at their estimated fair values as of the acquisition date. The carrying amounts of covered loans and the FDIC indemnification asset continue to be impacted by acquisition accounting adjustments. The carrying amount of covered loans, particularly ACI loans, is materially less than their UPB. Additionally, no ALLL was recorded with respect to acquired loans at the FSB Acquisition date;
- Non-interest income includes gains and losses associated with the resolution of covered assets and the related effect of indemnification under the terms of the Single Family Shared-Loss Agreement. The impact of gains or losses related to transactions in covered assets prior to termination of that agreement in February 2019 was significantly mitigated by FDIC indemnification; and
- ACI loans that are contractually delinquent may not be reflected as non-accrual loans or non-performing assets due to the accounting treatment accorded such loans under ASC 310-30, "Loans and Debt Securities Acquired with Deteriorated Credit Quality."

During the quarter ended December 31, 2018, the Bank executed a portfolio sale of certain covered loans and OREO. Covered loans with UPB totaling approximately \$260 million and covered OREO totaling \$5.2 million were sold during the quarter ended December 31, 2018. In conjunction with the sale, the FDIC indemnification asset was amortized to zero as of December 31, 2018 as expectations of losses eligible for indemnification with respect to any retained loans prior to final termination of the Single Family Shared-Loss Agreement were insignificant.

Covered loans with UPB totaling \$401 million and a carrying value of \$201 million as of December 31, 2018 were retained in portfolio. Based on our updated estimates of expected cash flows, we expect total accretion on the retained covered residential loans over their expected remaining lives to approximate \$287 million. The yield on the retained loans as of December 31, 2018 was 32.9%.

The following table summarizes the net impact on pre-tax earnings of transactions in the covered assets for the years ended December 31, 2018, 2017 and 2016 (in thousands):

	2018	2017	2016
Interest income on covered loans	\$ 368,161	\$ 300,540	\$ 301,614
Amortization of FDIC indemnification asset	(261,763)	(176,466)	(160,091)
	106,398	124,074	141,523
Income from resolution of covered assets, net	11,551	27,450	36,155
Gain (loss) on sale of covered loans, net	5,732	17,406	(14,470)
Net loss on FDIC indemnification	(4,199)	(22,220)	(17,759)
Other, net	(655)	1,058	(4,215)
	12,429	23,694	(289)
Net impact on pre-tax earnings of transactions in the covered assets	\$ 118,827	\$ 147,768	\$ 141,234
Combined yield on covered loans and indemnification asset ⁽¹⁾	17.06%	12.98%	10.20%

(1) The combined yield on the covered loans and the FDIC indemnification asset presented above is calculated as the interest income on the covered loans, net of the amortization of the FDIC indemnification asset, divided by the average combined balance of the covered loans and FDIC indemnification asset.

The table above does not reflect any allocation of employee compensation or other general operating expenses that may be associated with holding and maintaining the covered assets or insuring compliance with the terms of the Shared-Loss Agreements.

Interest income on covered loans and amortization of the FDIC indemnification asset

The yield on covered loans increased to 86.13% for the year ended December 31, 2018 from 55.22% and 41.82% for the years ended December 31, 2017 and 2016, respectively. See "Net Interest Income" above for further discussion of trends in interest income and yields on the covered loan portfolio.

The FDIC indemnification asset was initially recorded at its estimated fair value at the date of the FSB Acquisition, representing the present value of estimated future cash payments from the FDIC for probable losses on covered assets. As projected cash flows from the ACI loans have improved, the yield on the loans has increased accordingly and the estimated future cash payments from the FDIC have decreased. This change in estimated cash flows from the FDIC is recognized prospectively, consistent with the recognition of the estimated increased cash flows from the ACI loans. As a result, the FDIC indemnification asset is being amortized to the amount of the estimated future cash payments from the FDIC. For the year ended December 31, 2018, the average rate at which the FDIC indemnification asset was amortized was 133.51%, compared to 42.90% and 25.14% during the years ended December 31, 2017 and 2016, respectively. These increases correspond to increases in the yield on covered loans; which in 2018, was impacted by increased accretion related to changes in assumptions about the timing and pricing of the final covered loan sale pursuant to the terms of the Single Family Shared-Loss Agreement discussed above. The amount of amortization is impacted by both the change in the amortization rate and the decrease in the average balance of the indemnification asset. As discussed above, the FDIC indemnification asset was amortized to zero as of December 31, 2018.

See Note 5 to the consolidated financial statements for additional information about transactions in the covered assets and a rollforward of the FDIC indemnification asset for the years ended December 31, 2018, 2017 and 2016.

Non-interest income related to the covered assets

The most significant components of non-interest income related to the covered assets are income from resolution of covered assets, gain (loss) on sale of covered loans and the related gain or loss on indemnification asset.

Covered loans may be resolved through prepayment, short sale of the underlying collateral, foreclosure, sale of the loans or charge-off. For loans resolved through prepayment, short sale or foreclosure, the difference between consideration received in resolution of the loans and the allocated carrying value of the loans is recorded in the consolidated statement of income line item "Income from resolution of covered assets, net." Both gains and losses on individual resolutions are included in this line item. For loans resolved through sale of the loans, the difference between consideration received and the allocated carrying value of the loans is recorded in the consolidated statement of income line item "Gain (loss) on sale of loans, net." Losses from the resolution of covered loans increase the amount recoverable from the FDIC under the Single-Family Shared Loss Agreement.

Gains from the resolution of covered loans reduce the amount recoverable from the FDIC under the Single-Family Shared Loss Agreement. These additions to or reductions in amounts recoverable from the FDIC related to the resolution of covered loans are recorded in non-interest income in the line item "Net loss on FDIC indemnification" and reflected as corresponding increases or decreases in the FDIC indemnification asset. The amount of income or loss recorded in any period will be impacted by the amount of covered loans resolved, the amount of consideration received, and our ability to accurately project cash flows from ACI loans in future periods.

For each of the years ended December 31, 2018, 2017 and 2016 the substantial majority of Income from resolution of covered assets, net, resulted from payments in full. Decreases in Income from resolution of covered assets, net, reflected decreases in both the number of resolutions and the average income per resolution.

The following table summarizes the gain (loss) recorded on the sale of covered residential loans and the impact of related FDIC indemnification for the periods indicated (in thousands):

	2018	2017	2016
Net gain (loss) on sale of covered loans	\$ 5,732	\$ 17,406	\$ (14,470)
Net gain (loss) on FDIC indemnification	3,388	(1,514)	11,615
Net impact on pre-tax earnings	<u>\$ 9,120</u>	<u>\$ 15,892</u>	<u>\$ (2,855)</u>

Pricing received on the sale of covered loans may varied based on (i) market conditions, including the interest rate environment, the amount of capital seeking investment and the secondary supply of loans with a particular performance history or collateral type, (ii) the type and quality of collateral, (iii) the performance history of loans included in the sale and (iv) whether or not the loans have been modified.

The net loss on FDIC indemnification related to covered loan sales for the years ended December 31, 2018 and 2017 did not bear the 80% relationship to the net gain on sale that might generally be expected. This was primarily due to the sale of loan pools where there was an acceleration in the expected timing of cash flows, resulting in a gain, with no impact on the total expected credit losses and no related adjustment on the FDIC indemnification asset.

Other items of non-interest income and expense related to the covered assets

Other items of non-interest income and expense related to the covered assets, comprising the line item "Other, net" in the table above presenting the impact on pre-tax earnings of transactions in the covered assets, include the provision for (recovery of) covered loan losses; foreclosure expenses related to covered assets; gains, losses and other expenses related to covered OREO; FDIC reimbursement of certain expenses related to resolution of covered assets, and modification incentives. None of these items had a material impact on results of operations for any period presented.

Income Taxes

The provision (benefit) for income taxes for the years ended December 31, 2018, 2017 and 2016 was \$90.8 million, \$(209.8) million and \$109.7 million, respectively. The effective income tax rate was 21.8%, (51.9)% and 32.7% for the years ended December 31, 2018, 2017 and 2016, respectively.

The income tax benefit and effective income tax rate for the year ended December 31, 2017 reflected a discrete income tax benefit of \$327.9 million related to a matter that arose during an ongoing audit of the Company's 2013 federal income tax return. During that audit, the Company asserted that U.S. federal income taxes paid in respect of certain income previously reported by the Company on its 2012, 2013 and 2014 federal income tax returns related to the basis assigned to certain loans acquired in the FSB Acquisition should be refunded to the Company, in light of guidance issued after the relevant returns had been filed. The discrete income tax benefit recognized in 2017 included expected refunds of federal income tax of \$295.0 million, as well as \$8.7 million in estimated interest on the federal refund and estimated refunds of \$24.2 million from certain state and local taxing jurisdictions. In 2018, the Company received refunds of federal income tax of \$293.0 million, as well as \$13.5 million of interest related to the discrete income tax benefit recognized.

The Company is continuing to evaluate whether it has claims in other state jurisdictions and whether it may have any claims for federal or state income taxes relating to tax years prior to 2012. The Company has not reached any conclusion as to when or to what extent it may have any claims relating to such other state and local taxing jurisdictions or in respect of prior tax years.

Excluding, for the year ended December 31, 2017, the impact of the discrete income tax benefit discussed above and the initial impact of enactment of the TCJA, the effective income tax rate was 21.8%, 30.1% and 32.7% for the years ended December 31, 2018, 2017 and 2016 respectively. Significant components included in the reconciliation of the Company's effective income tax rate to the statutory federal tax rate of 21% for the year ended December 31, 2018 included the effect of state income taxes, partially offset by the impact of income not subject to federal tax. For the years ended December 31, 2017 and 2016, the Company's adjusted effective income tax rate differed from the statutory federal tax rate of 35.0% primarily due to the impact of income not subject to federal tax, partially offset by the effect of state income taxes.

The decline in the effective income tax rate for the year ended December 31, 2018 compared to the prior years, excluding the impact of the discrete income tax benefit discussed above for the year ended December 31, 2017, was primarily attributable to the reduction of the statutory corporate federal income tax rate from 35% to 21%, effective January 1, 2018.

For more information about income taxes, see Note 10 to the consolidated financial statements.

Analysis of Financial Condition

Average interest-earning assets increased \$2.0 billion to \$29.2 billion for the year ended December 31, 2018 from \$27.2 billion for the year ended December 31, 2017. This increase was driven by a \$1.6 billion increase in the average balance of outstanding loans and a \$466 million increase in the average balance of investment securities. The increase in average loans reflected growth of \$1.7 billion in average non-covered loans outstanding, partially offset by a \$117 million decrease in the average balance of covered loans. A \$120 million increase in average non-interest earning assets was primarily attributed to an increase in income taxes receivable related to a discrete income tax benefit recognized during the fourth quarter of 2017, partially offset by a decrease in the average balance of the FDIC indemnification asset.

Average interest bearing liabilities increased \$1.3 billion to \$24.0 billion for the year ended December 31, 2018 from \$22.7 billion for the year ended December 31, 2017, due to increases of \$1.5 billion in average interest bearing deposits, offset by a decrease of \$232 million in average FHLB advances. Average non-interest bearing deposits increased by \$320 million.

Average stockholders' equity increased by \$443 million, due primarily to the retention of earnings, including the discrete income tax benefit recorded during the fourth quarter of 2017, and also reflecting proceeds from the exercise of stock options, offset by the repurchase of common stock.

Investment Securities

The following table shows the amortized cost and fair value of investment securities at December 31, 2018, 2017 and 2016 (in thousands):

	2018		2017		2016	
	Amortized Cost	Carrying Value	Amortized Cost	Carrying Value	Amortized Cost	Carrying Value
U.S. Treasury securities	\$ 39,885	\$ 39,873	\$ 24,981	\$ 24,953	\$ 4,999	\$ 5,005

Investment securities held to maturity	10,000	10,000	10,000	10,000	10,000	10,000
	<u>\$ 8,161,173</u>	<u>\$ 8,166,878</u>	<u>\$ 6,597,786</u>	<u>\$ 6,690,832</u>	<u>\$ 6,006,203</u>	<u>\$ 6,083,584</u>

Our investment strategy has focused on insuring adequate liquidity, maintaining a suitable balance of high credit quality, diverse assets, managing interest rate risk, and generating acceptable returns given our established risk parameters. We have sought to maintain liquidity by investing a significant portion of the portfolio in high quality liquid securities including U.S. Treasury securities, GNMA securities, SBA securities and U.S. Government Agency MBS. Investment grade municipal securities provide liquidity and attractive tax-equivalent yields. We have also invested in highly rated structured products, including commercial MBS, residential MBS, collateralized loan obligations, single family rental real estate-backed securities and non-mortgage asset-backed securities that, while somewhat less liquid, provide us with attractive yields. Relatively short effective portfolio duration helps mitigate interest rate risk. The weighted average expected life of the investment portfolio as of December 31, 2018 was 4.5 years and the effective duration was 1.4 years.

A summary of activity in the investment securities portfolio for the years ended December 31, 2018 and 2017 follows (in thousands):

Balance at December 31, 2016	\$ 6,083,584
Purchases	3,131,798
Repayments, maturities and calls	(1,268,588)
Sales	(1,254,125)
Amortization of discounts and premiums, net	(17,502)
Change in unrealized gains	15,665
Balance at December 31, 2017	<u>6,690,832</u>
Purchases	4,138,994
Repayments, maturities and calls	(1,538,943)
Sales	(1,027,651)
Amortization of discounts and premiums, net	(12,644)
Change in unrealized gains	(83,710)
Balance at December 31, 2018	<u><u>\$ 8,166,878</u></u>

The following table shows the scheduled maturities, carrying values and current yields for investment securities available for sale as of December 31, 2018, as well as the carrying value and yield of marketable equity securities. Scheduled maturities have been adjusted for anticipated prepayments when applicable. Yields on tax-exempt securities have been calculated on a tax-equivalent basis, based on a federal income tax rate of 21% (dollars in thousands):

	Within One Year		After One Year Through Five Years		After Five Years Through Ten Years		After Ten Years		Total

Marketable equity securities with no scheduled maturity									60,519	7.47%
Total investment securities available for sale and marketable equity securities									<u>\$ 8,156,878</u>	<u>3.77%</u>

The investment securities available for sale portfolio was in a net unrealized gain position of \$5.7 million at December 31, 2018 with aggregate fair value equal to 100.1% of amortized cost. Net unrealized gains included \$49.0 million of gross unrealized gains and \$43.3 million of gross unrealized losses. Investment securities available for sale in an unrealized loss position at December 31, 2018 had an aggregate fair value of \$4.3 billion. At December 31, 2018, 99.4% of investment securities available for sale were backed by the U.S. Government, U.S. Government agencies or sponsored enterprises or were rated AAA, AA or A, based on the most recent third-party ratings. At December 31, 2018, 83%, 14% and 3% of Collateralized loan obligations were rate AAA, AA and A, respectively, based on the most recent third-party ratings, with a weighted-average subordination level at 41.8%, ranging from 27.1% to 43.8%. Investment securities available for sale totaling \$46 million were rated below investment grade or not rated at December 31, 2018.

We evaluate the credit quality of individual securities in the portfolio quarterly to determine whether any of the investments in unrealized loss positions are other-than-temporarily impaired. This evaluation considers, but is not necessarily limited to, the following factors, the relative significance of which varies depending on the circumstances pertinent to each individual security:

- our intent to hold the security until maturity or for a period of time sufficient for a recovery in value;
- whether it is more likely than not that we will be required to sell the security prior to recovery of its amortized cost basis;
- the length of time and extent to which fair value has been less than amortized cost;
- adverse changes in expected cash flows;
- collateral values and performance;
- the payment structure of the security, including levels of subordination or over-collateralization;
- changes in the economic or regulatory environment;
- the general market condition of the geographic area or industry of the issuer;

- the issuer's financial condition, performance and business prospects; and
- changes in credit ratings.

No securities were determined to be other-than-temporarily impaired at December 31, 2018 and 2017, or during the years then ended. During the year ended December 31, 2016, the Company recognized OTTI in the amount of \$463 thousand on two positions in one private label commercial MBS security, which was determined to be other-than-temporarily impaired. This security was sold prior to the end of 2016.

We do not intend to sell securities in significant unrealized loss positions at December 31, 2018. Based on an assessment of our liquidity position and internal and regulatory guidelines for permissible investments and concentrations, it is not more likely than not that we will be required to sell securities in significant unrealized loss positions prior to recovery of amortized cost basis. Unrealized losses in the portfolio at December 31, 2018 were primarily attributable to an increase in market interest rates subsequent to the date the securities were acquired.

The timely repayment of principal and interest on U.S. Treasury and U.S. Government agency and sponsored enterprise securities in unrealized loss positions is explicitly or implicitly guaranteed by the full faith and credit of the U.S. Government. Management performed projected cash flow analyses of the private label residential MBS and CMOs, private label commercial MBS, collateralized loan obligations and non-mortgage asset-backed securities in unrealized loss positions, incorporating CUSIP level assumptions consistent with the collateral characteristics of each security including collateral default rate, voluntary prepayment rate, severity and delinquency assumptions. Based on the results of this analysis, no credit losses were projected. Management's analysis of the credit characteristics of individual securities and the underlying collateral and levels of subordination for each of the single family rental real estate-backed securities in unrealized loss positions is not indicative of projected credit losses. Management's analysis of the state and municipal obligations in unrealized loss positions included reviewing the ratings of the securities and the results of credit surveillance performed by an independent third party. Given the expectation of timely repayment of principal and interest, the impairments were considered to be temporary.

For further discussion of our analysis of investment securities for OTTI, see Note 3 to the consolidated financial statements.

We use third-party pricing services to assist us in estimating the fair value of investment securities. We perform a variety of procedures to ensure that we have a thorough understanding of the methodologies and assumptions used by the pricing services including obtaining and reviewing written documentation of the methods and assumptions employed, conducting interviews with valuation desk personnel and reviewing model results and detailed assumptions used to value selected securities as considered necessary. Our classification of prices within the fair value hierarchy is based on an evaluation of the nature of the significant assumptions impacting the valuation of each type of security in the portfolio. We have established a robust price challenge process that includes a review by our treasury front office of all prices provided on a monthly basis. Any price evidencing unexpected month over month fluctuations or deviations from our expectations based on recent observed trading activity and other information available in the marketplace that would impact the value of the security is challenged. Responses to the price challenges, which generally include specific information about inputs and assumptions incorporated in the valuation and their sources, are reviewed in detail. If considered necessary to resolve any discrepancies, a price will be obtained from additional independent valuation sources. We do not typically adjust the prices provided, other than through this established challenge process. Our primary pricing services utilize observable inputs when available, and employ unobservable inputs and proprietary models only when observable inputs are not available. As a matter of course, the services validate prices by comparison to recent trading activity whenever such activity exists. Quotes obtained from the pricing services are typically non-binding.

We have also established a quarterly price validation process to assess the propriety of the pricing methodologies utilized by our primary pricing services by independently verifying the prices of a sample of securities in the portfolio. Sample sizes vary based on the type of security being priced, with higher sample sizes applied to more difficult to value security types. Verification procedures may consist of obtaining prices from an additional outside source or internal modeling, generally based on Intex. We have established acceptable percentage deviations from the price provided by the initial pricing source. If deviations fall outside the established parameters, we will obtain and evaluate more detailed information about the assumptions and inputs used by each pricing source or, if considered necessary, employ an additional valuation source to price the security in question. Pricing issues identified through this evaluation are addressed with the applicable pricing service and methodologies or inputs are revised as determined necessary. Depending on the results of the validation process, sample sizes may be extended for particular classes of securities. Results of the validation process are reviewed by the treasury front office and by senior management.

The majority of our investment securities are classified within level 2 of the fair value hierarchy. U.S. Treasury securities and equity securities are classified within level 1 of the hierarchy. At December 31, 2018 and 2017, 0.5% and 0.9%, respectively, of our investment securities were classified within level 3 of the fair value hierarchy. Securities classified within level 3 of the hierarchy at December 31, 2018 included certain private label residential MBS and trust preferred securities. These securities were classified within level 3 of the hierarchy because proprietary assumptions related to voluntary prepayment rates, default

probabilities, loss severities and discount rates were considered significant to the valuation. There were no transfers of investment securities between levels of the fair value hierarchy during the years ended December 31, 2018 and 2017.

For additional discussion of the fair values of investment securities, see Note 15 to the consolidated financial statements.

Loans Held for Sale

Loans held for sale at December 31, 2018 and 2017 included \$37 million and \$34 million, respectively, of commercial loans originated by SBF with the intent to sell in the secondary market. Commercial loans held for sale are comprised of the portion of loans guaranteed by U.S. government agencies, primarily the SBA. Loans are generally sold with servicing retained. Commercial servicing activity did not have a material impact on the results of operations for the years ended December 31, 2018 and 2017.

Loans

The loan portfolio comprises the Company's primary interest-earning asset. The following tables show the composition of the loan portfolio and the breakdown of the portfolio among non-covered loans, covered ACI loans and covered non-ACI loans at December 31, of each of the years indicated (dollars in thousands):

	2018

Total loans, including premiums, discounts and deferred fees and costs, increased by \$561 million to \$22.0 billion at December 31, 2018, from \$21.4 billion at December 31, 2017. Non-covered loans grew by \$862 million, while covered loans declined by \$302 million from December 31, 2017 to December 31, 2018.

Residential and other consumer loans grew by \$552 million for the year ended December 31, 2018. Multi-family loans declined by \$634 million for the year ended December 31, 2018, primarily due to continued run-off of the New York portfolio, which decreased by \$573 million. Commercial and industrial loans, inclusive of owner occupied commercial real estate, grew by \$760 million for the year ended December 31, 2018, driven largely by growth in the Florida portfolio.

Included in multi-family and non-owner occupied commercial real estate loans above at December 31, 2018 were \$97 million and \$14 million, respectively, in re-positioning loans. These loans, substantially all of which are in New York, provided financing for some level of improvements by the borrower to the underlying collateral to enhance the cash flow generating capacity of the collateral. The primary purpose of these loans was not for construction.

Residential mortgages and other consumer loans

Residential mortgages and other consumer loans totaled \$4.9 billion, or 22.3% of total loans, at December 31, 2018 and \$4.6 billion, or 21.7% of total loans, at December 31, 2017.

The following table shows the composition of residential and other consumer loans at December 31, 2018 and 2017. Amounts are net of premiums, discounts and deferred fees and costs (in thousands):

	2018	2017
Residential and other consumer loans:		
1-4 single family residential	\$ 4,463,544	\$ 4,145,879
Government insured residential	266,729	28,074
Home equity loans and lines of credits	1,393	1,654
Other consumer loans	15,947	20,473
Covered loans	201,376	503,118
	<u>\$ 4,948,989</u>	<u>\$ 4,699,198</u>

The 1-4 single family residential loan portfolio is primarily comprised of loans purchased on a national basis through established correspondent channels. The portfolio also includes loans originated through retail channels in our Florida and New York geographic footprint prior to the termination of our retail residential mortgage origination business in 2016. 1-4 single family residential mortgage loans are primarily closed-end, first lien jumbo mortgages for the purchase or re-finance of owner occupied property. The loans have terms ranging from 10 to 30 years, with either fixed or adjustable interest rates. At December 31, 2018, \$131 million or 2.9% of non-covered residential mortgage loans were interest-only loans, substantially all of which begin amortizing 10 years after origination.

The following tables present a breakdown of the non-covered and covered 1-4 single family residential mortgage portfolio, excluding government insured residential loans, categorized between fixed rate loans and ARMs at December 31, 2018 and 2017. Amounts are net of premiums, discounts and deferred fees and costs (dollars in thousands):

	2018			
	Non-Covered Loans	Covered Loans	Total	Percent of Total
Fixed rate loans	\$ 1,418,579	\$ 29,467	\$ 1,448,046	31.0%

	Non-Covered Loans	Covered Loans	Total	Percent of Total
Fixed rate loans	\$ 1,274,278	\$ 133,413	\$ 1,407,691	30.3%
ARM loans	2,871,601	369,705	3,241,306	69.7%
	<u>\$ 4,145,879</u>	<u>\$ 503,118</u>	<u>\$ 4,648,997</u>	<u>100.0%</u>

In 2018, the Company began acquiring non-performing FHA and VA insured mortgages from third party servicers who have exercised their right to purchase these loans out of GNMA securitizations (collectively, "government insured pool buyout loans" or "buyout loans"). Buyout loans that re-perform, either through modification or self-cure, may be eligible for re-securitization. The balance of government insured residential loans buyout loans totaled \$241 million at December 31, 2018. The Company is not the servicer of these loans.

The following charts present the distribution of the non-covered 1-4 single family residential mortgage portfolio, excluding government insured residential loans, by product type at December 31, 2018 and 2017:

The geographic concentration of the non-covered 1-4 single family residential portfolio, excluding government insured residential loans, is summarized as follows at December 31, 2018 and 2017 (dollars in thousands):

(1) No other state represented borrowers with more than 4.0% of 1-4 single family residential loans outstanding at December 31, 2018 or December 31, 2017.

Home equity loans and lines of credit are not significant.

Other consumer loans are comprised primarily of consumer installment financing, loans secured by certificates of deposit, unsecured personal lines of credit and demand deposit account overdrafts.

Commercial loans and leases

The commercial portfolio segment includes loans secured by multi-family properties, loans secured by both owner-occupied and non-owner occupied commercial real estate, a limited amount of construction and land loans, commercial and industrial loans and direct financing leases. Management's loan origination strategy is heavily focused on the commercial portfolio segment, which comprised 78.4% and 80.2% of non-covered loans as of December 31, 2018 and 2017, respectively.

The following table shows the composition of the commercial loan portfolio at December 31, 2018 and 2017. Amounts are net of premiums, discounts and deferred fees and costs (in thousands):

	2018	2017
Commercial:		
Multi-family	\$ 2,585,421	\$ 3,218,953
Non-owner occupied commercial real estate	4,611,573	4,378,704
Construction and land	210,516	295,360
Owner occupied commercial real estate	2,007,603	1,907,242
Commercial and industrial	4,312,213	3,648,410
Commercial lending subsidiaries:		
Pinnacle	1,462,655	1,524,650
Bridge - franchise finance	517,305	434,582
Bridge - equipment finance	636,838	603,267
SBF	252,221	246,750
Mortgage warehouse lending	431,674	459,388
	<u>\$ 17,028,019</u>	<u>\$ 16,717,306</u>

Commercial real estate loans include term loans secured by owner and non-owner occupied income producing properties including rental apartments, mixed-use properties, industrial properties, retail shopping centers, free-standing single-tenant buildings, office buildings, warehouse facilities and hotels as well as real estate secured lines of credit.

The following charts present the distribution of non-owner occupied commercial real estate by product type at December 31, 2018 and 2017:

The Company's commercial real estate underwriting standards generally provide for loan terms of five to seven years, with amortization schedules of no more than thirty years. LTV ratios are typically limited to no more than 80%. Owner-occupied commercial real estate loans typically have risk profiles more closely aligned with that of commercial and industrial loans than with other types of commercial real estate loans. Construction and land loans represented only 1.0% of the total loan portfolio at December 31, 2018. Construction and land loans are generally made for projects expected to stabilize within eighteen months of completion in sub-markets with strong fundamentals and, to a lesser extent, for-sale residential projects to experienced developers with a strong cushion between market prices and loan basis.

Commercial and industrial loans are typically made to small, middle market and larger corporate businesses and include equipment loans, secured and unsecured working capital facilities, formula-based loans, trade finance, mortgage warehouse lines, SBA product offerings and business acquisition finance credit facilities. These loans may be structured as term loans, typically with maturities of five to seven years, or revolving lines of credit which may have multi-year maturities. The Bank also provides financing to state and local governmental entities within its geographic footprint. Commercial loans include shared national credits totaling \$1.9 billion at December 31, 2018, typically relationship based loans to borrowers in Florida and New York.

Through its commercial lending subsidiaries, Pinnacle and Bridge, the Bank provides equipment and franchise financing on a national basis using both loan and lease structures. Pinnacle provides financing to state and local governmental entities directly and through vendor programs and alliances. Pinnacle offers a full array of financing structures including equipment lease purchase agreements and direct (private placement) bond re-fundings and loan agreements. Bridge has two operating divisions. The franchise finance division offers franchise acquisition, expansion and equipment financing, typically to experienced operators in well-established concepts. The equipment finance division provides primarily transportation equipment financing through a variety of loan and lease structures. The Bank's SBF unit primarily originates SBA guaranteed commercial and commercial real estate loans, generally selling the guaranteed portion in the secondary market and retaining the unguaranteed portion in portfolio. The Bank engages in mortgage warehouse lending on a national basis.

The geographic concentration of the commercial loans and direct financing leases in the national platforms is summarized as follows at December 31, 2018 and 2017. Amounts include premiums, discounts and deferred fees and costs (dollars in thousands):

	2018		2017	
Florida	\$ 595,843	18.1%	\$ 639,474	19.6%
California	498,842	15.1%	486,733	14.9%
Arizona	149,087	4.5%	175,704	5.4%

Iowa	151,036	4.6%	151,935	4.6%
All others ⁽¹⁾	1,444,656	43.7%	1,382,274	42.2%
	<u>\$ 3,300,693</u>	<u>100.0%</u>	<u>\$ 3,268,637</u>	<u>100.0%</u>

(1) No other state represented borrowers with more than 4.0% of loans outstanding at December 31, 2018 or 2017.

Loan Maturities

The following table sets forth, as of December 31, 2018, the maturity distribution of our loan portfolio by category, based on UPB. Commercial loans are presented by contractual maturity, including scheduled payments for amortizing loans. Contractual maturities of 1-4 single family residential loans have been adjusted for an estimated rate of voluntary prepayments on all loans, based on historical trends, current interest rates, types of loans and refinance patterns (in thousands):

	One Year or Less	After One Through Five Years	After Five Years	Total
Residential and other consumer:				
1-4 single family residential	\$ 895,973	\$ 2,661,788	\$ 1,512,152	\$ 5,069,913

Equipment under Operating Lease

Equipment under operating lease totaled \$702 million at December 31, 2018. The portfolio consisted primarily of railcars, non-commercial aircraft and other transport equipment. We have a total of 5,394 railcars with a carrying value of \$424 million at December 31, 2018, including hoppers, tank cars, boxcars, auto carriers, center beams and gondolas leased to North American commercial end-users. The largest concentrations of rail cars were 2,064 hopper cars and 1,595 tank cars, primarily used to ship sand and petroleum products, respectively, for the energy industry. Equipment with a carrying value of \$288 million at December 31, 2018 was leased to companies for use in the energy industry.

The chart below presents equipment under operating lease by type at December 31, 2018 and 2017:

At December 31, 2018, the breakdown of carrying values of equipment under operating lease by the year current leases are scheduled to expire was as follows (in thousands):

Years Ending December 31:	
2019 ⁽¹⁾	\$ 64,598
2020	99,029
2021	67,037
2022	60,656
2023	52,139
Thereafter through 2033	358,895
	<u>\$ 702,354</u>

(1) Includes \$9.0 million of equipment off-lease as of December 31, 2018.

Asset Quality

Commercial Loans

We have a robust credit risk management framework, an experienced team to lead the workout and recovery process for the commercial and commercial real estate portfolios and a dedicated internal credit review function. Loan performance is monitored by our credit administration and workout and recovery departments. Generally, commercial relationships with balances in excess of defined thresholds are re-evaluated at least annually and more frequently if circumstances indicate that a change in risk rating may be warranted. The defined thresholds range from \$1 million to \$3 million. Homogenous groups of smaller balance commercial loans may be monitored collectively. Additionally, commercial loans as well as underwriting and portfolio management practices are regularly reviewed by our internal credit review department. The Company utilizes a 13 grade internal asset risk classification system as part of its efforts to monitor and maintain commercial asset quality. Loans exhibiting potential credit weaknesses that deserve management's close attention and that if left uncorrected may result in deterioration of the repayment capacity of the borrower are categorized as special mention. These borrowers may exhibit negative financial trends or erratic financial performance, strained liquidity, marginal collateral coverage, declining industry trends or weak management. Loans with well-defined credit weaknesses that may result in a loss if the deficiencies are not corrected are assigned a risk rating of substandard. These borrowers may exhibit payment defaults, inadequate cash flows, operating losses, increasing balance sheet leverage, project cost overruns, unreasonable construction delays, exhausted interest reserves, declining collateral values, frequent overdrafts or past due real estate taxes. Loans with weaknesses so severe that collection in full is highly questionable or improbable, but because of certain reasonably specific pending factors have not been charged off, are assigned an internal risk rating of doubtful.

We believe internal risk rating is the best indicator of the credit quality of commercial loans. The following table summarizes the Company's commercial credit exposure, based on internal risk rating, at December 31, 2018 and 2017 (in thousands):

	2018		2017	
	Balance	Percent of Total	Balance	Percent of Total
Pass	\$ 16,728,534	98.3%	\$ 16,189,392	96.8%
Special mention	81,070	0.5%	183,234	1.1%
Substandard ⁽¹⁾	210,026	1.2%	338,405	2.0%
Doubtful	8,389	—%	6,275	0.1%
	<u>\$ 17,028,019</u>	<u>100.0%</u>	<u>\$ 16,717,306</u>	<u>100.0%</u>

(1) The balance of substandard loans at December 31, 2018 and 2017 included \$0.8 million and \$105 million, respectively, of taxi medallion finance loans. See Note 4 to the consolidated financial statements for more detailed information about risk rating of commercial loans.

Taxi Medallion Finance

During the fourth quarter of 2018, the Company sold substantially the entire taxi medallion portfolio leaving an exposure of \$0.8 million at December 31, 2018. The remaining taxi medallion loans were on non-accrual status and risk rated substandard as of December 31, 2018.

We are no longer originating taxi medallion loans.

Equipment Under Operating Lease

Two operating lease relationships with a carrying value of assets under lease totaling \$36 million, of which \$31 million were exposures to the energy industry, were internally risk rated substandard at December 31, 2018. The present value of remaining lease payments on these leases and their residual values totaled approximately \$13 million and \$30 million, respectively at December 31, 2018, of which \$9 million and \$27 million, respectively were exposures to the energy industry. There have been no missed payments related to the operating lease portfolio to date. One relationship has been restructured to date, with no decrease in total minimum lease payments.

The primary risks inherent in the equipment leasing business are asset risk resulting from ownership of the equipment on operating lease and credit risk. Asset risk arises from fluctuations in supply and demand for the underlying leased equipment. The equipment is leased to commercial end-users with original lease terms generally ranging from three to ten years at December 31, 2018. We are exposed to the risk that, at the end of the lease term, the value of the asset will be lower than expected, potentially resulting in reduced future lease income over the remaining life of the asset or a lower sale value. Asset risk may also lead to changes in depreciation as a result of changes in the residual values of the operating lease assets or through impairment of asset carrying values. Asset risk may be higher for long-lived equipment such as railcars, which have useful lives of approximately 35-50 years.

Asset risk is evaluated and managed by a dedicated internal staff of asset managers, managed by seasoned equipment finance professionals with a broad depth and breadth of experience in the leasing business. Additionally, we have partnered with an industry leading, experienced service provider who provides fleet management and servicing relating to the railcar fleet, including lease administration and reporting, a Regulation Y compliant full service maintenance program and railcar re-marketing. Risk is managed by setting appropriate residual values at inception and systematic reviews of residual values based on independent appraisals, performed at least annually. Additionally, our internal management team and our external service provider closely follow the rail markets, monitoring traffic flows, supply and demand trends and the impact of new technologies and regulatory requirements. Demand for railcars is sensitive to shifts in general and industry specific economic and market trends and shifts in trade flows from specific events such as natural or man-made disasters. We seek to mitigate these risks by leasing to a stable end-user base, by maintaining a relatively young and diversified fleet of assets that are expected to maintain stronger and more stable utilization rates despite impacts from unexpected events or cyclical trends and by staggering lease maturities. We regularly monitor the impact of oil prices on the estimated residual value of rail cars being used in the petroleum/natural gas extraction sector.

Credit risk in the leased equipment portfolio results from the potential default of lessees, possibly driven by obligor specific or industry-wide conditions, and is economically less significant than asset risk, because in the operating lease business, there is no extension of credit to the obligor. Instead, the lessor deploys a portion of the useful life of the asset. Credit

losses, if any, will manifest through reduced rental income due to missed payments, time off lease, or lower rental payments due either to a restructuring or re-leasing of the asset to another obligor. Credit risk in the operating lease portfolio is managed and monitored utilizing credit administration infrastructure, processes and procedures similar to those used to manage and monitor credit risk in the commercial loan portfolio. We also mitigate credit risk in this portfolio by leasing only to high credit quality obligors.

Residential and Other Consumer Loans

The majority of our non-covered residential mortgage portfolio consists of loans purchased through established correspondent channels. Most of our purchases are of performing jumbo mortgage loans which have FICO scores above 700, primarily are owner-occupied and full documentation, and have a current LTV of 80% or less although loans with LTVs higher than 80% may be extended to selected credit-worthy borrowers. We perform due diligence on the purchased loans for credit, compliance, counterparty, payment history and property valuation.

We have a dedicated residential credit risk management function, and the residential portfolio is monitored by our internal credit review function. Residential mortgage loans and consumer loans are not individually risk rated. Delinquency status is the primary measure we use to monitor the credit quality of these loans. We also consider original LTV and FICO score to be significant indicators of credit quality for the non-covered 1-4 single family residential portfolio.

The following tables show the distribution of non-covered 1-4 single family residential loans, excluding government insured residential loans, by original FICO and LTV at December 31, 2018 and 2017:

LTV	2018				Total
	FICO				
	720 or less	721 - 740	741 - 760	761 or greater	
60% or less	2.4%	2.8%	4.4%	18.2%	27.8%
60% - 70%	2.7%	2.4%	3.8%	13.4%	22.3%
70% - 80%	3.5%	4.6%	8.4%	28.3%	44.8%
More than 80%	0.4%	0.8%	0.8%	3.1%	5.1%
	9.0%	10.6%	17.4%	63.0%	100.0%

LTV	2017				Total
	FICO				
	720 or less	721 - 740	741 - 760	761 or greater	
60% or less	2.2%	2.8%	4.6%	19.7%	29.3%
60% - 70%	2.4%	2.5%	3.6%	14.2%	22.7%
70% - 80%	3.6%	4.4%	7.8%	27.5%	43.3%
More than 80%	0.4%	0.7%	0.7%	2.9%	4.7%
	8.6%	10.4%	16.7%	64.3%	100.0%

At December 31, 2018, the non-covered 1-4 single family residential loan portfolio, excluding government insured residential loans, had the following characteristics: substantially all were full documentation with a weighted-average FICO score of 765 and a weighted-average LTV of 67.6%. The majority of this portfolio was owner-occupied, with 85.7% primary residence, 7.7% second homes and 6.6% investment properties. In terms of vintage, 25.1% of the portfolio was originated pre-2015, 16.9% in 2015, 20.1% in 2016, 22.8% in 2017 and 15.1% in 2018.

Non-covered 1-4 single family residential loans, excluding government insured residential loans past due more than 30 days totaled \$23.5 million and \$28.9 million at December 31, 2018 and 2017, respectively. The amount of these loans 90 days or more past due was \$6.9 million and \$3.7 million at December 31, 2018 and 2017, respectively.

At December 31, 2018, the recorded investment in covered single family residential loans was \$201 million, past due more than 30 days totaled \$0.7 million and \$30.9 million at December 31, 2018 and December 31, 2017, respectively. The amounts of these loans 90 days or more past due was \$44 thousand and \$17.8 million December 31, 2018 and December 31, 2017, respectively. The Single Family Shared-Loss Agreement was terminated on February 13, 2019.

At December 31, 2018, the covered single family residential loans had a current weighted average FICO and LTV of 754 and 46.6%, respectively.

Other Consumer Loans

All consumer loans were current at December 31, 2018 and substantially all were current at December 31, 2017.

Impaired Loans and Non-Performing Assets

Non-performing assets generally consist of (i) non-accrual loans, including loans that have been modified in TDRs and placed on non-accrual status, (ii) accruing loans that are more than 90 days contractually past due as to interest or principal, excluding ACI loans and government insured residential loans, and (iii) OREO and repossessed assets. Impaired loans also typically include loans modified in TDRs that are accruing and ACI loans or pools for which expected cash flows at acquisition (as adjusted for any additional cash flows expected to be collected arising from changes in estimates after acquisition) have been revised downward since acquisition, other than due to changes in interest rate indices and prepayment assumptions.

The following table summarizes the Company's impaired loans and non-performing assets at December 31 of the years indicated (dollars in thousands):

	2018			2017			2016

(1) Includes TDRs on accrual status.

(2) Total loans for purposes of calculating these ratios include premiums, discounts and deferred fees and costs.

(3) Ratio for non-covered assets is calculated as non-performing non-covered assets to total assets.

The decreases in the ratios of non-performing loans to total loans and non-performing assets to total assets at December 31, 2018 compared to December 31, 2017 were primarily attributable to the sale of substantially all taxi medallion loans during the fourth quarter 2018. The increases in the ratios of non-performing loans to total loans and non-performing assets to total assets and the decrease in the ratio of the ALLL to non-performing loans at December 31, 2017 compared to December 31, 2016 were each primarily attributable to the increase in non-accrual taxi medallion loans during those periods.

Contractually delinquent ACI loans with remaining accretable yield are not reflected as non-accrual loans and are not considered to be non-performing assets because accretion continues to be recorded in income. Accretion continues to be recorded as long as there is an expectation of future cash flows in excess of carrying amount from these loans. The carrying value of ACI loans contractually delinquent by more than 90 days but on which income was still being recognized was insignificant at December 31, 2018 and \$18 million at December 31, 2017. Contractually delinquent government insured residential loans are excluded from non-performing loans as defined in the table above. The carrying value of such loans contractually delinquent by more than 90 days was \$218 million and \$2 million at December 31, 2018 and 2017, respectively. The increase is attributable to the government insured pool buyout activity which began in 2018.

Commercial loans, other than ACI loans, are placed on non-accrual status when (i) management has determined that full repayment of all contractual principal and interest is in doubt, or (ii) the loan is past due 90 days or more as to principal or interest unless the loan is well secured and in the process of collection. Residential and consumer loans, other than ACI loans and government insured pool buyout loans, are generally placed on non-accrual status when 90 days of interest is due and unpaid. When a loan is placed on non-accrual status, uncollected interest accrued is reversed and charged to interest income. Commercial loans are returned to accrual status only after all past due principal and interest has been collected and full repayment of remaining contractual principal and interest is reasonably assured. Residential loans are generally returned to accrual status when less than 90 days of interest is due and unpaid. Past due status of loans is determined based on the contractual next payment due date. Loans less than 30 days past due are reported as current.

A loan modification is considered a TDR if the Company, for economic or legal reasons related to the borrower's financial difficulties, grants a concession to the borrower that the Company would not otherwise grant. These concessions may take the form of temporarily or permanently reduced interest rates, payment abatement periods, restructuring of payment terms, extensions of maturity at below market terms, or in some cases, partial forgiveness of principal. Under GAAP, modified ACI loans accounted for in pools are not accounted for as TDRs and are not separated from their respective pools when modified. Included in TDRs are residential loans to borrowers who have not reaffirmed their debt discharged in Chapter 7 bankruptcy.

The following table summarizes loans modified in TDRs at December 31, 2018 (dollars in thousands):

	Number of TDRs	Recorded Investment	Related Specific Allowance
Residential and other consumer	47	\$ 7,690	\$ 134
Commercial	23	36,150	3,595
	<u>70</u>	<u>\$ 43,840</u>	<u>\$ 3,729</u>

Potential Problem Loans

Potential problem loans have been identified by management as those commercial loans included in the "substandard accruing" risk rating category. These loans are typically performing, but possess specifically identified credit weaknesses that, if not remedied, may lead to a downgrade to non-accrual status and identification as impaired in the near-term. Substandard accruing commercial loans totaled \$96 million at December 31, 2018, substantially all of which were current as to principal and interest at December 31, 2018.

Loss Mitigation Strategies

Criticized or classified commercial loans in excess of certain thresholds are reviewed quarterly by the Criticized Asset Committee, which evaluates the appropriate strategy for collection to mitigate the amount of credit losses. Criticized asset reports for each relationship are presented by the assigned relationship manager and credit officer to the Criticized Asset Committee until such time as the relationships are returned to a satisfactory credit risk rating or otherwise resolved. The Criticized Asset Committee may require the transfer of a loan to our workout and recovery department, which is tasked to effectively manage the loan with the goal of minimizing losses and expenses associated with restructure, collection and/or liquidation of collateral. Commercial loans with a risk rating of substandard; impaired loans on non-accrual status; loans modified as TDRs; or assets classified as OREO or repossessed assets are usually transferred to workout and recovery. Oversight of the workout and recovery department is provided by the Asset Recovery Committee.

We evaluate each residential loan in default to determine the most effective loss mitigation strategy, which may be modification, short sale, or foreclosure. We offer a modification program modeled after the FNMA standard modification program.

Analysis of the Allowance for Loan and Lease Losses

The ALLL relates to (i) loans originated or purchased since the FSB acquisition, (ii) estimated additional losses arising on non-ACI loans subsequent to the FSB Acquisition, and (iii) impairment recognized as a result of decreases in expected cash flows on ACI loans due to further credit deterioration. The determination of the amount of the ALLL is, by nature, highly complex and subjective. Future events that are inherently uncertain could result in material changes to the level of the ALLL. General economic conditions including but not limited to unemployment rates, the level of business investment and growth, real estate values, vacancy rates and rental rates in our primary market areas, the level of interest rates, and a variety of other factors that affect the ability of borrowers' businesses to generate cash flows sufficient to service their debts will impact the future performance of the portfolio. Adoption of the CECL model in the first quarter of 2020 will result in significant changes

to the methodology employed to determine the amount of the ALLL, and may materially impact the amount of the ALLL recorded in the consolidated financial statements.

Commercial loans

The allowance is comprised of specific reserves for loans that are individually evaluated and determined to be impaired as well as general reserves for loans that have not been identified as impaired.

Commercial relationships graded substandard or doubtful and on non-accrual status with committed credit facilities greater than or equal to \$1.0 million, as well as loans modified in TDRs, are individually evaluated for impairment. Other commercial relationships on non-accrual status with committed balances under \$1.0 million may also be evaluated for impairment, at management's discretion. For loans evaluated individually for impairment and determined to be impaired, a specific allowance is established based on the present value of expected cash flows discounted at the loan's effective interest rate, the estimated fair value of the loan, or the estimated fair value of collateral less costs to sell.

We believe that loans rated special mention, substandard or doubtful that are not individually evaluated for impairment exhibit characteristics indicative of a heightened level of credit risk. We apply a quantitative loss factor for loans rated special mention based on average annual probability of default and implied severity, derived from internal and external data. Loss factors for substandard and doubtful loans that are not individually evaluated are determined by using default frequency and severity information applied at the loan level. Estimated default frequencies and severities are based on available industry and internal data. In addition, we apply a floor to these calculated loss factors, based on the loss factor applied to the special mention portfolio.

To the extent, in management's judgment, commercial portfolio segments have sufficient observable loss history, the quantitative portion of the ALLL is based on the Bank's historical net charge-off rates. These commercial segments include commercial and industrial loans and the Bridge portfolios. For commercial portfolio segments that have not yet exhibited an observable loss trend, the quantitative loss factors are based on peer group average annual historical net charge-off rates by loan class and the Company's internal credit risk rating system. These commercial segments include multifamily, non-owner occupied commercial real estate and construction and land loans. Quantitative loss factors for SBF loans are based on historical charge-off rates published by the SBA. For Pinnacle, quantitative loss factors are based primarily on historical municipal default data. For most commercial portfolio segments, we use a 20 quarter look-back period in the calculation of historical net charge-off rates.

Where applicable, the peer group used to calculate average annual historical net charge-off rates used in estimating general reserves is made up of 26 banks included in the OCC Midsize Bank Group plus five additional banks not included in the OCC Midsize Bank Group that management believes to be comparable based on size, geography and nature of lending operations. Peer bank data is obtained from the Statistics on Depository Institutions Report published by the FDIC for the most recent quarter available. These banks, as a group, are considered by management to be comparable to BankUnited in size, nature of lending operations and loan portfolio composition. We evaluate the composition of the peer group annually, or more frequently if, in our judgment, a more frequent evaluation is necessary. Our internal risk rating system comprises 13 credit grades; grades 1 through 8 are "pass" grades. The risk ratings are driven largely by debt service coverage. Peer group historical loss rates are adjusted upward for loans assigned a lower "pass" rating.

As noted above, we generally use a 20 quarter look-back period to calculate quantitative loss rates. We believe this look-back period to be consistent with the range of industry practice and appropriate to capture a sufficient range of observations reflecting the performance of our loans, which were originated in the current economic cycle. With the exception of the Pinnacle municipal finance portfolio, a four quarter loss emergence period is used in the calculation of general reserves. A twelve quarter loss emergence period is used in the calculation of general reserves for the Pinnacle portfolio.

The primary assumptions underlying estimates of expected cash flows for ACI commercial loans are default probability and severity of loss given default. Assessments of default probability and severity are based on net realizable value analyses prepared at the individual loan level. Based on our analysis, no ALLL related to ACI commercial loans was recorded at December 31, 2018 or 2017.

Residential and other consumer loans

Non-covered Loans

The non-covered loan portfolio has not yet developed an observable loss trend. Therefore, the ALLL for non-covered residential loans is based primarily on relevant proxy historical loss rates. The ALLL for non-covered 1-4 single family residential loans, excluding government insured residential loans, is estimated using average annual loss rates on prime residential mortgage securitizations issued between 2003 and 2008 as a proxy. Based on the comparability of FICO scores and

LTV ratios between loans included in those securitizations and loans in the Bank's portfolio and the geographic diversity in the new purchased residential portfolio, we determined that prime residential mortgage securitizations provide an appropriate proxy for incurred losses in this portfolio class. A peer group 20-quarter average net charge-off rate is used to estimate the ALLL for the non-covered home equity and other consumer loan classes. See further discussion of peer group loss factors above. The non-covered home equity and other consumer loan portfolios are not significant components of the overall loan portfolio.

Covered non-ACI Loans

The methodology for estimating the ALLL for non-ACI 1-4 single family residential mortgages is consistent with the methodology used to calculate the ALLL for the non-covered residential portfolio segment discussed above.

Qualitative Factors

Qualitative adjustments are made to the ALLL when, based on management's judgment, there are internal or external factors impacting probable incurred losses not taken into account by the quantitative calculations. Potential qualitative adjustments are categorized as follows:

- Portfolio performance trends, including trends in and the levels of delinquencies, non-performing loans and classified loans;
- Changes in the nature of the portfolio and terms of the loans, specifically including the volume and nature of policy and procedural exceptions;
- Portfolio growth trends;
- Changes in lending policies and procedures, including credit and underwriting guidelines and portfolio management practices;
- Economic factors, including unemployment rates and GDP growth rates and other factors considered relevant by management;
- Changes in the value of underlying collateral;
- Quality of risk ratings, as evaluated by our independent credit review function;
- Credit concentrations;
- Changes in and experience levels of credit administration management and staff; and
- Other factors identified by management that may impact the level of losses inherent in the portfolio, including but not limited to competition and legal and regulatory considerations.

Covered ACI Loans

For ACI loans, a valuation allowance is established when periodic evaluations of expected cash flows reflect a deterioration resulting from credit related factors from the level of cash flows that were estimated to be collected at acquisition plus any additional expected cash flows arising from revisions in those estimates. We perform a quarterly analysis of expected cash flows for ACI loans.

Expected cash flows for ACI 1-4 single family residential loans are estimated at the pool level. The analysis of expected cash flows incorporates assumptions about expected prepayment rates, default rates, delinquency levels and loss severity given default.

No ALLL related to 1-4 single family residential ACI pools was recorded at December 31, 2018 or 2017.

The following tables provide an analysis of the ALLL, provision for loan losses and net charge-offs for the periods from December 31, 2013 through December 31, 2018 (in thousands):

	<u>Non-Covered Loans</u>	<u>Covered Loans</u>	<u>Total</u>
Balance at December 31, 2013	\$ 57,330	\$ 12,395	\$ 69,725

(1) Represents percentage of loans receivable in each category to total loans receivable.

The balance of the ALLL for non-covered loans at December 31, 2018 decreased \$34.6 million from the balance at December 31, 2017. This overall reduction in the ALLL was attributable to declines in both historical charge-off rates used to estimate general quantitative reserves and in certain qualitative loss factors as well as the elimination of specific reserves for the taxi medallion portfolio in conjunction with the sale of substantially all of the taxi medallion loans. Factors influencing the change in the ALLL related to specific loan types at December 31, 2018 as compared to December 31, 2017, include:

- A decrease of \$16.6 million for multi-family loans was primarily attributable to a decrease in the balance of loans outstanding, a decrease in certain qualitative loss factors and a decline in specific reserves for loans determined individually to be impaired.
- A decrease of \$10.4 million for non-owner occupied commercial real estate loans, despite an increase in the outstanding balance, was primarily attributable to decreases in both historical net charge-off rates for the peer group and certain qualitative loss factors.
- A decrease of \$3.8 million for owner occupied commercial real estate loans was primarily attributable to a decrease in specific reserves for one impaired loan relationship, which was fully charged-off during the year ended December 31, 2018, and a decrease in certain qualitative loss factors.
- A decrease of \$12.2 million for taxi medallion loans, resulting from the sale of substantially the entire portfolio during the fourth quarter 2018.
- An increase of \$4.6 million for other commercial and industrial loans was attributable to loan growth, offset by a decrease in the historical net charge-off rate.
- A \$2.3 million increase for Bridge franchise finance primarily reflected an increase in specific reserves for one impaired loan relationship and an increase in certain qualitative loss factors, partially offset by a decline in historical net charge-off rates.
- A \$2.5 million increase for Bridge equipment finance primarily reflected an increase in specific reserves for one impaired loan relationship, offset by a decline in the historical net charge-off rate and in certain qualitative factors.

For additional information about the ALLL, see Note 4 to the consolidated financial statements.

Goodwill

Goodwill consists of \$59 million recorded in conjunction with the FSB Acquisition, \$8 million recorded in conjunction with the acquisition of two commercial lending subsidiaries in 2010 and \$10 million recorded in conjunction with the SBF acquisition in May 2015. The Company has a single reporting unit. We perform goodwill impairment testing in the third quarter of each fiscal year. As of the 2018 impairment testing date, the estimated fair value of the reporting unit substantially exceeded its carrying amount; therefore, no impairment was indicated.

Deposits

A further breakdown of deposits as of December 31, 2018 and 2017 is shown below:

(1) Brokered deposits include

certain time deposits at December 31, 2018 and 2017.

The following table shows scheduled maturities of certificates of deposit with denominations greater than or equal to \$100,000 as of December 31, 2018 (in thousands):

Three months or less	\$ 1,233,867
Over three through six months	488,522
Over six through twelve months	1,236,723
Over twelve months	1,162,899
	\$ 4,122,011

See Note 8 to the consolidated financial statements for more information about the Company's deposits.

FHLB Advances, Notes and Other Borrowings

In addition to deposits, we utilize FHLB advances to fund growth in interest earning assets; the advances provide us with additional flexibility in managing both term and cost of funding. FHLB advances are secured by FHLB stock, qualifying residential first mortgage, commercial real estate and home equity loans, and MBS.

The Bank utilizes federal funds purchased to manage the daily cash position. At December 31, 2018, the Company had \$175 million in federal funds purchased.

See Note 9 to the consolidated financial statements for more information about the Company's FHLB advances and senior notes. Additionally, see Note 11 to the consolidated financial statements for more information about derivative instruments the Company uses to manage interest rate risk related to variability in cash flows due to changes in interest rates on variable rate borrowings.

Capital Resources

Pursuant to the FDIA, the federal banking agencies have adopted regulations setting forth a five-tier system for measuring the capital adequacy of the financial institutions they supervise. At December 31, 2018 and 2017, BankUnited and the Company had capital levels that exceeded both the regulatory well-capitalized guidelines and all internal capital ratio targets. See Note 14 to the Consolidated Financial Statements for more information about the Company's and the Bank's regulatory capital ratios.

Stockholders' equity decreased to \$2.9 billion at December 31, 2018, a decrease of \$102 million, or 3.38%, from December 31, 2017, due primarily to the repurchase of common shares and payment of dividends, offset by the retention of earnings. Our dividend payout ratio was 28.0% and 15.0% for the years ended December 31, 2018 and 2017, respectively.

In 2018, the Company repurchased approximately 8.4 million shares of common stock for an aggregate purchase price of approximately \$300 million.

In January 2019 the Board of Directors of the Company authorized the repurchase of up to an additional \$150 million in shares of its outstanding common stock, subject to any applicable regulatory approvals. Any repurchases will be made in accordance with applicable securities laws from time to time in open market or private transactions. The extent to which the Company repurchases shares, and the timing of such repurchases, will depend upon a variety of factors, including market conditions, the Company's capital position, regulatory requirements and other considerations. No time limit was set for the completion of the share repurchase program, and the program may be suspended or discontinued at any time.

We filed a shelf registration statement with the SEC in October 2018 that allows the Company to periodically offer and sell in one or more offerings, individually or in any combination, our common stock, preferred stock and other non-equity securities. The shelf registration provides us with flexibility in issuing capital instruments and enables us to more readily access the capital markets as needed to pursue future growth opportunities and to ensure continued compliance with regulatory capital requirements. Our ability to issue securities pursuant to the shelf registration is subject to market conditions.

Liquidity

Liquidity involves our ability to generate adequate funds to support planned interest earning asset growth, meet deposit withdrawal requests, maintain reserve requirements, conduct routine operations, pay dividends, service outstanding debt and meet other contractual obligations.

Primary sources of liquidity include cash flows from operations, deposit growth, the available for sale securities portfolio and FHLB advances.

For the years ended December 31, 2018, 2017 and 2016 net cash provided by operating activities was \$824.3 million, \$318.6 million, and \$308.5 million, respectively. Accretion on ACI loans, which is reflected as a non-cash reduction in net income to arrive at operating cash flows, totaled \$369.9 million, \$301.8 million and \$303.9 million for the years ended December 31, 2018, 2017 and 2016, respectively. Accretible yield on ACI loans represents the excess of expected future cash flows over the carrying amount of the loans, and is recognized as interest income over the expected lives of the loans. Amounts recorded as accretion are realized in cash as individual loans are paid down or otherwise resolved; however, the timing of cash realization may differ from the timing of income recognition. These cash flows from the repayment or resolution of covered loans, inclusive of amounts that have been accreted through earnings over time, are recognized as cash flows from investing activities in the consolidated statements of cash flows upon receipt. Cash payments from the FDIC in the form of reimbursements of losses related to the covered loans under the Single Family Shared-Loss Agreement are also characterized as investing cash flows. Cash generated by the repayment and resolution of covered loans and reimbursements from the FDIC totaled \$707.0 million, \$469.3 million and \$558.5 million for the years ended December 31, 2018, 2017 and 2016, respectively. The Single Family Shared-Loss Agreement was terminated on February 13, 2019.

In addition to cash provided by operating activities, the repayment and resolution of covered loans and payments under the Single Family Shared-Loss Agreement from the FDIC, BankUnited's liquidity needs, particularly liquidity to fund growth of interest earning assets, have been and continue to be met by deposit growth and FHLB advances. The investment portfolio also provides a source of liquidity.

BankUnited has access to additional liquidity through FHLB advances, other collateralized borrowings, wholesale deposits or the sale of available for sale securities. At December 31, 2018, unencumbered investment securities totaled \$5.9 billion. At December 31, 2018, BankUnited had available borrowing capacity at the FHLB of \$3.7 billion, unused borrowing capacity at the FRB of \$410 million and unused Federal funds lines of credit totaling \$85 million. Management also has the ability to exert substantial control over the rate and timing of growth of the loan portfolio, and resultant requirements for liquidity to fund loans.

Continued growth of deposits and loans are the most significant trends expected to impact the Bank's liquidity in the near term.

The ALCO policy has established several measures of liquidity which are monitored monthly by the ALCO and quarterly by the Board of Directors. One primary measure of liquidity monitored by management is the 30 day total liquidity ratio, defined as (a) the sum of cash and cash equivalents, pledgeable securities and a measure of funds expected to be generated by operations over the next 30 days; divided by (b) the sum of potential deposit runoff, liabilities maturing within the 30 day time frame and a measure of funds expected to be used in operations over the next 30 days. BankUnited's liquidity is considered acceptable if the 30 day total liquidity ratio exceeds 100%. At December 31, 2018, BankUnited's 30 day total liquidity ratio was 210%. Management also monitors a one year liquidity ratio, defined as (a) cash and cash equivalents, pledgeable securities, unused borrowing capacity at the FHLB, and loans and non-agency securities maturing within one year; divided by (b) forecasted deposit outflows and borrowings maturing within one year. This ratio allows management to monitor liquidity over a longer time horizon. The acceptable threshold established by the ALCO for this liquidity measure is 100%. At December 31, 2018, BankUnited's one year liquidity ratio was 165%. Additional measures of liquidity regularly monitored by the ALCO include the ratio of wholesale funding to total assets, a measure of available liquidity to volatile liabilities, the ratio of brokered deposits to total deposits, the ratio of FHLB advances to total funding, the percentage of investment securities backed by the U.S. government and government agencies and concentrations of large deposits. At December 31, 2018, BankUnited was within acceptable limits established by the ALCO and the Board of Directors for each of these measures.

As a holding company, BankUnited, Inc. is a corporation separate and apart from its banking subsidiary, and therefore, provides for its own liquidity. BankUnited, Inc.'s main sources of funds include management fees and dividends from the Bank, access to capital markets and, to a lesser extent, its own available for sale securities portfolio. There are regulatory limitations that affect the ability of the Bank to pay dividends to BankUnited, Inc. Management believes that such limitations will not impact our ability to meet our ongoing near-term cash obligations.

We expect that our liquidity requirements will continue to be satisfied over the next 12 months through the sources of funds described above.

Interest Rate Risk

The principal component of the Company's risk of loss arising from adverse changes in the fair value of financial instruments, or market risk, is interest rate risk, including the risk that assets and liabilities with similar re-pricing characteristics may not reprice at the same time or to the same degree. A primary objective of the Company's asset/liability management activities is to maximize net interest income, while maintaining acceptable levels of interest rate risk. The ALCO is responsible for establishing policies to limit exposure to interest rate risk, and to ensure procedures are established to monitor compliance with these policies. The guidelines established by the ALCO are approved at least annually by the Board of Directors.

Management believes that the simulation of net interest income in different interest rate environments provides the most meaningful measure of interest rate risk. Income simulation analysis is designed to capture not only the potential of all assets and liabilities to mature or reprice, but also the probability that they will do so. Income simulation also attends to the relative interest rate sensitivities of these items, and projects their behavior over an extended period of time. Finally, income simulation permits management to assess the probable effects on the balance sheet not only of changes in interest rates, but also of proposed strategies for responding to them.

The income simulation model analyzes interest rate sensitivity by projecting net interest income over twelve and twenty-four month periods in a most likely rate scenario based on consensus forward interest rate curves versus net interest income in alternative rate scenarios. Simulations are generated based on both static and dynamic balance sheet assumptions. Management continually reviews and refines its interest rate risk management process in response to changes in the interest rate environment and economic climate. Currently, our model projects instantaneous rate shocks of down 200, down100, plus 100, plus 200, plus 300 and plus 400 basis point shifts as well as flattening and inverted yield curve scenarios. We continually evaluate the scenarios being modeled with a view toward adapting them to changing economic conditions, expectations and trends.

The Company's ALCO policy provides that net interest income sensitivity will be considered acceptable if decreases in forecast net interest income, based on a dynamic forecasted balance sheet, in specified rate shock scenarios are within specified percentages of forecast net interest income in the most likely rate scenario over the next twelve months and in the second year. The following table illustrates the acceptable limits as defined by policy and the impact on forecasted net interest income of down 200, down 100, plus 100, plus 200, plus 300 and plus 400 basis point rate shock scenarios at December 31, 2018 and 2017:

	Down 200	Down 100	Plus 100	Plus 200	Plus 300	Plus 400
Policy Limits:						
In year 1	(10.0)%	(6.0)%	(6.0)%	(10.0)%	(14.0)%	(18.0)%
In year 2	(13.0)%	(9.0)%	(9.0)%	(13.0)%	(17.0)%	(21.0)%
Model Results at December 31, 2018 - increase (decrease):						
In year 1	(4.3)%	(0.8)%	0.3 %	(0.9)%	(2.4)%	(5.6)%
In year 2	(9.7)%	(3.0)%	3.6 %	4.4 %	4.0 %	3.1 %
Model Results at December 31, 2017 - increase (decrease):						
In year 1	N/A	(0.3)%	(0.1)%	(0.5)%	(1.4)%	(2.7)%
In year 2	N/A	(3.5)%	1.8 %	3.2 %	4.3 %	4.8 %

Management also simulates changes in EVE in various interest rate environments. The ALCO policy has established parameters of acceptable risk that are defined in terms of the percentage change in EVE from a base scenario under eight rate scenarios, derived by implementing immediate parallel movements of plus and down 100, 200, 300 and 400 basis points from current rates. Prior to December 31, 2018, we did not simulate decreases in interest rates greater than 200 basis points due to lower rate environment at that time. The following table illustrates the acceptable limits as established by ALCO and the modeled change in EVE in plus or down 200, down 100, plus 200, plus 300 and plus 400 basis point scenarios at December 31, 2018 and 2017:

	Down 200	Down 100	Plus 100	Plus 200	Plus 300	Plus 400
Policy Limits	(18.0)%	(9.0)%	(9.0)%	(18.0)%	(27.0)%	(36.0)%
Model Results at December 31, 2018 - increase (decrease):	0.6 %	2.5 %	(3.1)%	(7.5)%	(12.4)%	(17.3)%
Model Results at December 31, 2017 - increase (decrease):	N/A	1.9 %	(3.8)%	(8.0)%	(12.4)%	(16.9)%

These measures fall within an acceptable level of interest rate risk per the policies established by the ALCO and the Board of Directors. In the event the models indicate an unacceptable level of risk, the Company could undertake a number of actions that would reduce this risk, including the sale or re-positioning of a portion of its investment portfolio, restructuring of borrowings, or the use of derivatives such as interest rate swaps and caps.

Many assumptions were used by the Company to calculate the impact of changes in interest rates, including the change in rates. Actual results may not be similar to the Company's projections due to several factors including the timing and frequency of rate changes, market conditions, changes in depositor behavior and the shape of the yield curve. Actual results may also differ due to the Company's actions, if any, in response to changing rates and conditions.

Derivative Financial Instruments

Interest rate swaps are one of the tools we use to manage interest rate risk. These derivative instruments are used to mitigate exposure to changes in interest rates on variable rate borrowings such as FHLB advances and to manage duration of liabilities. These interest rate swaps are designated as cash flow hedging instruments. The fair value of these instruments is included in other assets and other liabilities in our consolidated balance sheets and changes in fair value are reported in accumulated other comprehensive income. At December 31, 2018, outstanding interest rate swaps designated as cash flow hedges had an aggregate notional amount of \$2.8 billion. The aggregate fair value of interest rate swaps designated as cash flow hedges included in other assets was \$3.4 million.

Interest rate swaps and caps not designated as cash flow hedges had an aggregate notional amount of \$2.3 billion at December 31, 2018. The aggregate fair value of these interest rate swaps and caps included in other assets was \$26.2 million and the aggregate fair value included in other liabilities was \$23.9 million. These interest rate swaps and caps were entered into as accommodations to certain of our commercial borrowers.

See Note 11 to the consolidated financial statements for additional information about derivative financial instruments.

Off-Balance Sheet Arrangements

We routinely enter into commitments to extend credit to our customers, including commitments to fund loans or lines of credit and commercial and standby letters of credit. The credit risk associated with these commitments is essentially the same as that involved in extending loans to customers and they are subject to our normal credit policies and approval processes. While these commitments represent contractual cash requirements, a significant portion of commitments to extend credit may expire without being drawn upon.

For more information on commitments, see Note 16 to the consolidated financial statements.

Contractual Obligations

The following table contains supplemental information regarding our significant outstanding contractual obligations, including interest to be paid on FHLB advances, long-term borrowings and time deposits, as of December 31, 2018 (in thousands):

	Total	Less than 1 year	1 - 3 years	3 - 5 years	More than 5 years
FHLB advances	\$ 4,860,020	\$ 4,191,503	\$ 668,517	\$ —	\$ —
4.875% Senior notes due 2025	536,500	19,500	39,000	39,000	439,000

Time deposits	6,955,654	5,225,960	1,654,991	74,703	—
Capital lease obligations	12,808	1,878	3,928	4,177	2,825
	<u>\$ 12,485,085</u>	<u>\$ 9,460,048</u>	<u>\$ 2,399,923</u>	<u>\$ 140,305</u>	<u>\$ 484,809</u>

Non-GAAP Financial Measures

Tangible book value per common share is a non-GAAP financial measure. Management believes this measure is relevant to understanding the capital position and performance of the Company. Disclosure of this non-GAAP financial measure also provides a meaningful base for comparability to other financial institutions. The following table reconciles the non-GAAP financial measurement of tangible book value per common share to the comparable GAAP financial measurement of book value per common share at December 31, of the years indicated (in thousands except share and per share data):

	2018	2017	2016	2015	2014
Total stockholders' equity	\$ 2,923,833	\$ 3,026,062	\$ 2,418,429	\$ 2,243,898	\$ 2,052,534
Less: goodwill and other intangible assets	77,718	77,796	78,047	78,330	68,414
Tangible stockholders' equity	\$ 2,846,115	\$ 2,948,266	\$ 2,340,382	\$ 2,165,568	\$ 1,984,120
Common shares issued and outstanding	99,141,374	106,848,185	104,166,945	103,626,255	101,656,702
Book value per common share	\$ 29.49	\$ 28.32	\$ 23.22	\$ 21.65	\$ 20.19
Tangible book value per common share	\$ 28.71	\$ 27.59	\$ 22.47	\$ 20.90	\$ 19.52
Total assets	\$ 32,164,326	\$ 30,346,986	\$ 27,880,151	\$ 23,883,467	\$ 19,210,529
Less: goodwill and other intangible assets	77,718	77,796	78,047	78,330	68,414
Tangible assets	\$ 32,086,608	\$ 30,269,190	\$ 27,802,104	\$ 23,805,137	\$ 19,142,115
Equity to assets ratio	9.09%	9.97%	8.67%	9.40%	10.68%
Tangible common equity to tangible assets ratio	8.87%	9.74%	8.42%	9.10%	10.37%

Net income and earnings per diluted common share, in each case excluding the impact of a discrete income tax benefit and related professional fees are non-GAAP financial measures. Management believes disclosure of these measures enhances readers' ability to compare the Company's financial performance for the current period to that of other periods presented. The following table reconciles these non-GAAP financial measurements to the comparable GAAP financial measurements of net income and earnings per diluted common share for the year ended December 31, 2017 (in thousands except share and per share data):

	Year Ended December 31, 2017
Net income excluding the impact of a discrete income tax benefit and related professional fees:	
Net income (GAAP)	\$ 614,273
Less discrete income tax benefit	(327,945)
Add back related professional fees (net of tax of \$1,802 and \$524)	4,995
Net income excluding the impact of a discrete income tax benefit and related professional fees (non-GAAP)	\$ 291,323
Diluted earnings per common share, excluding the impact of a discrete income tax benefit and related professional fees:	
Diluted earnings per common share (GAAP)	\$ 5.58
Less impact on diluted earnings per common share of discrete income tax benefit and related professional fees, before allocation to participating securities (non-GAAP)	(3.05)
Less impact on diluted earnings per common share of discrete income tax benefit and related professional fees allocated to participating securities (non-GAAP)	0.12
Diluted earnings per common share, excluding the impact of a discrete income tax benefit and related professional fees (non-GAAP)	\$ 2.65
Impact on diluted earnings per common share of discrete income tax benefit and related professional fees, before allocation to participating securities:	
Discrete income tax benefit and related professional fees, net of tax	\$ 322,950
Weighted average shares for diluted earnings per share (GAAP)	105,857,487
Impact on diluted earnings per common share of discrete income tax benefit and related professional fees, before allocation to participating securities (non-GAAP)	\$ 3.05
Impact on diluted earnings per common share of discrete income tax benefit and related professional fees allocated to participating securities:	
Discrete income tax benefit and related professional fees, net of tax, allocated to participating securities	\$ (12,424)
Weighted average shares for diluted earnings per share (GAAP)	105,857,487
Impact on diluted earnings per common share of discrete income tax benefit and related professional fees allocated to participating securities (non-GAAP)	\$ (0.12)

The effective tax rate excluding the impact of the discrete income tax benefit and the impact of the change in the federal statutory rate on existing deferred tax assets and liabilities is a non-GAAP financial measure. Management believes disclosure of this measure enhances readers' ability to compare the Company's financial performance for the current period to that of other periods presented. The following table reconciles this non-GAAP financial measurement to the comparable GAAP financial measurement of the effective tax rate for the for the year ended December 31, 2017 (dollars in thousands):

	Year Ended December 31, 2017
Effective income tax rate, excluding the impact of a discrete income tax benefit and impact of enactment of the Tax Cuts and Jobs Act of 2017:	
Effective income tax rate (GAAP)	(51.9)%
Less impact on effective income tax rate of discrete income tax benefit and enactment of the Tax Cuts and Jobs Act of 2017 (non-GAAP)	82.0 %
Effective income tax rate, excluding the impact of a discrete income tax benefit and enactment of the Tax Cuts and Jobs Act of 2017 (non-GAAP)	30.1 %
Impact on effective income tax rate of discrete income tax benefit and enactment of the Tax Cuts and Jobs Act of 2017 (non-GAAP):	
Discrete income tax benefit	\$ (327,945)
Tax benefit recognized from enactment of the Tax Cuts and Jobs Act of 2017	(3,744)
	\$ (331,689)
Income before income taxes (GAAP)	404,461
Impact on effective income tax rate of discrete income tax benefit and enactment of the Tax Cuts and Jobs Act of 2017 (non-GAAP)	(82.0)%

MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

Management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in the Securities Exchange Act of 1934 Rule 13a-15(f). The Company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

Internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements prepared for external purposes in accordance with generally accepted accounting principles. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Under the supervision and with the participation of management, including the Company's principal executive officer and principal financial officer, the Company conducted an evaluation of the effectiveness of the Company's internal control over financial reporting based on the framework in *Internal Control—Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on the Company's evaluation under the framework in *Internal Control—Integrated Framework*, management concluded that the Company's internal control over financial reporting was effective as of December 31, 2018.

The effectiveness of the Company's internal control over financial reporting as of December 31, 2018 has been audited by KPMG LLP, an independent registered public accounting firm, as stated in their report which is included herein.

Report of Independent Registered Public Accounting Firm

To the stockholders and board of directors
BankUnited, Inc.:

Opinion on the Consolidated Financial Statements

We have audited the accompanying consolidated balance sheets of BankUnited, Inc. and subsidiaries (the "Company") as of December 31, 2018 and 2017, the related consolidated statements of income, comprehensive income, cash flows, and stockholders' equity for each of the years in the three-year period ended December 31, 2018, and the related notes (collectively, the "consolidated financial statements"). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2018 and 2017, and the results of its operations and its cash flows for each of the years in the three-year period ended December 31, 2018, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) ("PCAOB"), the Company's internal control over financial reporting as of December 31, 2018, based on criteria established in *Internal Control - Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission, and our report dated February 27, 2019 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

Basis for Opinion

These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that our audits provide a reasonable basis for our opinion.

/s/KPMG LLP

We have served as the Company's auditor since 2009.

Miami, Florida
February 27, 2019

Report of Independent Registered Public Accounting Firm

To the stockholders and board of directors
BankUnited, Inc.:

Opinion on Internal Control Over Financial Reporting

We have audited BankUnited, Inc.'s and subsidiaries' (the "Company") internal control over financial reporting as of December 31, 2018, based on criteria established in *Internal Control - Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2018, based on criteria established in *Internal Control - Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) ("PCAOB"), the consolidated balance sheets of the Company as of December 31, 2018 and 2017, the related consolidated statements of income, comprehensive income, cash flows, and stockholders' equity for each of the years in the three-year period ended December 31, 2018, and the related notes (collectively, the "consolidated financial statements"), and our report dated February 27, 2019 expressed an unqualified opinion on those consolidated financial statements.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control Over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

BANKUNITED, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2018

Note 1 Basis of Presentation and Summary of Significant Accounting Policies

BankUnited, Inc. is a national bank holding company with one wholly-owned subsidiary, BankUnited; collectively, the Company. BankUnited, a national banking association headquartered in Miami Lakes, Florida, provides a full range of banking and related services to individual and corporate customers in its geographic footprint in Florida and the New York metropolitan area. The Bank also offers certain commercial lending and deposit products through national platforms.

In connection with the FSB Acquisition, BankUnited entered into two loss sharing agreements with the FDIC. The Loss Sharing Agreements consisted of the Single Family Shared-Loss Agreement and the Commercial Shared-Loss Agreement. Assets covered by the Loss Sharing Agreements are referred to as covered assets or, in certain cases, covered loans. The Single Family Shared-Loss Agreement provided for FDIC loss sharing and the Bank's reimbursement for recoveries to the FDIC through its termination on February 13, 2019 for single family residential loans and OREO. Loss sharing under the Commercial Shared-Loss Agreement terminated on May 21, 2014. The Commercial Shared-Loss Agreement continued to provide for the Bank's reimbursement of recoveries to the FDIC through June 30, 2017 for all other covered assets, including commercial real estate, commercial and industrial and consumer loans, certain investment securities and commercial OREO. Pursuant to the terms of the Loss Sharing Agreements, the covered assets were subject to a stated loss threshold whereby the FDIC reimbursed BankUnited for 80% of losses related to the covered assets up to \$4.0 billion and 95% of losses in excess of this amount, beginning with the first dollar of loss incurred.

The consolidated financial statements have been prepared in accordance with GAAP and prevailing practices in the banking industry.

The Company has a single reportable segment.

Accounting Estimates

In preparing the consolidated financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, and expenses and disclosures of contingent assets and liabilities. Actual results could differ significantly from these estimates.

Significant estimates include the ALLL, the amount and timing of expected cash flows from covered assets and the FDIC indemnification asset, and the fair values of investment securities and other financial instruments.

Principles of Consolidation

The consolidated financial statements include the accounts of BankUnited, Inc. and its wholly-owned subsidiary. All significant intercompany balances and transactions have been eliminated in consolidation. VIEs are consolidated if the Company is the primary beneficiary; i.e., has (i) the power to direct the activities of the VIE that most significantly impact the VIE's economic performance and (ii) the obligation to absorb losses or the right to receive benefits that could potentially be significant to the VIE. The Company has variable interests in affordable housing limited partnerships that are not required to be consolidated because the Company is not the primary beneficiary.

Fair Value Measurements

Certain of the Company's assets and liabilities are reflected in the consolidated financial statements at fair value on either a recurring or non-recurring basis. Investment securities available for sale, marketable equity securities, servicing rights and derivative instruments are measured at fair value on a recurring basis. Assets measured at fair value or fair value less cost to sell on a non-recurring basis may include collateral dependent impaired loans, OREO and other repossessed assets, loans held for sale, goodwill and impaired long-lived assets. These non-recurring fair value measurements typically involve lower-of-cost-or-market accounting or the measurement of impairment of certain assets.

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants at the measurement date. GAAP establishes a hierarchy that prioritizes inputs used to determine fair value measurements into three levels based on the observability and transparency of the inputs:

BANKUNITED, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2018

- Level 1 inputs are unadjusted quoted prices in active markets that are accessible at the measurement date for identical assets or liabilities.
- Level 2 inputs are observable inputs other than level 1 inputs, including quoted prices for similar assets and liabilities, quoted prices for identical assets and liabilities in less active markets and other inputs that can be corroborated by observable market data.
- Level 3 inputs are unobservable inputs supported by limited or no market activity or data and inputs requiring significant management judgment or estimation.

The fair value hierarchy requires the Company to maximize the use of observable inputs and minimize the use of unobservable inputs in estimating fair value. Unobservable inputs are utilized in determining fair value measurements only to the extent that observable inputs are unavailable. The need to use unobservable inputs generally results from a lack of market liquidity and diminished observability of actual trades or assumptions that would otherwise be available to value a particular asset or liability.

Cash and Cash Equivalents

Cash and cash equivalents include cash and due from banks, both interest bearing and non-interest bearing, including amounts on deposit at the Federal Reserve Bank, and federal funds sold. Cash equivalents have original maturities of three months or less. For purposes of reporting cash flows, cash receipts and payments pertaining to FHLB advances with original maturities of three months or less are reported net.

Investment Securities

Debt securities that the Company has the positive intent and ability to hold to maturity are classified as held to maturity and reported at amortized cost. Debt securities that the Company may not have the intent to hold to maturity are classified as available for sale at the time of acquisition and carried at fair value with unrealized gains and losses, net of tax, excluded from earnings and reported in AOCI, a separate component of stockholders' equity. Securities classified as available for sale may be used as part of the Company's asset/liability management strategy and may be sold in response to liquidity needs, regulatory changes, changes in interest rates, prepayment risk or other market factors. The Company does not maintain a trading portfolio. Purchase premiums and discounts on debt securities are amortized as adjustments to yield over the expected lives of the securities, using the level yield method. Premiums are amortized to the call date if the call is considered to be clearly and closely related to the host contract. Realized gains and losses from sales of securities are recorded on the trade date and are determined using the specific identification method.

The Company reviews investment securities for OTTI at least quarterly. An investment security is impaired if its fair value is lower than its amortized cost basis. The Company considers many factors in determining whether a decline in fair value below amortized cost represents OTTI, including, but not limited to:

- the Company's intent to hold the security until maturity or for a period of time sufficient for a recovery in value;
- whether it is more likely than not that the Company will be required to sell the security prior to recovery of its amortized cost basis;
- the length of time and extent to which fair value has been less than amortized cost;
- adverse changes in expected cash flows;
- collateral values and performance;
- the payment structure of the security including levels of subordination or over-collateralization;
- changes in the economic or regulatory environment;
- the general market condition of the geographic area or industry of the issuer;
- the issuer's financial condition, performance and business prospects; and
- changes in credit ratings.

BANKUNITED, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2018

The relative importance assigned to each of these factors varies depending on the facts and circumstances pertinent to the individual security being evaluated.

The Company recognizes OTTI of a debt security for which there has been a decline in fair value below amortized cost if (i) management intends to sell the security, (ii) it is more likely than not that the Company will be required to sell the security before recovery of its amortized cost basis, or (iii) the Company does not expect to recover the entire amortized cost basis of the security. If the Company intends to sell the security, or if it is more likely than not it will be required to sell the security before recovery, an OTTI write-down is recognized in earnings equal to the entire difference between the amortized cost basis and fair value of the security. Otherwise, the amount by which amortized cost exceeds the fair value of a debt security that is considered to be other-than-temporarily impaired is separated into a component representing the credit loss, which is recognized in earnings, and a component related to all other factors, which is recognized in other comprehensive income. The measurement of the credit loss component is equal to the difference between the debt security's amortized cost basis and the present value of its expected future cash flows discounted at the security's effective yield.

Marketable equity securities with readily determinable fair values are reported at fair value with unrealized gains and losses included in earnings effective January 1, 2018. Equity securities that do not have readily determinable fair values are reported at cost and re-measured at fair value upon occurrence of an observable price change or recognition of impairment.

Non-marketable Equity Securities

The Bank, as a member of the FRB system and the FHLB, is required to maintain investments in the stock of the FRB and FHLB. No market exists for this stock, and the investment can be liquidated only through redemption by the respective institutions, at the discretion of and subject to conditions imposed by those institutions. The stock has no readily determinable fair value and is carried at cost. Historically, stock redemptions have been at par value, which equals the Company's carrying value. The Company monitors its investment in FHLB stock for impairment through review of recent financial results of the FHLB, including capital adequacy and liquidity position, dividend payment history, redemption history and information from credit agencies. The Company has not identified any indicators of impairment of FHLB stock.

Loans Held for Sale

The guaranteed portion of SBA and USDA loans originated with the intent to sell are carried at the lower of cost or fair value, determined in the aggregate. A valuation allowance is established through a charge to earnings if the aggregate fair value of such loans is lower than their cost. Gains or losses recognized upon sale are determined on the specific identification basis.

Loans not originated or otherwise acquired with the intent to sell are transferred into the held for sale classification at the lower of carrying amount or fair value when they are specifically identified for sale and a formal plan exists to sell them. Acquired credit impaired loans accounted for in pools are removed from the pools at their carrying amounts when they are sold.

Loans

The Company's loan portfolio contains 1-4 single family residential first mortgages, government insured residential mortgages, home equity loans and lines of credit, consumer, multi-family, owner and non-owner occupied commercial real estate, construction and land, and commercial and industrial loans, mortgage warehouse lines of credit and direct financing leases. The Company segregates its loan portfolio between covered and non-covered loans. Covered loans are loans acquired from the FDIC in the FSB Acquisition that are covered under the Single Family Shared-Loss Agreement. Covered loans are further segregated between ACI loans and non-ACI loans.

Non-covered Loans

Non-covered loans, other than non-covered ACI loans, are carried at UPB, net of premiums, discounts, unearned income, deferred loan origination fees and costs, and the ALLL

Interest income on these loans is accrued based on the principal amount outstanding. Non-refundable loan origination fees, net of direct costs of originating or acquiring loans, as well as purchase premiums and discounts, are deferred and recognized as adjustments to yield over the contractual lives of the related loans using the level yield method.

BANKUNITED, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2018

Direct Financing Leases

Direct financing leases are carried at the aggregate of lease payments receivable and estimated residual value of the leased property, if applicable, less unearned income. Interest income on direct financing leases is recognized over the term of the leases to achieve a constant periodic rate of return on the outstanding investment. Initial direct costs are deferred and amortized over the lease term as a reduction to interest income using the effective interest method.

ACI Loans

ACI loans, all of which were acquired in the FSB Acquisition and the substantial majority of which are covered under the Single Family Shared-Loss Agreement, are those for which, at acquisition, management determined it probable that the Company would be unable to collect all contractual principal and interest payments due. These loans were recorded at estimated fair value at acquisition, measured as the present value of all cash flows expected to be received, discounted at an appropriately risk-adjusted discount rate. Initial cash flow expectations incorporated significant assumptions regarding prepayment rates, frequency of default and loss severity.

The difference between total contractually required payments on ACI loans and the cash flows expected to be received represents non-accretable difference. The excess of all cash flows expected to be received over the Company's recorded investment in the loans represents accretable yield and is recognized as interest income on a level-yield basis over the expected life of the loans.

The Company aggregated ACI 1-4 single family residential mortgage loans and home equity loans and lines of credit with similar risk characteristics into homogenous pools at acquisition. A composite interest rate and composite expectations of future cash flows are used in accounting for each pool. These loans were aggregated into pools based on the following characteristics:

- delinquency status;
- product type, in particular, amortizing as opposed to option ARMs;
- loan-to-value ratio; and
- borrower FICO score.

Loans that do not have similar risk characteristics, primarily commercial and commercial real estate loans, are accounted for on an individual loan basis using interest rates and expectations of cash flows for each loan.

The Company is required to develop reasonable expectations about the timing and amount of cash flows to be collected related to ACI loans and to continue to update those estimates over the lives of the loans. Expected cash flows from ACI loans are updated quarterly. If it is probable that the Company will be unable to collect all the cash flows expected from a loan or pool at acquisition plus additional cash flows expected to be collected arising from changes in estimates after acquisition, the loan or pool is considered impaired and a valuation allowance is established by a charge to the provision for loan losses. If there is an increase in expected cash flows from a loan or pool, the Company first reduces any valuation allowance previously established by the amount of the increase in the present value of expected cash flows, and then recalculates the amount of accretable yield for that loan or pool. The adjustment of accretable yield due to an increase in expected cash flows, as well as changes in expected cash flows due to changes in interest rate indices and changes in prepayment assumptions is accounted for prospectively as a change in yield. Additional cash flows expected to be collected are transferred from non-accretable difference to accretable yield and the amount of periodic accretion is adjusted accordingly over the remaining life of the loan or pool.

The Company may resolve an ACI loan either through a sale of the loan, by working with the customer and obtaining partial or full repayment, by short sale of the collateral, or by foreclosure. When a loan accounted for in a pool is resolved, it is removed from the pool at its allocated carrying amount. In the event of a sale of the loan, the Company recognizes a gain or loss on sale based on the difference between the sales proceeds and the carrying amount of the loan. For loans resolved through pre-payment or short sale of the collateral, the Company recognizes the difference between the amount of the payment received and the carrying amount of the loan in the income statement line item "Income from resolution of covered assets, net". For loans resolved through foreclosure, the difference between the fair value of the collateral obtained through foreclosure less estimated cost to sell and the carrying amount of the loan is recognized in the income statement line item "Income from resolution of covered assets, net". Any remaining accretable discount related to loans not accounted for in pools that are

BANKUNITED, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2018

resolved by full or partial pre-payment, short sale or foreclosure is recognized in interest income at the time of resolution, to the extent collected.

Payments received earlier than expected or in excess of expected cash flows from sales or other resolutions may result in the carrying value of a pool being reduced to zero even though outstanding contractual balances and expected cash flows remain related to loans in the pool. Once the carrying value of a pool is reduced to zero, any future proceeds, which may include cash or real estate acquired in foreclosure, from the remaining loans, representing further realization of accretable yield, are recognized as interest income upon receipt.

Covered Non-ACI Loans

Loans acquired in the FSB Acquisition without evidence of deterioration in credit quality since origination were initially recorded at estimated fair value on the acquisition date. Non-ACI 1-4 single family residential mortgage loans and home equity loans and lines of credit with similar risk characteristics were aggregated into pools for accounting purposes at acquisition. Non-ACI loans are carried at the principal amount outstanding, adjusted for unamortized acquisition date fair value adjustments and the ALLL. Interest income is accrued based on the UPB and, with the exception of home equity loans and lines of credit, acquisition date fair value adjustments are amortized using the level-yield method over the expected lives of the related loans. For non-ACI 1-4 family residential mortgage loans accounted for in pools, prepayment estimates are used in determining the periodic amortization of acquisition date fair value adjustments. Acquisition date fair value adjustments related to revolving home equity loans and lines of credit are amortized on a straight-line basis.

Non-accrual Loans

Commercial loans, other than ACI loans, are placed on non-accrual status when (i) management has determined that full repayment of all contractual principal and interest is in doubt, or (ii) the loan is past due 90 days or more as to principal or interest unless the loan is well secured and in the process of collection. Residential and consumer loans, other than ACI loans, are generally placed on non-accrual status when 90 days of interest is due and unpaid. When a loan is placed on non-accrual status, uncollected interest accrued is reversed and charged to interest income. Payments received on nonaccrual commercial loans are applied as a reduction of principal. Interest payments are recognized as income on a cash basis on nonaccrual residential loans. Commercial loans are returned to accrual status only after all past due principal and interest has been collected and full repayment of remaining contractual principal and interest is reasonably assured. Residential and consumer loans are returned to accrual status when there is no longer 90 days of interest due and unpaid. Past due status of loans is determined based on the contractual next payment due date. Loans less than 30 days past due are reported as current.

Contractually delinquent ACI loans are not classified as non-accrual as long as discount continues to be accreted on the loans or pools.

Impaired Loans

Loans, other than ACI loans and government insured residential loans, are considered impaired when, based on current information and events, it is probable that the Company will be unable to collect the scheduled payments of principal or interest when due, according to the contractual terms of the loan agreements. Commercial relationships with committed balances greater than or equal to \$1.0 million that have internal risk ratings of substandard or doubtful and are on non-accrual status, as well as loans that have been modified in TDRs, are individually evaluated for impairment. Other commercial relationships on non-accrual status with committed balances under \$1.0 million may also be evaluated individually for impairment at management's discretion. The likelihood of loss related to loans assigned internal risk ratings of substandard or doubtful is considered elevated due to their identified credit weaknesses. Factors considered by management in evaluating impairment include payment status, financial condition of the borrower, collateral value, and other factors impacting the probability of collecting scheduled principal and interest payments when due.

An ACI pool or loan is considered to be impaired when it is probable that the Company will be unable to collect all the cash flows expected at acquisition, plus additional cash flows expected to be collected arising from changes in estimates after acquisition. 1-4 single family residential and home equity ACI loans accounted for in pools are evaluated collectively for impairment on a pool by pool basis based on expected pool cash flows. Commercial ACI loans are individually evaluated for impairment based on expected cash flows from the individual loans. Discount continues to be accreted on ACI loans or pools as long as there are expected future cash flows in excess of the current carrying amount of the loans or pools.

BANKUNITED, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2018

Troubled Debt Restructurings

In certain situations, due to economic or legal reasons related to a borrower's financial difficulties, the Company may grant a concession to the borrower for other than an insignificant period of time that it would not otherwise consider. At that time, except for ACI loans accounted for in pools, the related loan is classified as a TDR and considered impaired. The concessions granted may include rate reductions, principal forgiveness, payment forbearance, extensions of maturity at rates of interest below that commensurate with the risk profile of the loans, modification of payment terms and other actions intended to minimize economic loss. A TDR is generally placed on non-accrual status at the time of the modification unless the borrower was performing prior to the restructuring. Modified ACI loans accounted for in pools are not accounted for as TDRs, are not separated from the pools and are not classified as impaired loans.

Allowance for Loan and Lease Losses

The ALLL represents the amount considered adequate by management to absorb probable incurred losses inherent in the loan portfolio at the balance sheet date. The ALLL consists of both specific and general components. The ALLL is established as losses are estimated to have occurred through a provision charged to earnings. Individual loans are charged off against the ALLL when management determines them to be uncollectible.

An assessment of collateral value is made at no later than 120 days delinquency for non-covered open- and closed-end loans secured by residential real estate; any outstanding loan balance in excess of fair value less cost to sell is charged off at no later than 180 days delinquency. Additionally, any outstanding balance in excess of fair value of collateral less cost to sell is charged off (i) within 60 days of receipt of notification of filing from the bankruptcy court, (ii) within 60 days of determination of loss if all borrowers are deceased or (iii) within 90 days of discovery of fraudulent activity. Covered non-ACI loans secured by residential real estate are generally charged off at final resolution which is consistent with the terms of the Single Family Shared-Loss Agreement. Consumer loans are typically charged off at 120 days delinquency. Commercial loans are charged off when management deems them to be uncollectible. Subsequent recoveries are credited to the ALLL.

Commercial loans

The allowance is comprised of specific reserves for loans that are individually evaluated and determined to be impaired as well as general reserves for loans that have not been identified as impaired.

Management believes that loans rated special mention, substandard or doubtful that are not individually evaluated for impairment exhibit characteristics indicative of a heightened level of credit risk. A quantitative loss factor is applied to loans rated special mention based on average annual probability of default and implied severity, derived from internal and external data. Loss factors for substandard and doubtful loans that are not individually evaluated are determined by using default frequency and severity information applied at the loan level. Estimated default frequencies and severities are based on available industry and internal data. In addition, a floor is applied to these calculated loss factors, based on the loss factor applied to the special mention portfolio.

To the extent, in management's judgment, commercial portfolio segments have sufficient observable loss history, the quantitative portion of the ALLL is based on the Bank's historical net charge-off rates. These commercial segments include commercial and industrial loans and the Bridge portfolios. For commercial portfolio segments that have not yet exhibited an observable loss trend, the quantitative loss factors are based on peer group average annual historical net charge-off rates by loan class and the Company's internal credit risk rating system. These commercial segments include multifamily, non-owner occupied commercial real estate and construction and land loans. Quantitative loss factors for SBF loans are based on historical charge-off rates published by the SBA. For Pinnacle, quantitative loss factors are based primarily on historical municipal default data. For most commercial portfolio segments, we use a 20 quarter look-back period in the calculation of historical net charge-off rates.

Where applicable, the peer group used to calculate average annual historical net charge-off rates used in estimating general reserves is made up of 26 banks included in the OCC Midsize Bank Group plus five additional banks not included in the OCC Midsize Bank Group that management believes to be comparable based on size, geography and nature of lending operations. Peer bank data is obtained from the Statistics on Depository Institutions Report published by the FDIC for the most recent quarter available. These banks, as a group, are considered by management to be comparable to BankUnited in size, nature of lending operations and loan portfolio composition. We evaluate the composition of the peer group annually, or more frequently if, in our judgment, a more frequent evaluation is necessary. Our internal risk rating system comprises 13 credit grades; grades 1

BANKUNITED, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2018

through 8 are “pass” grades. The risk ratings are driven largely by debt service coverage. Peer group historical loss rates are adjusted upward for loans assigned a lower “pass” rating.

As noted above, management generally use a 20 quarter look-back period to calculate quantitative loss rates. Management believes this look-back period to be consistent with the range of industry practice and appropriate to capture a sufficient range of observations reflecting the performance of our loans, which were originated in the current economic cycle. With the exception of the Pinnacle municipal finance portfolio, a four quarter loss emergence period is used in the calculation of general reserves. A twelve quarter loss emergence period is used in the calculation of general reserves for the Pinnacle portfolio.

The primary assumptions underlying estimates of expected cash flows for ACI commercial loans are default probability and severity of loss given default. Assessments of default probability and severity are based on net realizable value analyses prepared at the individual loan level.

Residential and other consumer loans

Non-covered Loans

The non-covered loan portfolio has not yet developed an observable loss trend. Therefore, the ALLL for non-covered residential loans is based primarily on relevant proxy historical loss rates. The ALLL for non-covered 1-4 single family residential loans, excluding government insured residential loans, is estimated using average annual loss rates on prime residential mortgage securitizations issued between 2003 and 2008 as a proxy. Based on the comparability of FICO scores and LTV ratios between loans included in those securitizations and loans in the Bank’s portfolio and the geographic diversity in the new purchased residential portfolio, we determined that prime residential mortgage securitizations provide an appropriate proxy for incurred losses in this portfolio class. A peer group 18-quarter average net charge-off rate is used to estimate the ALLL for the non-covered home equity and other consumer loan classes. The non-covered home equity and other consumer loan portfolios are not significant components of the overall loan portfolio. No quantitative ALLL is provided for U.S. Government insured residential loans.

Covered non-ACI Loans

The reserving methodology for the non-ACI 1-4 single family residential mortgages is consistent with the methodology to calculate the ALLL for non-covered residential portfolio segment discussed above.

Qualitative Factors

Qualitative adjustments are made to the ALLL when, based on management’s judgment, there are internal or external factors impacting probable incurred losses not taken into account by the quantitative calculations. Potential qualitative adjustments are categorized as follows:

- Portfolio performance trends, including trends in and the levels of delinquencies, non-performing loans and classified loans;
- Changes in the nature of the portfolio and terms of the loans, specifically including the volume and nature of policy and procedural exceptions;
- Portfolio growth trends;
- Changes in lending policies and procedures, including credit and underwriting guidelines and portfolio management practices;
- Economic factors, including unemployment rates and GDP growth rates and other factors considered relevant by management;
- Changes in the value of underlying collateral;
- Quality of risk ratings, as evaluated by our independent credit review function;
- Credit concentrations;

BANKUNITED, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2018

- Changes in and experience levels of credit administration management and staff; and
- Other factors identified by management that may impact the level of losses inherent in the portfolio, including but not limited to competition and legal and regulatory considerations.

Covered ACI Loans

For ACI loans, a valuation allowance is established when periodic evaluations of expected cash flows reflect a deterioration resulting from credit related factors from the level of cash flows that were estimated to be collected at acquisition plus any additional expected cash flows arising from revisions in those estimates. A quarterly analysis of expected cash flows is performed for ACI loans.

Expected cash flows are estimated on a pool basis for ACI 1-4 single family residential loans. The analysis of expected cash flows incorporates updated expected prepayment rate, default rate, delinquency level and loss severity given default assumptions.

Reserve for Unfunded Commitments

The reserve for unfunded commitments represents the estimated probable losses related to unfunded lending commitments. The reserve is calculated in a manner similar to the general reserve for non-covered loans, while also considering the timing and likelihood that the available credit will be utilized as well as the exposure upon default. The reserve for unfunded commitments is presented within other liabilities on the consolidated balance sheets, distinct from the ALLL, and adjustments to the reserve for unfunded commitments are included in other non-interest expense in the consolidated statements of income.

FDIC Indemnification Asset

The FDIC indemnification asset was initially recorded at the time of the FSB Acquisition at fair value, measured as the present value of the estimated cash payments expected from the FDIC for probable losses on covered assets. The FDIC indemnification asset is measured separately from the related covered assets. It is not contractually embedded in the covered assets and it is not transferable with the covered assets should the Company choose to dispose of them.

Impairment of expected cash flows from covered assets results in an increase in cash flows expected to be collected from the FDIC. These increased expected cash flows from the FDIC are recognized as increases in the FDIC indemnification asset and as non-interest income in the same period that the impairment of the covered assets is recognized in the provision for loan losses. Increases in expected cash flows from covered assets result in decreases in cash flows expected to be collected from the FDIC. These decreases in expected cash flows from the FDIC are recognized immediately in earnings to the extent that they relate to a reversal of a previously recorded valuation allowance related to the covered assets. Any remaining decreases in cash flows expected to be collected from the FDIC are recognized prospectively through an adjustment of the rate of accretion or amortization on the FDIC indemnification asset, consistent with the approach taken to recognize increases in expected cash flows on the covered assets. Amortization of the FDIC indemnification asset results from circumstances in which, due to improvement in expected cash flows from the covered assets, expected cash flows from the FDIC are less than the carrying value of the FDIC indemnification asset. Accretion or amortization of the FDIC indemnification asset is recognized in earnings using the effective interest method over the period during which cash flows from the FDIC are expected to be collected, which is limited to the lesser of the contractual term of the indemnification agreement and the remaining life of the indemnified assets.

Gains and losses from resolution of ACI loans are included in the income statement line item "Income from resolution of covered assets, net." These gains and losses represent the difference between the expected losses from ACI loans and consideration actually received in satisfaction of such loans that were resolved either by payment in full, foreclosure or short sale. The Company may also realize gains or losses on the sale or impairment of covered loans or covered OREO. When the Company recognizes gains or losses related to the resolution, sale or impairment of covered assets in earnings, corresponding changes in the estimated amount recoverable from the FDIC under the Loss Sharing Agreements are reflected in the consolidated financial statements as increases or decreases in the FDIC indemnification asset and in the consolidated statement of income line item "Net loss on FDIC indemnification."

The FDIC indemnification asset was amortized to zero as of December 31, 2018 as expectations of losses eligible for indemnification with respect to the remaining covered assets prior to final termination of the Single Family Shared-Loss Agreement were insignificant. See Notes 4 and 5 to our consolidated financial statements for further discussion.

BANKUNITED, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2018

Bank Owned Life Insurance

Bank owned life insurance is carried at the amount that could be realized under the contract at the balance sheet date, which is typically cash surrender value. Changes in cash surrender value are recorded in non-interest income.

Equipment Under Operating Lease

Equipment under operating lease is carried at cost less accumulated depreciation and is depreciated to estimated residual value using the straight-line method over the lease term. Estimated residual values are re-evaluated at least annually, based primarily on current residual value appraisals. Rental revenue is recognized on a straight-line basis over the contractual term of the lease.

A review for impairment of equipment under operating lease is performed at least annually or when events or changes in circumstances indicate that the carrying amount of long-lived assets may not be recoverable. Impairment of assets is determined by comparing the carrying amount to future undiscounted net cash flows expected to be generated. If an asset is impaired, the measure of impairment is the amount by which the carrying amount exceeds the fair value of the asset.

Goodwill

Goodwill of \$78 million at both December 31, 2018 and 2017 represents the excess of consideration transferred in business combinations over the fair value of net tangible and identifiable intangible assets acquired. Goodwill is not amortized, but is tested for impairment annually or more frequently if events or circumstances indicate that impairment may have occurred. The Company performs its annual goodwill impairment test in the third fiscal quarter. The Company has a single reporting unit. The impairment test compares the estimated fair value of the reporting unit to its carrying amount. If the fair value of the reporting unit exceeds its carrying amount, no impairment is indicated. If the fair value of the reporting unit is less than its carrying amount, impairment of goodwill is measured as the excess of the carrying amount over fair value. The estimated fair value of the reporting unit is based on the market capitalization of the Company's common stock. The estimated fair value of the reporting unit at each impairment testing date substantially exceeded its carrying amount; therefore, no impairment of goodwill was indicated.

Foreclosed Property and Repossessed Assets

Foreclosed property and repossessed assets consists of real estate assets acquired through, or in lieu of, loan foreclosure and personal property acquired through repossession. Such assets are included in other assets in the accompanying consolidated balance sheets. These assets are held for sale and are initially recorded at estimated fair value less costs to sell, establishing a new cost basis. Subsequent to acquisition, periodic valuations are performed and the assets are carried at the lower of the carrying amount at the date of acquisition or estimated fair value less cost to sell. Significant property improvements are capitalized to the extent that the resulting carrying value does not exceed fair value less cost to sell. Legal fees, maintenance, taxes, insurance and other direct costs of holding and maintaining these assets are expensed as incurred.

Premises and Equipment

Premises and equipment are carried at cost less accumulated depreciation and amortization and are included in other assets in the accompanying consolidated balance sheets. Depreciation is calculated using the straight-line method over the estimated useful lives of the assets. The lives of improvements to existing buildings are based on the lesser of the estimated remaining lives of the buildings or the estimated useful lives of the improvements. Leasehold improvements are amortized over the shorter of the expected terms of the leases at inception, considering options to extend that are reasonably assured, or their useful lives. The estimated useful lives of premises and equipment are as follows:

- buildings and improvements - 30 years;
- leasehold improvements - 5 to 20 years;
- furniture, fixtures and equipment - 5 to 7 years; and
- computer equipment - 3 to 5 years.

BANKUNITED, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2018

Software and CCA

Software and CCA are carried at cost less accumulated depreciation and amortization and are included in other assets in the accompanying consolidated balance sheets. Depreciation is calculated using the straight-line method over the estimated useful lives of the assets. Direct costs of materials and services associated with developing or obtaining and implementing internal use computer software incurred during the application and development stage are capitalized and amortized over the estimated useful lives of the software. The estimated useful life of software, software licensing rights and CCA implementation costs range from 3 to 5 years.

Loan Servicing Rights

Loan servicing rights are measured at fair value, with changes in fair value subsequent to acquisition recognized in earnings. Loan servicing rights are included in other assets in the accompanying consolidated balance sheets. Servicing fee income is recorded net of changes in fair value in other non-interest income. Neither the loan servicing rights nor related income have had a material impact on the Company's financial statements to date.

Investments in Affordable Housing Limited Partnerships

The Company has acquired investments in limited partnerships that manage or invest in qualified affordable housing projects and provide the Company with low-income housing tax credits and other tax benefits. These investments are included in other assets in the accompanying consolidated balance sheets. The Company accounts for investments in qualified affordable housing projects using the proportional amortization method if certain criteria are met. Under the proportional amortization method, the initial cost of the investment is amortized in proportion to the tax credits and other tax benefits received and the amortization is recognized in the income statement as a component of income tax expense. The investments are evaluated for impairment when events or changes in circumstances indicate that it is more likely than not that the carrying amount of the investment will not be realized.

Income Taxes

The Company accounts for income taxes using the asset and liability method. Deferred tax assets and liabilities are determined based on differences between the financial reporting and tax bases of assets and liabilities using enacted tax rates in effect for periods in which the differences are expected to reverse. The effect of changes in tax rates on deferred tax assets and liabilities are recognized in income in the period that includes the enactment date. A valuation allowance is established for deferred tax assets when management determines that it is more likely than not that some portion or all of a deferred tax asset will not be realized. In making such determinations, the Company considers all available positive and negative evidence that may impact the realization of deferred tax assets. These considerations include the amount of taxable income generated in statutory carryback periods, future reversals of existing taxable temporary differences, projected future taxable income and available tax planning strategies.

The Company recognizes tax benefits from uncertain tax positions when it is more likely than not that the related tax positions will be sustained upon examination, including resolutions of any related appeals or litigation processes, based on the technical merits of the tax positions. An uncertain tax position is a position taken in a previously filed tax return or a position expected to be taken in a future tax return that is not based on clear and unambiguous tax law. The Company measures tax benefits related to uncertain tax positions based on the largest benefit that has a greater than 50% likelihood of being realized upon settlement. If the initial assessment fails to result in recognition of a tax benefit, the Company subsequently recognizes a tax benefit if (i) there are changes in tax law or case law that raise the likelihood of prevailing on the technical merits of the position to more-likely-than-not, (ii) the statute of limitations expires, or (iii) there is a completion of an examination resulting in a settlement of that tax year or position with the appropriate agency. The Company recognizes interest and penalties related to uncertain tax positions, as well as interest income or expense related to tax settlements, in the provision for income taxes.

BANKUNITED, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2018

Equity Based Compensation

The Company periodically grants unvested or restricted shares of common stock and other share-based awards to key employees. For equity classified awards, compensation cost is measured based on the estimated fair value of the awards at the grant date and is recognized in earnings on a straight-line basis over the requisite service period for each award. Liability-classified awards are remeasured each reporting period at fair value until the award is settled, and compensation cost is recognized in earnings on a straight-line basis over the requisite service period for each award, adjusted for changes in fair value each reporting period. Compensation cost related to awards that embody performance conditions is recognized when it is probable that the performance conditions will be achieved. The number of awards expected to vest is estimated in determining the amount of compensation cost to be recognized related to share-based payment transactions.

The fair value of unvested shares is based on the closing market price of the Company's common stock at the date of grant. Market conditions embedded in awards are reflected in the grant-date fair value of the awards.

Derivative Financial Instruments and Hedging Activities

Interest rate derivative contracts

The Company uses interest rate derivative contracts, such as swaps, caps, floors and collars, in the normal course of business to meet the financial needs of its customers and to manage exposure to changes in interest rates. Interest rate contracts are recorded as assets or liabilities in the consolidated balance sheets at fair value. Interest rate swaps that are used as a risk management tool to hedge the Company's exposure to changes in interest rates have been designated as cash flow hedging instruments. The gain or loss resulting from changes in the fair value of interest rate swaps designated and qualifying as cash flow hedging instruments is initially reported as a component of other comprehensive income and subsequently reclassified into earnings in the same period in which the hedged transaction affects earnings.

The Company discontinues hedge accounting prospectively when it is determined that the derivative is no longer effective in offsetting changes in the cash flows of the hedged item, the derivative expires or is sold, terminated, or exercised, management determines that the designation of the derivative as a hedging instrument is no longer appropriate or the occurrence of the forecasted transaction is no longer probable. When hedge accounting is discontinued, any subsequent changes in fair value of the derivative are recognized in earnings. The cumulative unrealized gain or loss related to a discontinued cash flow hedge continues to be reported in AOCI and is subsequently reclassified into earnings in the same period in which the hedged transaction affects earnings, unless it is probable that the forecasted transaction will not occur by the end of the originally specified time period, in which case the cumulative unrealized gain or loss reported in AOCI is reclassified into earnings immediately.

Cash flows resulting from derivative financial instruments that are accounted for as hedges are classified in the cash flow statement in the same category as the cash flows from the hedged items.

Changes in the fair value of interest rate contracts not designated as, or not qualifying as, hedging instruments are recognized currently in earnings.

Transfers of Financial Assets

Transfers of financial assets are accounted for as sales when control over the assets has been surrendered. A gain or loss is recognized in earnings upon completion of the sale based on the difference between the sales proceeds and the carrying value of the assets. Control over the transferred assets is deemed to have been surrendered when: (i) the assets have been legally isolated from the Company, (ii) the transferee obtains the right (free of conditions that constrain it from taking advantage of that right) to pledge or exchange the transferred assets, and (iii) the Company does not maintain effective control over the transferred assets through an agreement to repurchase them before their maturity or the ability to unilaterally cause the holder to return specific assets.

Advertising Costs

Advertising costs are expensed as incurred.

BANKUNITED, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2018

Earnings per Common Share

Basic earnings per common share is calculated by dividing income allocated to common stockholders for basic earnings per common share by the weighted average number of common shares outstanding for the period, reduced by average unvested stock awards. Unvested stock awards with non-forfeitable rights to dividends, whether paid or unpaid, and stand-alone dividend participation rights are considered participating securities and are included in the computation of basic earnings per common share using the two class method whereby net income is allocated between common stock and participating securities. In periods of a net loss, no allocation is made to participating securities as they are not contractually required to fund net losses. Diluted earnings per common share is computed by dividing income allocated to common stockholders for basic earnings per common share, adjusted for earnings reallocated from participating securities, by the weighted average number of common shares outstanding for the period increased for the dilutive effect of unexercised stock options, warrants and unvested stock awards using the treasury stock method. Contingently issuable shares are included in the calculation of earnings per common share as if the end of the respective period was the end of the contingency period.

Revenue From Contracts with Customers

Revenue from contracts with customers within the scope of Topic 606 "*Revenue from Contracts with Customers*", is recognized in an amount that reflects the consideration the Company expects to be entitled to receive in exchange for those goods or services as the related performance obligations are satisfied. The majority of our revenues, including revenues from loans, leases, investment securities, derivative instruments and letters of credit and from transfers and servicing of financial assets, are excluded from the scope of Topic 606. Deposit service charges and fees is the most significant category of revenue within the scope of the standard. These service charges and fees consist primarily of monthly maintenance fees and other transaction based fees. Revenue is recognized when our performance obligations are complete, generally monthly for account maintenance fees or when a transaction, such as a wire transfer, is completed. Payment is typically received at the time the performance obligation is satisfied. The aggregate amount of revenue that is within the scope of Topic 606 from sources other than deposit service charges and fees is not material.

Reclassifications

Certain amounts presented for prior periods have been reclassified to conform to the current period presentation.

New Accounting Pronouncements Adopted in 2018

ASU No. 2014-09, *Revenue from Contracts with Customers (Topic 606)*, superseded the revenue recognition requirements in Topic 605, *Revenue Recognition*, and most industry-specific revenue recognition guidance throughout the Accounting Standards Codification. The amendments in this update affect any entity that either enters into contracts with customers to transfer goods or services or enters into contracts for the transfer of non-financial assets unless those contracts are within the scope of other standards. The amendments establish a core principle requiring the recognition of revenue to depict the transfer of goods or services to customers in an amount reflecting the consideration to which the entity expects to be entitled in exchange for such goods or services and require expanded disclosure about revenue from contracts with customers that are within the scope of the standard. Revenue from financial instruments and lease contracts are generally outside the scope of Topic 606 as are revenues that are in the scope of ASC 860 "Transfers and Servicing", ASC 460 "Guarantees" and ASC 815 "Derivatives and Hedging". The Company adopted this standard in the first quarter of 2018 with respect to contracts not completed on the date of adoption using the modified retrospective transition method. Substantially all of the Company's revenues are generated from activities outside the scope of Topic 606; existing revenue recognition policies for contracts with customers that are within the scope of the standard are consistent with the principles in Topic 606. Therefore, there was no impact at adoption to the Company's consolidated financial position, results of operations, or cash flows.

ASU No. 2016-01, *Financial Instruments - Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities*. The amendments in the ASU addressed certain aspects of recognition, measurement, presentation and disclosure of certain financial instruments. The main provisions of this ASU that are applicable to the Company are to (1) eliminate the available for sale classification for equity securities and require investments in equity securities (except those accounted for under the equity method of accounting or those that result in consolidation of the investee) to be measured at fair value with changes in fair value recognized in net income, provided that equity investments that do not have readily determinable fair values may be re-measured at fair value upon occurrence of an observable price change or recognition of impairment, (2) eliminate the requirement to disclose the method(s) and significant assumptions used to estimate the fair value that is required to be disclosed for financial instruments measured at amortized cost on the balance sheet, and (3) require public

BANKUNITED, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2018

business entities to use the exit price notion when measuring the fair value of financial instruments for disclosure purposes. The amendments also clarified that an entity should evaluate the need for a valuation allowance on a deferred tax asset related to available for sale securities in combination with the entity's other deferred tax assets, which is consistent with the Company's previous practice. The Company adopted this ASU in the first quarter of 2018 using the modified retrospective transition method. The cumulative effect adjustment to reclassify unrealized gains on equity securities from AOCI to retained earnings totaled \$2.2 million, net of tax, at adoption.

ASU No. 2016-15, *Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments*. This amendment provided guidance on eight specific cash flow classification issues where there had been diversity in practice. The provisions of this ASU that are expected to be applicable to the Company include requirements to: (1) classify cash payments for debt prepayment or extinguishment costs to be classified as cash outflows for financing activities, (2) classify proceeds from settlement of insurance claims on the basis of the nature of the loss and (3) require cash payments from settlement of bank-owned life insurance policies to be classified as cash flows from investing activities. The Company adopted this ASU for the first quarter of 2018; the provisions of the ASU were generally consistent with the Company's existing practice, therefore, adoption did not have an impact on the Company's consolidated cash flows.

ASU No. 2018-02, *Income Statement-Reporting Comprehensive Income (Topic 220): Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income*. The amendments in this ASU allowed a reclassification from AOCI to retained earnings of stranded tax effects in AOCI resulting from enactment of the TCJA that reduced the statutory federal tax rate from 35 percent to 21 percent. The Company's existing accounting policy was to release stranded tax effects only when the entire portfolio of the type of item that created them is liquidated. This ASU was early adopted effective January 1, 2018 and a cumulative-effect adjustment was recorded to reclassify stranded tax effects totaling \$11.1 million from AOCI to retained earnings.

ASU No. 2018-13, *Fair Value Measurement (Topic 820): Disclosure Framework—Changes to the Disclosure Requirements for Fair Value Measurement*. The amendments in this ASU modified the disclosure requirements on fair value measurements by removing certain disclosures not considered cost beneficial, clarifying certain disclosure requirements and adding some additional disclosures. The provisions of the ASU that are applicable to the fair value disclosures of the Company include: (1) adding disclosure of the changes in unrealized gains and losses for the period included in other comprehensive income for recurring level 3 fair value measurements, (2) adding the range and weighted average of significant unobservable inputs used to develop level 3 fair value measurements, (3) removing the requirement to disclose the amount of and reasons for transfers between level 1 and level 2 of the fair value hierarchy, (4) removing the requirement to disclose the policy for timing of transfers between levels of the fair value hierarchy, and (5) removing disclosure of the valuation processes for level 3 fair value measurements. The Company early adopted this ASU for the third quarter of 2018.

ASU No. 2018-15, *Intangibles—Goodwill and Other—Internal-Use Software (Subtopic 350-40): Customer's Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement That Is a Service Contract (a consensus of the FASB Emerging Issues Task Force)*. The amendments in this ASU require customers in a cloud computing arrangement (i.e., hosting arrangement) that is a service contract to capitalize certain implementation costs in the same manner as software developed for internal use. The guidance allows for qualifying costs incurred during the application and development stage to be capitalized, which may include: (1) integration, (2) customization, (3) configuration, (4) installation, (5) architecture and design, (6) coding, and (7) testing. Capitalized implementation costs related to a hosting arrangement that is a service contract will be amortized over the term of the hosting arrangement, beginning when the applicable component of the hosting arrangement is ready for its intended use. The accounting for the cost of the hosting component of the arrangement is not affected by this ASU. The Company early adopted this ASU in the third quarter of 2018 using the prospective transition approach with no significant impact to the Company's consolidated financial position, results of operations, or cash flows.

Accounting Pronouncements Not Yet Adopted

ASU No. 2016-02, *Leases (Topic 842)*. The amendments in this ASU require a lessee to recognize in the statement of financial position a liability to make lease payments and a right-of-use asset representing its right to use the underlying asset for leases with terms longer than one year. Accounting applied by lessors is largely unchanged by this ASU. The ASU also will require both qualitative and quantitative disclosures that provide additional information about the amounts recorded in the consolidated financial statements. The amendments in this ASU are effective for the Company for interim and annual periods in fiscal years beginning after December 15, 2018. Early adoption is permitted; however, the Company did not early adopt this ASU. The most significant impact of adoption is expected to be the recognition, as lessee, of new right-of-use assets and lease

BANKUNITED, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2018

liabilities on the Consolidated Balance Sheet for real estate leases currently classified as operating leases. Under a package of practical expedients that the Company plans to elect, the Company will not be required to (i) re-assess whether expired or existing contracts contain leases, (ii) re-assess the classification of expired or existing leases, (iii) re-evaluate initial direct costs for existing leases or (iv) separate lease components of certain contracts from non-lease components. The Company also plans to elect the transition method that allows entities the option of applying the provisions of the ASU at the effective date without adjusting the comparative periods presented. Management has finalized its evaluation of the impact of adoption of this ASU on its processes and controls. The Company has completed its review of contractual arrangements for embedded leases. The Company has acquired and implemented software to facilitate calculation and reporting of the lease liability and right-of-use asset. Relevant accounting policy decisions have been made including use of the incremental borrowing rate to determine the discount rate and assumptions around inclusion of renewals in lease terms. Based on the population of lease contracts existing at December 31, 2018 and an incremental borrowing rate determined as of that date, the Company recognized a lease liability and related right-of-use asset of approximately \$104 million and \$95 million, respectively, on adoption at January 1, 2019. The Company does not expect the impact of adoption to be material to its consolidated results of operations or cash flows.

In June 2016, the FASB issued ASU No. 2016-13, *Financial Instruments - Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments*. The ASU introduces new guidance which makes substantive changes to the accounting for credit losses. The ASU introduces the CECL model which applies to financial assets subject to credit losses and measured at amortized cost, as well as certain off-balance sheet credit exposures. This includes loans, loan commitments, standby letters of credit, net investments in leases recognized by a lessor and HTM debt securities. The CECL model requires an entity to estimate credit losses expected over the life of an exposure, considering information about historical events, current conditions and reasonable and supportable forecasts, and is generally expected to result in earlier recognition of credit losses. The ASU also modifies certain provisions of the current OTTI model for AFS debt securities. Credit losses on AFS debt securities will be limited to the difference between the security's amortized cost basis and its fair value, and be recognized through an allowance for credit losses rather than as a direct reduction in amortized cost basis. The ASU also provides for a simplified accounting model for purchased financial assets with more than insignificant credit deterioration since their origination. The ASU requires expanded disclosures including, but not limited to (i) information about the methods and assumptions used to estimate expected credit losses, including changes in the factors that influenced management's estimate and the reasons for those changes, (ii) for financing receivables and net investment in leases measured at amortized cost, further disaggregation of information about the credit quality of those assets and (iii) a rollforward of the allowance for credit losses for AFS and HTM securities. The amendments in this ASU are effective for the Company for interim and annual periods in fiscal years beginning after December 15, 2019. Early adoption is permitted, however, the Company does not intend to early adopt this ASU. Management is in the process of evaluating the impact of adoption of this ASU on its consolidated financial statements, processes and controls and is not currently able to reasonably estimate the impact of adoption on the Company's consolidated financial position, results of operations or cash flows; however, adoption is likely to lead to significant changes in accounting policies related to, and the methods employed in estimating, the ALLL. It is possible that the impact will be material to the Company's consolidated financial position and results of operations. To date, the Company has completed a gap analysis, adopted a detailed implementation plan, established a formal governance structure for the project, documented accounting policy elections, selected and implemented credit loss models for key portfolio segments and in the process of completing model validations, chosen loss estimation methodologies for key portfolio segments, selected a software solution to serve as its CECL platform. The Company has also established an economic forecast committee, and is in the process of documenting processes and controls.

In October 2018, the FASB issued ASU No. 2018-16, *Derivatives and Hedging (Topic 815): Inclusion of the Secured Overnight Financing Rate (SOFR) Overnight Index Swap (OIS) Rate as a Benchmark Interest Rate for Hedge Accounting Purposes*. The ASU adds the Overnight Index Swap (OIS) rate based on Secured Overnight Financing Rate (SOFR) as a benchmark interest rate for hedge accounting purposes. The ASU is effective for the Company for interim and annual periods in fiscal years beginning after December 15, 2018. The Company does not expect the impact of adoption to be material to its consolidated financial position, results of operations, or cash flows.

BANKUNITED, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2018

Note 2 Earnings Per Common Share

The computation of basic and diluted earnings per common share is presented below for the years ended December 31, 2018, 2017 and 2016 (in thousands, except share and per share data):

	2018	2017	2016
Basic earnings per common share:			
Numerator:			
Net income	\$ 324,866	\$ 614,273	\$ 225,741
Distributed and undistributed earnings allocated to participating securities	(13,047)	(23,250)	(8,760)
Income allocated to common stockholders for basic earnings per common share	\$ 311,819	\$ 591,023	\$ 216,981
Denominator:			
Weighted average common shares outstanding	104,916,865	106,574,448	104,097,182
Less average unvested stock awards	(1,171,994)	(1,104,035)	(1,157,378)
Weighted average shares for basic earnings per common share	103,744,871	105,470,413	102,939,804
Basic earnings per common share	\$ 3.01	\$ 5.60	\$ 2.11
Diluted earnings per common share:			
Numerator:			
Income allocated to common stockholders for basic earnings per common share	\$ 311,819	\$ 591,023	\$ 216,981
Adjustment for earnings reallocated from participating securities	(195)	(263)	62
Income used in calculating diluted earnings per common share	\$ 311,624	\$ 590,760	\$ 217,043
Denominator:			
Weighted average shares for basic earnings per common share	103,744,871	105,470,413	102,939,804
Dilutive effect of stock options	332,505	387,074	716,366
Weighted average shares for diluted earnings per common share	104,077,376	105,857,487	103,656,170
Diluted earnings per common share	\$ 2.99	\$ 5.58	\$ 2.09

Included in participating securities above are unvested shares and 3,023,314 dividend equivalent rights outstanding at December 31, 2018 that were issued in conjunction with the IPO of the Company's common stock. These dividend equivalent rights expire in 2021 and participate in dividends on a one-for-one basis.

The following potentially dilutive securities were outstanding at December 31, 2018, 2017 and 2016 but excluded from the calculation of diluted earnings per common share for the periods indicated because their inclusion would have been anti-dilutive:

	2018	2017	2016
Unvested shares and share units	1,463,607	1,431,761	1,303,208
Stock options and warrants	1,960	1,850,279	1,850,279

	<u>\$ 6,597,786</u>			<u>\$ 6,690,832</u>

(1) At fair value except for securities held to maturity.

Investment securities held to maturity at December 31, 2018 and 2017 consisted of one State of Israel bond with a carrying value of \$10 million maturing in 2024.

At December 31, 2018, contractual maturities of investment securities available for sale, adjusted for anticipated prepayments of mortgage-backed and other pass-through securities, were as follows (in thousands):

	Amortized Cost	Fair Value
Due in one year or less	\$ 939,802	\$ 942,507
Due after one year through five years	4,097,200	4,097,966
Due after five years through ten years	2,662,298	2,662,649
Due after ten years	391,354	393,237
	<u>\$ 8,090,654</u>	<u>\$ 8,096,359</u>

Based on the Company's assumptions, the estimated weighted average life of the investment portfolio as of December 31, 2018 was 4.5 years. The effective duration of the investment portfolio as of December 31, 2018 was 1.4 years. The model results are based on assumptions that may differ from actual results.

The carrying value of securities pledged as collateral for FHLB advances, public deposits, interest rate swaps and to secure borrowing capacity at the FRB totaled \$2.1 billion and \$2.6 billion at December 31, 2018 and 2017, respectively.

BANKUNITED, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2018

The following table provides information about gains and losses on investment securities for the years ended December 31, 2018, 2017 and 2016 (in thousands):

	2018	2017	2016
Proceeds from sale of investment securities available for sale	\$ 1,030,810	\$ 1,287,591	\$ 1,127,983
Gross realized gains:			
Investment securities available for sale	\$ 8,616	\$ 37,530	\$ 14,924
Gross realized losses:			
Investment securities available for sale	(2,514)	(4,064)	—
Net realized gain	6,102	33,466	14,924
Net unrealized losses on marketable equity securities recognized in earnings	(2,943)	—	—
OTTI on investment securities available for sale	—	—	(463)
Gain on investment securities, net	\$ 3,159	\$ 33,466	\$ 14,461

During the year ended December 31, 2016, OTTI was recognized on two positions in one private label commercial MBS. These positions were sold at a loss before the end of 2016.

The following tables present the aggregate fair value and the aggregate amount by which amortized cost exceeded fair value for investment securities available for sale in unrealized loss positions, aggregated by investment category and length of time that individual securities had been in continuous unrealized loss positions at December 31, 2018 and 2017 (in thousands):

The Company monitors its investment securities available for sale for OTTI on an individual security basis. No securities were determined to be other-than-temporarily impaired during the years ended December 31, 2018 or 2017. As discussed above, OTTI was recognized on two positions in one private label commercial MBS during the year ended December 31, 2016. The Company does not intend to sell securities that are in significant unrealized loss positions at December 31, 2018 and it is not more likely than not that the Company will be required to sell these securities before recovery of the amortized cost basis, which may be at maturity. At December 31, 2018, 218 securities were in unrealized loss positions. The amount of impairment related to 53 of these securities was considered insignificant both individually and in the aggregate, totaling approximately \$596 thousand and no further analysis with respect to these securities was considered necessary. The basis for concluding that impairment of the remaining securities was not other-than-temporary is further described below

U.S. Government agency and sponsored enterprise residential and commercial MBS

At December 31, 2018, thirty-six U.S. Government agency and sponsored enterprise residential MBS and seven U.S. Government agency and sponsored enterprise commercial MBS were in unrealized loss positions. Impairment of these securities was primarily attributable to increases in market interest rates subsequent to the date of acquisition. The timely payment of principal and interest on these securities is explicitly or implicitly guaranteed by the U.S. Government. Given the expectation of timely payment of principal and interest the impairments were considered to be temporary.

Private label residential MBS and CMOs

At December 31, 2018, thirty-eight private label residential MBS and CMOs were in unrealized loss positions, primarily as a result of an increase in medium and long-term market interest rates subsequent to acquisition. These securities were assessed for OTTI using credit and prepayment behavioral models that incorporate CUSIP level constant default rates, voluntary prepayment rates and loss severity and delinquency assumptions. The results of these assessments were not indicative of credit losses related to any of these securities as of December 31, 2018. Given the expectation of timely recovery of outstanding principal the impairments were considered to be temporary.

Private label commercial MBS

At December 31, 2018, twenty-seven private label commercial MBS were in unrealized loss positions, primarily as a result of an increase in market interest rates. These securities were assessed for OTTI using credit and prepayment behavioral models incorporating assumptions consistent with the collateral characteristics of each security. The results of this analysis were not indicative of expected credit losses. Given the expectation of timely recovery of outstanding principal the impairments were considered to be temporary.

BANKUNITED, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2018

Single family rental real estate-backed securities

At December 31, 2018, thirteen single family rental real estate-backed securities were in unrealized loss positions. The unrealized losses were primarily due to increases in market interest rates since the purchase of the securities. Management's analysis of the credit characteristics, including loan-to-value and debt service coverage ratios, and levels of subordination for each of the securities is not indicative of projected credit losses. Given the absence of projected credit losses the impairments were considered to be temporary.

Collateralized loan obligations:

At December 31, 2018, eighteen collateralized loan obligations were in unrealized loss positions, primarily due to widening credit spreads. The amount of impairment of each of the individual securities was 3% or less of amortized cost. These securities were assessed for OTTI using credit and prepayment behavioral models incorporating assumptions consistent with the collateral characteristics of each security. The results of this analysis were not indicative of expected credit losses. Given the limited severity of impairment and the expectation of timely recovery of outstanding principal, the impairments were considered to be temporary.

Non-mortgage asset-backed securities

At December 31, 2018, six non-mortgage asset-backed securities were in unrealized loss positions, due primarily to increases in market interest rates subsequent to the date of acquisition. The amount of impairment each of the individual securities was less than 3% of amortized cost. These securities were assessed for OTTI using credit and prepayment behavioral models incorporating assumptions consistent with the collateral characteristics of each security. The results of this analysis were not indicative of expected credit losses. Given the limited severity of impairment and the expectation of timely recovery of outstanding principal, the impairments were considered to be temporary.

State and municipal obligations

At December 31, 2018, fourteen state and municipal obligations were in unrealized loss positions. The impairments are primarily attributable to increases in market interest rates and changes in statutory tax rates. All of the securities are rated investment grade by nationally recognized statistical ratings organizations. Management's evaluation of these securities for OTTI also encompassed the review of credit scores and analysis provided by a third party firm specializing in the analysis and credit review of municipal securities. Given the absence of expected credit losses, the impairments were considered to be temporary.

SBA Securities

At December 31, 2018, six SBA securities were in unrealized loss positions. The amount of impairment of each of these securities was 3% or less of amortized cost. These securities were purchased at a premium and the impairment was attributable primarily to increased prepayment speeds. The timely payment of principal and interest on these securities is guaranteed by this U.S. Government agency. Given the limited severity of impairment and the expectation of timely payment of principal and interest, the impairments were considered to be temporary.

Included in non-covered loans above are \$18 million and \$34 million at December 31, 2018 and 2017, respectively, of ACI commercial loans acquired in the FSB Acquisition.

Through two subsidiaries, the Bank provides commercial and municipal equipment and franchise financing utilizing both loan and lease structures. At December 31, 2018 and 2017, the commercial lending subsidiaries portfolio included a net investment in direct financing leases of \$739 million and \$738 million, respectively.

The following table presents the components of the investment in direct financing leases as of December 31, 2018 and 2017 (in thousands):

	2018	2017
Total minimum lease payments to be received	\$ 808,921	\$ 792,064

	<u>\$ 739,245</u>	<u>\$ 738,220</u>

BANKUNITED, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2018

As of December 31, 2018, future minimum lease payments to be received under direct financing leases were as follows (in thousands):

Years Ending December 31:	
2019	\$ 197,004
2020	169,437
2021	109,057
2022	69,242
2023	56,312
Thereafter	207,869
	\$ 808,921

During both of the years ended December 31, 2018 and 2017, the Company purchased 1-4 single family residential loans totaling \$1.3 billion. Purchases for the year ended December 31, 2018 included \$371 million of government insured residential loans.

At December 31, 2018, the Company had pledged real estate loans with UPB of approximately \$9.8 billion and recorded investment of approximately \$9.6 billion as security for FHLB advances.

Covered loans

Covered loans with UPB totaling \$401 million and a carrying value of \$201 million as of December 31, 2018 were retained in portfolio. During the years ended December 31, 2018, 2017 and 2016, the Company sold covered residential loans to third parties on a non-recourse basis. The following table summarizes the impact of these transactions (in thousands):

	2018	2017	2016
UPB of loans sold	\$ 539,853	\$ 203,970	\$ 241,348
Cash proceeds, net of transaction costs	\$ 488,972	\$ 169,828	\$ 171,367

	<u>122,639</u>		<u>159,539</u>	
	<u>\$ 129,243</u>		<u>\$ 170,065</u>	

Non-covered loans contractually delinquent by 90 days or more and still accruing totaled \$0.7 million and \$1.9 million at December 31, 2018 and 2017, respectively. The amount of additional interest income that would have been recognized on non-accrual loans had they performed in accordance with their contractual terms was approximately \$5.0 million and \$4.1 million for the years ended December 31, 2018 and 2017, respectively.

Management considers delinquency status to be the most meaningful indicator of the credit quality of 1-4 single family residential, home equity and consumer loans. Delinquency statistics are updated at least monthly. See "Aging of loans" below for more information on the delinquency status of loans. Original LTV and original FICO score are also important indicators of credit quality for the non-covered 1-4 single family residential portfolio.

Internal risk ratings are considered the most meaningful indicator of credit quality for commercial loans. Internal risk ratings are a key factor in identifying loans that are individually evaluated for impairment and impact management's estimates of loss factors used in determining the amount of the ALLL. Internal risk ratings are updated on a continuous basis. Generally, relationships with balances in excess of defined thresholds, ranging from \$1 million to \$3 million, are re-evaluated at least annually and more frequently if circumstances indicate that a change in risk rating may be warranted. Loans exhibiting potential credit weaknesses that deserve management's close attention and that if left uncorrected may result in deterioration of the repayment capacity of the borrower are categorized as special mention. Loans with well-defined credit weaknesses, including payment defaults, declining collateral values, frequent overdrafts, operating losses, increasing balance sheet leverage, inadequate cash flow, project cost overruns, unreasonable construction delays, past due real estate taxes or exhausted interest reserves, are assigned an internal risk rating of substandard. A loan with a weakness so severe that collection in full is highly questionable or improbable, but because of certain reasonably specific pending factors has not been charged off, will be assigned an internal risk rating of doubtful.

BANKUNITED, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

No other state represented borrowers with more than 4.0% of total 1-4 single family residential loans outstanding, excluding government insured residential loans, at December 31, 2018 or 2017. At December 31, 2018, 44.8% and 32.5% of loans in the commercial portfolio were to borrowers in Florida and the New York tri-state area, respectively. At December 31, 2017, 43.4% and 36.4% of loans in the non-covered commercial portfolio were to borrowers in Florida and the New York tri-state area, respectively.

Foreclosure of residential real estate

The carrying amount of foreclosed residential real estate properties included in "Other assets" in the accompanying consolidated balance sheets totaled \$6 million and \$3 million at December 31, 2018 and December 31, 2017, respectively. The recorded investment in non-government insured residential mortgage loans in the process of foreclosure was insignificant at December 31, 2018 and \$11 million at December 31, 2017. The recorded investment in government insured residential loans in the process of foreclosure totaled \$85 million at December 31, 2018.

(1) Includes government insured residential loans modified during the year ended December 31, 2018.

BANKUNITED, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2018

Modifications during the years ended December 31, 2018, 2017 and 2016 included interest rate reductions, restructuring of the amount and timing of required periodic payments, extensions of maturity and covenant waivers. Included in TDRs are residential loans to borrowers who have not reaffirmed their debt discharged in Chapter 7 bankruptcy. The total amount of such loans is not material. Modified ACI loans accounted for in pools are not considered TDRs, are not separated from the pools and are not classified as impaired loans.

Note 5 FDIC Indemnification Asset

When the Company recognizes gains or losses related to covered assets in its consolidated financial statements, changes in the estimated amount recoverable from the FDIC under the Loss Sharing Agreements with respect to those gains or losses are also reflected in the consolidated financial statements. Covered loans may be resolved through prepayment, short sale of the underlying collateral, foreclosure, sale of the loans or charge-off. For loans resolved through prepayment, short sale or foreclosure, the difference between consideration received in satisfaction of the loans and the allocated carrying value of the loans is recognized in the consolidated statement of income line item "Income from resolution of covered assets, net." Losses from the resolution of covered loans increase the amount recoverable from the FDIC under the Loss Sharing Agreements. Gains from the resolution of covered loans reduce the amount recoverable from the FDIC under the Loss Sharing Agreements. Similarly, differences in proceeds received on the sale of covered OREO and covered loans and their allocated carrying amounts result in gains or losses and reduce or increase the amount recoverable from the FDIC under the Loss Sharing Agreements. Increases in valuation allowances or impairment charges related to covered assets also increase the amount estimated to be recoverable from the FDIC. These additions to or reductions in amounts recoverable from the FDIC related to transactions in the covered assets are recorded in the consolidated statement of income line item "Net loss on FDIC indemnification" and reflected as corresponding increases or decreases in the FDIC indemnification asset.

The following tables summarize the components of the gains and losses associated with covered assets, along with the related additions to or reductions in the amounts recoverable from the FDIC under the Loss Sharing Agreements, as reflected in the consolidated statements of income for the years ended December 31, 2018, 2017 and 2016 (in thousands):

	2018		
	Transaction Income (Loss)	Net Loss on FDIC Indemnification	Net Impact on Pre-tax Earnings
Provision for losses on covered loans	\$ (752)	\$ 523	\$ (229)
Income from resolution of covered assets, net	11,551	(9,332)	2,219
Gain on sale of covered loans	5,732	3,388	9,120
Loss on covered OREO	(1,620)	1,222	(398)
	<u>\$ 14,911</u>	<u>\$ (4,199)</u>	<u>\$ 10,712</u>
	2017		
	Transaction Income (Loss)	Net Loss on FDIC Indemnification	Net Impact on Pre-tax Earnings
Provision for losses on covered loans	\$ (1,358)	\$ 1,039	\$ (319)
Income from resolution of covered assets, net	27,450	(21,912)	5,538
Gain on sale of covered loans	17,406	(1,514)	15,892
Loss on covered OREO	(203)	167	(36)

BANKUNITED, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2018

	2016		
	Transaction Income (Loss)	Net Loss on FDIC Indemnification	Net Impact on Pre-tax Earnings
Recovery of losses on covered loans	\$ 1,681	\$ (1,472)	\$ 209
Income from resolution of covered assets, net	36,155	(28,946)	7,209
Loss on sale of covered loans	(14,470)	11,615	(2,855)
Loss on covered OREO	(1,301)	1,044	(257)
	<u>\$ 22,065</u>	<u>\$ (17,759)</u>	<u>\$ 4,306</u>

Changes in the FDIC indemnification asset for the years ended December 31, 2018, 2017 and 2016, were as follows (in thousands):

Balance at December 31, 2015	\$ 739,843
Amortization	(160,091)
Reduction for claims filed	(46,083)
Net loss on FDIC indemnification	(17,759)
Balance at December 31, 2016	515,910
Amortization	(176,466)
Reduction for claims filed	(21,589)
Net loss on FDIC indemnification	(22,220)
Balance at December 31, 2017	295,635
Amortization	(261,763)
Reduction for claims	(29,673)
Net loss on FDIC indemnification	(4,199)
Balance at December 31, 2018	<u>\$ —</u>

The FDIC indemnification asset was amortized to zero as of December 31, 2018 as expectations of losses eligible for indemnification with respect to the remaining covered loans prior to final termination of the Single Family Shared-Loss Agreement were insignificant.

Note 6 Equipment Under Operating Lease

Equipment under operating lease consists primarily of railcars and other transportation equipment. The components of equipment under operating lease as of December 31, 2018 and 2017, are summarized as follows (in thousands):

	2018	2017
Equipment under operating lease	\$ 802,302	\$ 674,434
Less: accumulated depreciation	(99,948)	(74,932)
Equipment under operating lease, net	<u>\$ 702,354</u>	<u>\$ 599,502</u>

The Company recognized impairment of \$4.1 million during the year ended December 31, 2016, related to a group of tank cars impacted by new safety regulations. This impairment charge is included in "Depreciation of equipment under operating lease" in the accompanying consolidated statements of income. No impairment was recognized during the years ended December 31, 2018 and 2017.

BANKUNITED, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2018

At December 31, 2018, scheduled minimum rental payments under operating leases were as follows (in thousands):

Years Ending December 31:	
2019	\$ 65,201
2020	59,512

	\$ 353,694

Note 7 Premises and Equipment, Lease Commitments, Software and CCA

Premises and equipment are included in other assets in the accompanying consolidated balance sheets and are summarized as follows as of December 31, 2018 and 2017 (in thousands):

	2018	2017
Buildings and improvements	\$ 18,793	\$ 18,793
Leasehold improvements	69,651	70,298
Furniture, fixtures and equipment	36,581	35,675
Computer equipment	22,218	21,078
Software and software licensing rights	47,653	42,908
Aircraft and automobiles	11,614	11,744
Capitalized implementation costs of CCA	879	—
	207,389	200,496
Less: accumulated depreciation	(135,743)	(121,477)
Premises and equipment, net	\$ 71,646	\$ 79,019

Buildings and improvements includes \$11 million related to property under capital lease at both December 31, 2018 and 2017.

Depreciation and amortization expense related to premises and equipment, including amortization of assets recorded under capital leases, was \$18.5 million, \$19.4 million and \$21.3 million for the years ended December 31, 2018, 2017 and 2016, respectively.

The Company leases branch and office facilities under operating leases, most of which contain renewal options under various terms. Total rent expense under operating leases for the years ended December 31, 2018, 2017 and 2016 was \$26.0 million, \$27.5 million, and \$27.6 million, respectively.

BANKUNITED, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2018

As of December 31, 2018, future minimum rentals under non-cancelable operating leases with initial or remaining terms in excess of one year were as follows (in thousands):

Years ending December 31:	
2019	\$ 21,207
2020	17,629
2021	15,858
2022	12,114
2023	10,311
Thereafter through 2034	42,984
	<u>\$ 120,103</u>

Note 8 Deposits

The following table presents average balances and weighted average rates paid on deposits for the years ended December 31, 2018, 2017 and 2016 (dollars in thousands):

	2018		2017		2016	
	Average Balance	Average Rate Paid	Average Balance	Average Rate Paid	Average Balance	Average Rate Paid
Demand deposits:						
Non-interest bearing	\$ 3,389,191	—%	\$ 3,069,565	—%	\$ 2,968,192	—%
Interest bearing	1,627,828	1.13%	1,586,390	0.81%	1,382,717	0.60%
Money market	10,350,772	1.41%	9,364,498	0.85%	7,946,447	0.64%
Savings	284,198	0.26%	365,603	0.21%	415,205	0.23%
Time	6,617,006	1.81%	6,094,336	1.27%	5,326,630	1.12%
	<u>\$ 22,268,995</u>	1.28%	<u>\$ 20,480,392</u>	0.83%	<u>\$ 18,039,191</u>	0.66%

Time deposit accounts with balances of \$100,000 or more totaled approximately \$4.1 billion at both December 31, 2018 and 2017. Time deposit accounts with balances of \$250,000 or more totaled \$2.4 billion and \$2.3 billion at December 31, 2018 and 2017, respectively.

The following table presents maturities of time deposits as of December 31, 2018 (in thousands):

Maturing in:	
2019	\$ 5,119,279
2020	1,533,117
2021	94,973
2022	22,316
2023	50,073
	<u>\$ 6,819,758</u>

Included in deposits at December 31, 2018 are public funds deposits of \$2.6 billion and brokered deposits of \$2.5 billion. Investment securities available for sale with a carrying value of \$1.3 billion were pledged as security for public funds deposits at December 31, 2018.

BANKUNITED, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2018

Interest expense on deposits for the years ended December 31, 2018, 2017 and 2016 was as follows (in thousands):

	2018	2017	2016
Interest bearing demand	\$ 18,391	\$ 12,873	\$ 8,343
Money market	145,585	79,645	50,802
Savings	739	752	972
Time	119,848	77,663	59,656
	<u>\$ 284,563</u>	<u>\$ 170,933</u>	<u>\$ 119,773</u>

Note 9 Borrowings

The following table presents information about outstanding FHLB advances as of December 31, 2018 (dollars in thousands):

	Amount	Range of Interest Rates		Weighted Average Rate
		Minimum	Maximum	
Maturing in:				
2019—One month or less	\$ 2,325,000	2.24%	2.53%	2.41%
2019—Over one month	1,821,000	1.46%	2.76%	2.58%
2020	375,000	1.67%	2.91%	2.49%
2021	275,000	2.73%	3.02%	2.89%
Carrying value	<u>\$ 4,796,000</u>			

The table above reflects contractual maturities of outstanding advances and does not incorporate the impact that interest rate swaps designated as cash flow hedges have on the duration of borrowings. The terms of the Company's security agreement with the FHLB require a specific assignment of collateral consisting of qualifying first mortgage loans, commercial real estate loans, home equity lines of credit and mortgage-backed securities with unpaid principal amounts discounted at various stipulated percentages at least equal to 100% of outstanding FHLB advances. As of December 31, 2018, the Company had pledged investment securities and real estate loans with an aggregate carrying amount of approximately \$10.2 billion as collateral for advances from the FHLB.

At December 31, 2018 and 2017 outstanding senior notes payable and other borrowings consisted of the following (dollars in thousands):

	2018	2017
Principal amount of 4.875% senior notes	\$ 400,000	\$ 400,000
Unamortized discount and debt issuance costs	(5,610)	(6,275)
	<u>394,390</u>	<u>393,725</u>
Capital lease obligations	8,359	9,105
	<u>\$ 402,749</u>	<u>\$ 402,830</u>

The senior notes mature on November 17, 2025 with interest payable semiannually. The notes have an effective interest rate of 5.12%, after consideration of issuance discount and costs. The notes may be redeemed by the Company, in whole or in part, at any time prior to August 17, 2025 at the greater of a) 100% of the principal balance or b) the sum of the present values of the remaining scheduled payments of principal and interest on the securities discounted to the redemption date at i) the rate on a United States Treasury security with a maturity comparable to the remaining maturity of the senior notes that would be used to price new issues of corporate debt securities with a maturity comparable to the remaining maturity of the senior notes plus ii) 40 basis points. The senior notes may be redeemed at any time after August 17, 2025 at 100% of principal plus accrued and unpaid interest.

BANKUNITED, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2018

At December 31, 2018, BankUnited had available borrowing capacity at the FHLB of approximately \$3.7 billion, unused borrowing capacity at the FRB of approximately \$410 million and unused Federal funds lines of credit with other financial institutions totaling \$85 million.

Note 10 Income Taxes

The components of the provision (benefit) for income taxes for the years ended December 31, 2018, 2017 and 2016 were as follows (in thousands):

	2018	2017	2016
Current:			
Federal	\$ 2,172	\$ (251,880)	\$ 51,806
State	20,834	(15,733)	27,708
	<u>23,006</u>	<u>(267,613)</u>	<u>79,514</u>
Deferred:			
Federal	51,303	46,377	35,045
State	16,475	11,424	(4,856)
	<u>67,778</u>	<u>57,801</u>	<u>30,189</u>
	<u>\$ 90,784</u>	<u>\$ (209,812)</u>	<u>\$ 109,703</u>

A reconciliation of expected income tax expense at the statutory federal income tax rate of 21% during the year ended December 31, 2018 and 35% during the years ended December 31, 2017 and 2016, respectively, to the Company's effective income tax rate follows (dollars in thousands):

	2018		2017		2016	
	Amount	Percent	Amount	Percent	Amount	Percent
Tax expense calculated at the statutory federal income tax rate	\$ 87,286	21.00 %	\$ 141,561	35.00 %	\$ 117,405	35.00 %
Increases (decreases) resulting from:						
Income not subject to tax	(18,923)	(4.55)%	(29,511)	(7.30)%	(23,215)	(6.92)%
State income taxes, net of federal tax benefit	31,182	7.50 %	19,332	4.78 %	15,894	4.74 %
Discrete income tax benefit	—	— %	(327,945)	(81.08)%	—	— %
Other, net	(8,761)	(2.11)%	(13,249)	(3.27)%	(381)	(0.12)%
	<u>\$ 90,784</u>	<u>21.84 %</u>	<u>\$ (209,812)</u>	<u>(51.87)%</u>	<u>\$ 109,703</u>	<u>32.70 %</u>

The discrete income tax benefit recognized in the year ended December 31, 2017 related to a matter that arose during an ongoing audit of the Company's 2013 federal income tax return. During that audit, the Company asserted that U.S. federal income taxes paid in respect of certain income previously reported by the Company on its 2012, 2013 and 2014 federal income tax returns related to the basis assigned to certain loans acquired in the FSB Acquisition should be refunded to the Company, in light of guidance issued after the relevant returns had been filed. The discrete income tax benefit recognized in 2017 included expected refunds of federal income tax of \$295.0 million, as well as \$8.7 million in estimated interest on the federal refund and estimated refunds of \$24.2 million from certain state and local taxing jurisdictions.

The Company is continuing to evaluate whether it has claims in other state jurisdictions and whether it may have any claims for federal or state income taxes relating to tax years prior to 2012. The Company has not reached any conclusion as to when or to what extent it may have any claims relating to such other state and local taxing jurisdictions or in respect of prior tax years.

The TCJA was signed into law in 2017, reducing the statutory corporate federal income tax rate from 35% to 21%, effective January 1, 2018. A tax benefit of \$3.7 million, representing the impact of the rate change on deferred tax assets and

BANKUNITED, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2018

liabilities existing at the date of enactment, was recognized in earnings during the quarter ended December 31, 2017 and is included in the "Other, net" line item in the reconciliation above.

The components of deferred tax assets and liabilities at December 31, 2018 and 2017 were as follows (in thousands):

	2018	2017
Deferred tax assets:		
Excess of tax basis over carrying value of acquired loans	\$ 52,341	\$ 66,395
Allowance for loan and lease losses	25,599	33,309
Net operating loss and tax credit carryforwards	17,209	15,892
Other	33,330	31,859
Gross deferred tax assets	<u>128,479</u>	<u>147,455</u>
Deferred tax liabilities:		
Net unrealized gains on investment securities available for sale	1,757	24,657
Lease financing, due to differences in depreciation	167,856	113,161
Other	9,195	13,468
Gross deferred tax liabilities	<u>178,808</u>	<u>151,286</u>
Net deferred tax liability	<u>\$ (50,329)</u>	<u>\$ (3,831)</u>

Based on the evaluation of available evidence, management has concluded that it is more likely than not that the existing deferred tax assets will be realized. The primary factors supporting this conclusion are the amount of taxable income available for carryback and the amount of future taxable income that will result from the scheduled reversal of existing deferred tax liabilities.

At December 31, 2018, remaining carryforwards included federal net operating loss carryforwards in the amount of \$7.6 million expiring from 2029 through 2032, Florida net operating loss carryforwards in the amount of \$108.8 million, expiring from 2030 through 2037, and state tax credit carryforwards in the amount of \$10.9 million, expiring in 2019.

The Company has investments in affordable housing limited partnerships which generate federal Low Income Housing Tax Credits and other tax benefits. The balance of these investments, included in other assets in the accompanying consolidated balance sheet, was \$64 million at both December 31, 2018 and 2017. Unfunded commitments for affordable housing investments, included in other liabilities in the accompanying consolidated balance sheet, were \$21 million and \$26 million at December 31, 2018 and 2017, respectively. The maximum exposure to loss as a result of the Company's involvement with these limited partnerships at December 31, 2018 was approximately \$78 million. While the Company believes the likelihood of potential losses from these investments is remote, the maximum exposure was determined by assuming a scenario where the projects completely fail and do not meet certain government compliance requirements resulting in recapture of the related tax credits. These investments did not have a material impact on income tax expense for the years ended December 31, 2018, 2017 and 2016.

BANKUNITED, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2018

The Company has a liability for unrecognized tax benefits relating to uncertain federal and state tax positions in several jurisdictions. A reconciliation of the beginning and ending amount of gross unrecognized tax benefits for the years ended December 31, 2018, 2017 and 2016 follows (in thousands):

	2018	2017	2016
Balance, beginning of period	\$ 59,220	\$ 72,736	\$ 43,412
Additions for tax positions related to the current year	2,399	1,882	2,713
Additions for tax positions related to prior periods	77,101	1,661	25,168
Reductions due to change in tax position	(26,037)	(15,316)	—
Reductions due to settlements with taxing authorities	—	—	(200)
Reductions due to lapse of the statute of limitations	(675)	(2,229)	—
	112,008	58,734	71,093
Interest and penalties	4,073	486	1,643
Balance, end of period	\$ 116,081	\$ 59,220	\$ 72,736

As of December 31, 2018, 2017 and 2016, the Company had \$78.2 million, \$43.6 million and \$45.0 million of unrecognized federal and state tax benefits, net of federal tax benefits, that if recognized would have impacted the effective tax rate. Unrecognized tax benefits related to state income tax contingencies that may decrease during the 12 months subsequent to December 31, 2018 as a result of settlements with taxing authorities range from zero to \$42.8 million.

Interest and penalties related to unrecognized tax benefits are included in the provision for income taxes in the consolidated statements of income. At December 31, 2018 and 2017, accrued interest and penalties included in the consolidated balance sheets, net of federal tax benefits, were \$6.5 million and \$3.2 million, respectively. The total amounts of interest and penalties, net of federal tax benefits, recognized through income tax expense were \$3.2 million, \$0.3 million and \$1.1 million in 2018, 2017 and 2016, respectively.

The Company and its subsidiaries file a consolidated federal income tax return as well as combined state income tax returns where combined filings are required. Income tax returns for the tax years ended December 31, 2018, 2017, 2016 and 2015 remain subject to examination in the U.S. Federal and various state tax jurisdictions. The tax years ended December 31, 2009, 2010, 2011 and 2012, 2013 and 2014 remain subject to examination by certain states.

Note 11 Derivatives and Hedging Activities

The Company uses interest rate swaps to manage interest rate risk related to liabilities that expose the Company to variability in cash flows due to changes in interest rates. The Company enters into LIBOR-based interest rate swaps that are designated as cash flow hedges with the objective of limiting the variability of interest payment cash flows resulting from changes in the benchmark interest rate LIBOR. Changes in the fair value of interest rate swaps designated as cash flow hedging instruments are reported in AOCI and subsequently reclassified into interest expense in the same period in which the related interest on the floating-rate debt obligations affects earnings.

The Company also enters into interest rate derivative contracts with certain of its commercial borrowers to enable those borrowers to manage their exposure to interest rate fluctuations. To mitigate interest rate risk associated with these derivative contracts, the Company enters into offsetting derivative contract positions with primary dealers. These interest rate derivative contracts are not designated as hedging instruments; therefore, changes in the fair value of these derivatives are recognized immediately in earnings. The impact on earnings related to changes in fair value of these derivatives for the years ended December 31, 2018, 2017 and 2016 was not material.

The Company may be exposed to credit risk in the event of non-performance by the counterparties to its interest rate derivative agreements. The Company assesses the credit risk of its financial institution counterparties by monitoring publicly available credit rating and financial information. The Company manages dealer credit risk by entering into interest rate derivatives only with primary and highly rated counterparties, the use of ISDA master agreements, central clearing mechanisms and counterparty limits. The agreements contain bilateral collateral arrangements with the amount of collateral to be posted generally governed by the settlement value of outstanding swaps. The Company manages the risk of default by its borrower

BANKUNITED, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2018

counterparties through its normal loan underwriting and credit monitoring policies and procedures. The Company does not currently anticipate any losses from failure of interest rate derivative counterparties to honor their obligations.

The CME legally characterizes variation margin payments for centrally cleared derivatives as settlements of the derivatives' exposures rather than collateral. As a result, the variation margin payment and the related derivative instruments are considered a single unit of account for accounting and financial reporting purposes. The Company's clearing agent for interest rate derivative contracts centrally cleared through the CME settles the variation margin daily with the CME; therefore, those interest rate derivative contracts the Company clears through the CME are reported at a fair value of approximately zero at December 31, 2018 and 2017.

The following tables set forth certain information concerning the Company's interest rate contract derivative financial instruments and related hedged items at December 31, 2018 and 2017 (dollars in thousands):

2018								
	Hedged Item	Weighted Average Pay Rate	Weighted Average Receive Rate	Weighted Average Remaining Life in Years	Notional Amount	Balance Sheet Location	Fair Value	
							Asset	Liability
Derivatives designated as cash flow hedges:								
Pay-fixed interest rate swaps	Variability of interest cash flows on variable rate borrowings	2.38%	3-Month Libor	4.0	\$ 2,846,000	Other assets / Other liabilities	\$ 3,405	\$ —
Derivatives not designated as hedges:								
Pay-fixed interest rate swaps		4.10%	Indexed to 1-month Libor	6.0	1,048,196	Other assets / Other liabilities	14,883	(6,991)
Pay-variable interest rate swaps		Indexed to 1-month Libor	4.10%	6.0	1,048,196	Other assets / Other liabilities	11,318	(16,874)

				\$ 4,392,790		\$ 27,627	\$ (25,373)		

The following table provides information about the amount of gain (loss) related to derivatives designated as cash flow hedges reclassified from AOCI into interest expense for the years ended December 31, 2018, 2017 and 2016 (dollars in thousands):

	2018	2017	2016	Location of Gain (Loss) Reclassified from AOCI into Income
Interest rate contracts	\$ 1,999	\$ (9,621)	\$ (16,161)	Interest expense on borrowings

During the years ended December 31, 2018, 2017 and 2016, no derivative positions designated as cash flow hedges were discontinued and none of the gains and losses reported in AOCI were reclassified into earnings as a result of the discontinuance of cash flow hedges or because of the early extinguishment of debt. As of December 31, 2018, the amount of net gain expected to be reclassified from AOCI into earnings during the next twelve months was \$7.9 million.

Some of the Company's ISDA master agreements with financial institution counterparties contain provisions that permit either counterparty to terminate the agreements and require settlement in the event that regulatory capital ratios fall below certain designated thresholds, upon the initiation of other defined regulatory actions or upon suspension or withdrawal of the Bank's credit rating. Currently, there are no circumstances that would trigger these provisions of the agreements.

The Company does not offset assets and liabilities under master netting agreements for financial reporting purposes. Information on interest rate swaps subject to these agreements is as follows at December 31, 2018 and 2017 (in thousands):

	2018					
	Gross Amounts Recognized	Gross Amounts Offset in Balance Sheet	Net Amounts Presented in Balance Sheet	Gross Amounts Not Offset in Balance Sheet		Net Amount
				Derivative Instruments	Collateral Pledged	
Derivative assets	\$ 18,297	\$ —	\$ 18,297	\$ (5,264)	\$ (13,129)	\$ (96)
Derivative liabilities	(6,991)	—	(6,991)	5,264	436	(1,291)
	\$ 11,306	\$ —	\$ 11,306	\$ —	\$ (12,693)	\$ (1,387)

BANKUNITED, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2018

	2017					
	Gross Amounts Recognized	Gross Amounts Offset in Balance Sheet	Net Amounts Presented in Balance Sheet	Gross Amounts Not Offset in Balance Sheet		Net Amount
				Derivative Instruments	Collateral Pledged	
Derivative assets	\$ 13,217	\$ —	\$ 13,217	\$ (7,996)	\$ (5,221)	\$ —
Derivative liabilities	(13,173)	—	(13,173)	7,996	4,962	(215)
	\$ 44	\$ —	\$ 44	\$ —	\$ (259)	\$ (215)

The difference between the amounts reported for interest rate swaps subject to master netting agreements and the total fair value of interest rate contract derivative financial instruments reported in the consolidated balance sheets is related to interest rate contracts entered into with borrowers not subject to master netting agreements.

At December 31, 2018, the Company had pledged net financial collateral of \$0.4 million as collateral for initial margin requirements on centrally cleared derivatives and interest rate swaps in a liability position that are not centrally cleared. Financial collateral of \$15 million was pledged by counterparties to the Company for interest rate swaps in an asset position. The amount of collateral required to be posted varies based on the settlement value of outstanding swaps and in some cases may include initial margin requirements.

Other

In January 2019, the Company's Board of Directors authorized the repurchase of up to \$150 million of its outstanding common stock. Any repurchases will be made in accordance with applicable securities laws from time to time in open market or private transactions. The program may be commenced, suspended or discontinued without prior notice.

In conjunction with a previous acquisition, the Company had issued 1,834,160 warrants to purchase its common stock. The warrants expired unexercised in November 2018.

Note 13 Equity Based and Other Compensation Plans

Description of Equity Based Compensation Plans

In connection with the IPO of the Company's common stock in 2011, the Company adopted the 2010 Plan. In 2014, the Board of Directors and the Company's stockholders approved the 2014 Plan. The 2010 Plan and 2014 Plans are administered by the Board of Directors or a committee thereof and provide for the grant of non-qualified stock options, SARs, restricted shares, deferred shares, performance shares, unrestricted shares and other share-based awards to selected employees, directors or independent contractors of the Company and its affiliates. The number of shares of common stock authorized for award under the 2010 Plan is 7,500,000, of which 118,847 shares remain available for issuance as of December 31, 2018. The number of shares of common stock available for issuance under the 2014 Plan is 4,000,000, of which 2,061,087 shares remain available for issuance as of December 31, 2018. Shares of common stock delivered under the plans may consist of authorized but unissued shares or previously issued shares reacquired by the Company. The term of a share option or SAR issued under the plans may not exceed ten years from the date of grant and the exercise price may not be less than the fair market value of the

BANKUNITED, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Granted	683,137	40.06
Vested	(532,662)	34.64
Canceled or forfeited	(72,714)	38.43
Unvested share awards outstanding, December 31, 2018	<u>1,186,238</u>	<u>\$ 38.86</u>

BANKUNITED, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2018

Unvested share awards are generally valued at the closing price of the Company's common stock on the date of grant. All of the shares vest in equal annual installments over a period of three years from the date of grant. The following table summarizes the range of the closing price of the Company's stock on the date of grant for shares granted and the aggregate grant date fair value of shares vesting for the years ended December 31, 2018, 2017 and 2016 (in thousands, except per share data):

	2018	2017	2016
Range of the closing price on date of grant	\$33.44 - \$42.8	\$33.21 - \$40.84	\$29.78 - \$33.76
Aggregate grant date fair value of shares vesting	\$ 18,451	\$ 17,514	\$ 13,613

The total unrecognized compensation cost of \$26.5 million for all unvested share awards outstanding at December 31, 2018 will be recognized over a weighted average remaining period of 1.70 years.

Executive share-based awards

Certain of the Company's executives are eligible to receive annual awards of RSUs and PSUs (collectively, the "share units"). Annual awards of RSUs represent a fixed number of shares and vest on December 31st in equal tranches over three years. PSUs are initially granted based on a target value. The number of PSUs that ultimately vest at the end of a three-year performance measurement period will be based on the achievement of performance criteria pre-established by the Compensation Committee of the Board of Directors. The performance criteria established for the PSUs granted in 2018, 2017 and 2016 include both performance and market conditions. Upon vesting, the share units will be converted to common stock on a one-for-one basis, or may be settled in cash at the Company's option. The share units will accumulate dividends declared on the Company's common stock from the date of grant to be paid subsequent to vesting.

The Company has cash settled all tranches of RSUs that have vested through December 31, 2017. RSUs vested on December 31, 2018 have not yet settled. As a result of the previous cash settlements, all RSUs and PSUs have been determined to be liability instruments and are remeasured at fair value each reporting period until the awards are settled. The RSUs are valued based on the closing price of the Company's common stock at the reporting date. The PSUs are valued based on the closing price of the Company's common stock at the reporting date net of a discount related to any applicable market conditions, considering the probability of meeting the defined performance conditions. Compensation cost related to PSUs is recognized during the performance period based on the probable outcome of the respective performance conditions.

A summary of activity related to executive share-based awards for the years ended December 31, 2018, 2017 and 2016 follows:

	RSU	PSU
Unvested executive share-based awards outstanding, December 31, 2015	—	—
Granted	97,852	57,873
Vested	(19,291)	—
Unvested executive share-based awards outstanding, December 31, 2016	78,561	57,873
Granted	47,848	47,848
Vested	(35,238)	—
Unvested executive share-based awards outstanding, December 31, 2017	91,171	105,721
Granted	52,026	52,026
Vested	(52,585)	(57,873)
Unvested executive share-based awards outstanding, December 31, 2018	90,612	99,874

The total liability for the share units was \$5.5 million at December 31, 2018. The total unrecognized compensation cost of \$3.9 million for these share units at December 31, 2018 will be recognized over a weighted average remaining period of 1.78 years.

BANKUNITED, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2018

Incentive awards

The Company's annual incentive compensation arrangements for employees other than those eligible for the executive share-based awards discussed above provide for settlement through a combination of cash payments and unvested share awards following the end of the annual performance period. The dollar value of share awards to be granted is based on the achievement of performance criteria established in the incentive arrangements. The number of shares of common stock to be awarded is variable based on the closing price of the Company's stock on the date of grant; therefore, these awards are initially classified as liability instruments, with compensation cost recognized from the beginning of the performance period. The awards vest in equal installments over a period of three years from the date of grant. The total liability for incentive share awards was \$0.8 million at December 31, 2018. The total unrecognized compensation cost of \$2.3 million for incentive share awards at December 31, 2018 will be recognized over a weighted average remaining period of 3.00 years. The accrued liability and unrecognized compensation cost are based on management's current estimate of the likely outcome of the performance criteria established in the incentive arrangements and may differ from actual results.

The 683,137 unvested share awards granted during the year ended December 31, 2018, as discussed above, included 77,050 unvested share awards granted under the Company's annual incentive compensation arrangements based on the achievement of established performance criteria for the year ended December 31, 2017.

Option Awards

A summary of activity related to stock option awards for the years ended December 31, 2018, 2017 and 2016 follows:

	Number of Option Awards	Weighted Average Exercise Price
Option awards outstanding, December 31, 2015	3,651,152	\$ 26.62
Exercised	(47,979)	16.50
Canceled or forfeited	(1,097)	63.74
Option awards outstanding, December 31, 2016	3,602,076	26.74
Exercised	(2,331,388)	26.63
Option awards outstanding, December 31, 2017	1,270,688	26.93
Exercised	(291,689)	26.49
Canceled or forfeited	(14,159)	11.14
Option awards outstanding and exercisable, December 31, 2018	964,840	\$ 27.30

The intrinsic value of options exercised during the years ended December 31, 2018, 2017 and 2016 was \$4.6 million, \$25.8 million and \$0.9 million, respectively. The related tax benefit of options exercised was \$1.1 million, \$4.0 million and \$0.3 million, respectively, during the years ended December 31, 2018, 2017 and 2016.

BANKUNITED, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2018

There were no option awards granted during the years ended December 31, 2018, 2017 and 2016. Additional information about options outstanding and exercisable at December 31, 2018 is presented in the following table:

Range of Exercise Prices	Outstanding and Exercisable Options		
	Number of Options	Weighted Average Remaining Contractual Term (in years)	Aggregate Intrinsic Value (in thousands)
\$11.14	3,910	0.73	\$ 74

\$63.74	1,960	0.18	—
	964,840	2.07	3,358

Deferred Compensation Plan

The Company has a non-qualified deferred compensation plan for a select group of key management or highly compensated employees whereby a participant, upon election, may defer a portion of eligible compensation. The deferred compensation plan provides for discretionary Company contributions. Generally, the Company has elected not to make contributions. The Company credits each participant's account with income based on either an annual interest rate determined by the Company's Compensation Committee or returns of selected investment portfolios, as elected by the participant. A participant's elective deferrals and interest thereon are at all times 100% vested. Company contributions and interest thereon will become 100% vested upon the earlier of a change in control, as defined, or the participant's death, disability, attainment of normal retirement age or the completion of two years of service. Participant deferrals and any associated earnings will be paid upon separation from service or based on a specified distribution schedule, as elected by the participant. Deferred compensation expense was \$1.3 million, \$1.5 million and \$1.5 million for the years ended December 31, 2018, 2017 and 2016, respectively. Deferred compensation liabilities of \$24 million and \$21 million were included in other liabilities in the accompanying consolidated balance sheets at December 31, 2018 and 2017, respectively.

BankUnited 401(k) Plan

Under the terms of the 401(k) Plan sponsored by the Company, eligible employees may contribute a portion of compensation not exceeding the limits set by law. Employees are eligible to participate in the plan after one month of service. The 401(k) Plan allows a matching employer contribution equal to 100% of elective deferrals that do not exceed 1% of compensation, plus 70% of elective deferrals that exceed 1% but are less than 6% of compensation. Matching contributions are fully vested after two years of service. For the years ended December 31, 2018, 2017 and 2016, BankUnited made matching contributions to the 401(k) Plan of approximately \$6.3 million, \$5.5 million and \$5.2 million, respectively.

Note 14 Regulatory Requirements and Restrictions

The Company and the Bank are subject to various regulatory capital requirements administered by Federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory—and possibly additional discretionary—actions by regulators that, if undertaken, could have a direct material effect on the Company's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Company and the Bank must meet specific capital guidelines that involve quantitative measures of assets, liabilities and certain off-balance-sheet items calculated pursuant to regulation. The capital amounts and classification also are subject to qualitative judgments by the regulators about components, risk weightings and other factors. Banking regulations identify five capital categories for insured depository institutions: well-capitalized, adequately capitalized, undercapitalized, significantly undercapitalized and critically undercapitalized. As of December 31, 2018 and 2017, all capital ratios of the Company and the Bank exceeded the "well capitalized" levels under the regulatory framework for prompt corrective action. Quantitative measures established by regulation to ensure capital adequacy require the Company and the Bank to maintain minimum amounts and ratios of total,

BANKUNITED, INC. AND SUBSIDIARIES

(1) There is no Tier 1 leverage ratio component in the definition of a well-capitalized bank holding company.

For purposes of risk based capital computations, the FDIC Indemnification asset and the covered assets are risk-weighted at 20% due to the conditional guarantee represented by the Loss Sharing Agreements.

BankUnited is subject to various regulatory restrictions relating to the payment of dividends, including requirements to maintain capital at or above certain minimums, and to remain "well-capitalized" under the prompt corrective action regulations. The Company does not expect that any of these laws, regulations or policies will materially affect the ability of BankUnited to pay dividends in the future.

BANKUNITED, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2018

Beginning January 1, 2019, the Bank and the Company will have to maintain a capital conservation buffer composed of CET1 capital equal to 2.50% of risk-weighted assets above the amounts required to be adequately capitalized in order to avoid limitations on capital distributions, including dividend payments and certain discretionary bonus payments to executive officers.

BankUnited is required by the Board of Governors of the Federal Reserve System to maintain reserve balances in the form of vault cash or deposits with the FRB. At December 31, 2018, the reserve requirement for BankUnited was \$148 million.

Note 15 Fair Value Measurements

Assets and liabilities measured at fair value on a recurring basis

Following is a description of the methodologies used to estimate the fair values of assets and liabilities measured at fair value on a recurring basis and the level within the fair value hierarchy in which those measurements are typically classified.

Investment securities available for sale and marketable equity securities—Fair value measurements are based on quoted prices in active markets when available; these measurements are classified within level 1 of the fair value hierarchy. These securities typically include U.S. Treasury securities and certain preferred stocks. If quoted prices in active markets are not available, fair values are estimated using quoted prices of securities with similar characteristics, quoted prices of identical securities in less active markets, discounted cash flow techniques, or matrix pricing models. These securities are generally classified within level 2 of the fair value hierarchy and include U.S. Government agency securities, U.S. Government agency and sponsored enterprise MBS, preferred stock investments for which level 1 valuations are not available, corporate debt securities, non-mortgage asset-backed securities, single family rental real estate-backed securities, certain private label residential MBS and CMOs, private label commercial MBS, collateralized loan obligations and state and municipal obligations. Pricing of these securities is generally primarily spread driven. Observable inputs that may impact the valuation of these securities include benchmark yield curves, credit spreads, reported trades, dealer quotes, bids, issuer spreads, current rating, historical constant prepayment rates, historical voluntary prepayment rates, structural and waterfall features of individual securities, published collateral data, and for certain securities, historical constant default rates and default severities. Investment securities available for sale generally classified within level 3 of the fair value hierarchy include certain private label MBS and trust preferred securities. The Company typically values these securities using third-party proprietary pricing models, primarily discounted cash flow valuation techniques, which incorporate both observable and unobservable inputs. Unobservable inputs that may impact the valuation of these securities include risk adjusted discount rates, projected prepayment rates, projected default rates and projected loss severity.

The Company uses third-party pricing services in determining fair value measurements for investment securities. To obtain an understanding of the methodologies and assumptions used, management reviews written documentation provided by the pricing services, conducts interviews with valuation desk personnel and reviews model results and detailed assumptions used to value selected securities as considered necessary. Management has established a robust price challenge process that includes a review by the treasury front office of all prices provided on a monthly basis. Any price evidencing unexpected month over month fluctuations or deviations from expectations is challenged. If considered necessary to resolve any discrepancies, a price will be obtained from an additional independent valuation source. The Company does not typically adjust the prices provided, other than through this established challenge process. The results of price challenges are subject to review by executive management. The Company has also established a quarterly process whereby prices provided by its primary pricing service for a sample of securities are validated. Any price discrepancies are resolved based on careful consideration of the assumptions and inputs employed by each of the pricing sources.

Servicing rights—Commercial servicing rights are valued using a discounted cash flow methodology incorporating contractually specified servicing fees and market based assumptions about prepayments, discount rates, default rates and costs of servicing. Prepayment and default assumptions are based on historical industry data for loans with similar characteristics. Assumptions about costs of servicing are based on market convention. Discount rates are based on rates of return implied by observed trades of underlying loans in the secondary market.

All of the Company's residential mortgage servicing rights were sold in 2018.

Derivative financial instruments—Fair values of interest rate swaps are determined using widely accepted discounted cash flow modeling techniques. These discounted cash flow models use projections of future cash payments and receipts that are discounted at mid-market rates. Observable inputs that may impact the valuation of these instruments include LIBOR swap

BANKUNITED, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2018

rates and LIBOR forward yield curves. These fair value measurements are generally classified within level 2 of the fair value hierarchy.

The following tables present assets and liabilities measured at fair value on a recurring basis at the dates indicated (in thousands):

	2018

Settlements	(23,991)	(67)	—
Balance at end of period	<u>\$ 120,610</u>	<u>\$ 4,572</u>	<u>\$ 27,159</u>
Change in unrealized gains or losses included in OCI for assets held at the end of the reporting period	<u>\$ (2,229)</u>	<u>\$ (9)</u>	

Gains on private label residential MBS recognized in net income during the years ended December 31, 2018 and 2017 are included in the consolidated statement of income line item "Gain on investment securities, net." Changes in the fair value of servicing rights are included in the consolidated statement of income line item "Other non-interest income." Changes in fair value include changes due to valuation assumptions, primarily discount rates and prepayment speeds, as well as other changes such as runoff and the passage of time. The amount of net unrealized losses included in earnings for the years ended December 31, 2018, 2017 and 2016 that were related to servicing rights held at December 31, 2018, 2017 and 2016 totaled approximately \$1.5 million, \$1.0 million and \$1.8 million, respectively, and were primarily due to changes in discount rates and prepayment speeds.

Securities for which fair value measurements are categorized in level 3 of the fair value hierarchy at December 31, 2018 consisted of pooled trust preferred securities with a fair value of \$5 million and private label residential MBS and CMOs with a fair value of \$35 million. The trust preferred securities are not material to the Company's financial statements. Private label residential MBS consisted of senior and mezzanine tranches collateralized by prime fixed rate and hybrid 1-4 single family residential mortgages originated before 2005. Substantially all of these securities have variable rate coupons. Weighted average subordination levels at December 31, 2018 were 12.8% and 10.1% for investment grade and non-investment grade securities, respectively.

BANKUNITED, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2018

The following table provides information about the valuation techniques and unobservable inputs used in the valuation of private label residential MBS and CMOs falling within level 3 of the fair value hierarchy as of December 31, 2018 (dollars in thousands):

	Fair Value at December 31, 2018	Valuation Technique	Unobservable Input	Range (Weighted Average)
Investment grade	\$ 22,675	Discounted cash flow	Voluntary prepayment rate	4.30% - 25.50% (12.28%)
			Probability of default	0.00% - 5.85% (1.03%)
			Loss severity	15.00% - 100.00% (18.84%)
			Discount rate	2.35% - 7.71% (2.95%)
Non-investment grade	\$ 12,009	Discounted cash flow	Voluntary prepayment rate	1.20% - 25.00% (16.51%)
			Probability of default	0.00% - 5.85% (2.31%)
			Loss severity	15.00% - 76.60% (29.16%)
			Discount rate	1.06% - 9.95% (4.91%)

The significant unobservable inputs impacting the fair value measurement of private label residential MBS and CMOs include voluntary prepayment rates, probability of default, loss severity given default and discount rates. Generally, increases in probability of default, loss severity or discount rates would result in a lower fair value measurement. Alternatively, decreases in probability of default, loss severity or discount rates would result in a higher fair value measurement. For securities with less favorable credit characteristics, decreases in voluntary prepayment speeds may be interpreted as a deterioration in the overall credit quality of the underlying collateral and as such, lead to lower fair value measurements. The fair value measurements of those securities with higher levels of subordination will be less sensitive to changes in these unobservable inputs other than discount rates, while securities with lower levels of subordination will show a higher degree of sensitivity to changes in these unobservable inputs other than discount rates. Generally, a change in the assumption used for probability of default is accompanied by a directionally similar change in the assumption used for loss severity given default and a directionally opposite change in the assumption used for voluntary prepayment rate.

The following table provides information about the valuation techniques and significant unobservable inputs used in the valuation of servicing rights as of December 31, 2018 (dollars in thousands):

	Fair Value at December 31, 2018	Valuation Technique	Unobservable Input	Range (Weighted Average)
Commercial servicing rights	\$ 9,525	Discounted cash flow	Prepayment rate	2.82% - 17.09% (12.34%)
			Discount rate	4.84% - 17.07% (13.33%)

Increases in prepayment rates or discount rates would result in lower fair value measurements and decreases in prepayment rates or discount rates would result in higher fair value measurements. Although the prepayment rate and the discount rate are not directly interrelated, they generally move in opposite directions.

Assets and liabilities measured at fair value on a non-recurring basis

Following is a description of the methodologies used to estimate the fair values of assets and liabilities that may be measured at fair value on a non-recurring basis, and the level within the fair value hierarchy in which those measurements are typically classified.

Impaired loans, OREO and other repossessed assets—The carrying amount of collateral dependent impaired loans is typically based on the fair value of the underlying collateral, which may be real estate, taxi medallions, or other business assets, less estimated costs to sell. The carrying value of OREO is initially measured based on the fair value of the real estate acquired in foreclosure and subsequently adjusted to the lower of cost or estimated fair value, less estimated cost to sell. Fair values of real estate collateral and OREO are typically based on third-party real estate appraisals which utilize market and income approaches to valuation incorporating both observable and unobservable inputs. When current appraisals are not available, the

BANKUNITED, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2018

Company may use brokers' price opinions, home price indices or other available information about changes in real estate market conditions to adjust the latest appraised value available. These adjustments to appraised values may be subjective and involve significant management judgment. The fair value of repossessed assets, other than taxi medallions, or collateral consisting of other business assets may be based on third-party appraisals or internal analyses that use market approaches to valuation incorporating primarily unobservable inputs. The valuation of New York City taxi medallions is based on prices obtained in a fourth quarter 2018 sale of taxi medallion loans and repossessed taxi medallions. At December 31, 2018, the Company's investment in taxi medallion loans and repossessed taxi medallions was not material.

Fair value measurements related to collateral dependent impaired loans, OREO and other repossessed assets are classified within levels 2 and 3 of the fair value hierarchy.

Equipment under operating lease—Fair values of equipment under operating lease are typically based upon discounted cash flow analysis, considering expected lease rates and estimated end of life residual values. These fair value measurements are classified within level 3 of the fair value hierarchy.

The following tables present the carrying value of assets for which non-recurring changes in fair value have been recorded for the periods indicated (in thousands):

	2018				Losses from Fair Value Changes
	Level 1	Level 2	Level 3	Total	Year Ended December 31, 2018
OREO and repossessed assets	\$ —	\$ 1,085	\$ 486	\$ 1,571	\$ (1,864)
Impaired loans	\$ —	\$ 775	\$ 35,397	\$ 36,172	\$ (6,816)
	2017				Losses from Fair Value Changes
	Level 1	Level 2	Level 3	Total	Year Ended December 31, 2017
OREO and repossessed assets	\$ —	\$ —	\$ 5,790	\$ 5,790	\$ (2,078)
Impaired loans	\$ —	\$ —	\$ 93,051	\$ 93,051	\$ (65,716)
	2016				Losses from Fair Value Changes
	Level 1	Level 2	Level 3	Total	Year Ended December 31, 2016
OREO and repossessed assets	\$ —	\$ —	\$ 12,466	\$ 12,466	\$ (1,156)
Impaired loans	\$ —	\$ —	\$ 78,121	\$ 78,121	\$ (25,573)
Equipment under operating lease	\$ —	\$ —	\$ 8,173	\$ 8,173	\$ (4,100)

Included in the tables above are impaired taxi medallion loans with carrying values of \$0.8 million, \$86.0 million and \$50.7 million at December 31, 2018, 2017 and 2016, respectively, the majority of which were in New York City. Losses from fair value changes included in the tables above include \$0.5 million, \$62.4 million and \$12.7 million were recognized on impaired taxi medallion loans during the years ended December 31, 2018, 2017 and 2016, respectively. In addition, OREO and repossessed assets reported above included repossessed taxi medallions with carrying values of \$1.1 million, \$2.1 million and \$2.5 million at December 31, 2018, 2017 and 2016, respectively. Losses of \$1.0 million, \$1.3 million and \$0.2 million were recognized on repossessed taxi medallions during the years ended December 31, 2018, 2017 and 2016, respectively.

Note 16 Commitments and Contingencies

The Company issues off-balance sheet financial instruments to meet the financing needs of its customers. These financial instruments include commitments to fund loans, unfunded commitments under existing lines of credit, and commercial and standby letters of credit. These commitments expose the Company to varying degrees of credit and market risk which are essentially the same as those involved in extending loans to customers, and are subject to the same credit policies used in underwriting loans. Collateral may be obtained based on the Company's credit evaluation of the counterparty. The Company's maximum exposure to credit loss is represented by the contractual amount of these commitments.

Commitments to fund loans

These are agreements to lend funds to customers as long as there is no violation of any condition established in the contract. Commitments to fund loans generally have fixed expiration dates or other termination clauses and may require payment of a fee. Many of these commitments are expected to expire without being funded and, therefore, the total commitment amounts do not necessarily represent future liquidity requirements.

Unfunded commitments under lines of credit

Unfunded commitments under lines of credit include commercial, commercial real estate, home equity and consumer lines of credit to existing customers. Some of these commitments may mature without being fully funded.

Commercial and standby letters of credit

Letters of credit are conditional commitments issued by the Company to guarantee the performance of a customer to a third party. These letters of credit are primarily issued to support trade transactions or guarantee arrangements. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers.

BANKUNITED, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2018

Total lending related commitments outstanding at December 31, 2018 were as follows (in thousands):

Commitments to fund loans	\$	508,074
Commitments to purchase loans		518,054
Unfunded commitments under lines of credit		2,853,431
Commercial and standby letters of credit		85,446
	<u>\$</u>	<u>3,965,005</u>

Legal Proceedings

The Company is involved as plaintiff or defendant in various legal actions arising in the normal course of business. In the opinion of management, based upon advice of legal counsel, the likelihood is remote that the impact of these proceedings, either individually or in the aggregate, would be material to the Company's consolidated financial position, results of operations or cash flows.

BANKUNITED, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2018

Note 19 Subsequent Events

Termination of Single Family Shared-Loss Agreement

On February 13, 2019, the Bank entered into a termination agreement with the FDIC that terminated the Bank's Single Family Shared-Loss Agreement with the FDIC effective immediately. The Bank has made a payment of approximately seven thousand dollars to the FDIC in connection with the termination and all rights and obligations of the Bank and the FDIC under the Single Family Shared-Loss Agreement have been terminated.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures***Evaluation of Disclosure Controls and Procedures***

As of the end of the period covered by this Annual Report on Form 10-K, we carried out an evaluation under the supervision and with the participation of our management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures as defined in Exchange Act Rules 13a-15(e) and 15d-15(e). Based upon that evaluation, the Chief Executive Officer and the Chief Financial Officer concluded that our disclosure controls and procedures were effective as of December 31, 2018.

Changes in Internal Control over Financial Reporting

None.

Management's Report on Internal Control Over Financial Reporting

Management's report, which is included in Part II, Item 8 of this Form 10-K, is incorporated herein by reference.

Attestation Report of the Registered Public Accounting Firm

The effectiveness of the Company's internal control over financial reporting as of December 31, 2018 has been audited by KPMG LLP, an independent registered public accounting firm, as stated in their report, which is included in Part II, Item 8 of this Form 10-K.

Item 9B. Other Information

None.

PART III**Item 10. Directors, Executive Officers and Corporate Governance**

Information regarding the directors and executive officers of BankUnited, Inc. and information regarding Section 16(a) compliance, the Audit and Risk Committees, the Company's code of ethics, background of the directors and director nominations appearing under the captions "Section 16(a) Beneficial Ownership Reporting Compliance," "Committees of the Board of Directors," "Corporate Governance Guidelines, Code of Conduct and Code of Ethics," "Director Nominating Process and Diversity" and "Election of Directors" in the Company's Proxy Statement for the 2019 annual meeting of stockholders is hereby incorporated by reference.

Item 11. Executive Compensation

Information appearing under the captions "Director Compensation" and "Executive Compensation" in the 2019 Proxy Statement (other than the "Compensation Committee Report," which is deemed furnished herein by reference) is hereby incorporated by reference.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

Information setting forth the security ownership of certain beneficial owners and management appearing under the caption "Beneficial Ownership of the Company's Common Stock" and information in the "Equity Compensation Plans" table appearing under the caption "Equity Compensation Plan Information" in the 2019 Proxy Statement is hereby incorporated by reference.

Item 13. Certain Relationships and Related Transactions, and Director Independence

Information regarding certain related transactions appearing under the captions "Certain Related Party Relationships" and information regarding director independence appearing under the caption "Director Independence" in the 2019 Proxy Statement is hereby incorporated by reference.

Item 14. Principal Accountant Fees and Services

Information appearing under the captions "Auditor Fees and Services" and "Policy on Audit Committee Pre-Approval of Audit and Permissible Non-Audit Services of Independent Auditors" in the 2019 Proxy Statement is hereby incorporated by reference.

PART IV

**Certification of Chief Executive Officer
Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002**

I, Rajinder P. Singh, certify that:

1. I have reviewed this annual report on Form 10-K of BankUnited, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

**Certification of Chief Financial Officer
Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002**

I, Leslie N. Lunak, certify that:

1. I have reviewed this annual report on Form 10-K of BankUnited, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
